Dairy Family Tree Stems From the Hessians

Four generations of the Laughlin family gather in the evening for photos. The Laughlins can trace their roots back to the Revolutionary War of 1775. Jim and son Joe dairy farm in Ferguson Valley near Lewistown, Mifflin County. Left to right is, seated, Mary Laughlin holding granddaughter Katie, Jim Laughlin with grandson Charlie, Glenn Laughlin seated in the center, Joe Laughlin, Elizabeth Laughlin, Beth and son David.

GAIL STROCK
Mifflin Co. Correspondent

FERGUSON VALLEY (Mifflin Co.) — It's been a long time since the Revolutionary War of 1775, the Boston Tea Party, Paul Revere's famous ride, and the not so famous hired Hessians, German soldiers hired by the British to fight the American colonists.

According to the encyclopedia, the Hessians were victims of a country which sold their men into military service. Many Hessians, who cared little about the Revolutionary War, joined the American cause and stayed in the United States after the war.

That war is also a far cry from today's tractor-furrowed fields and mechanized milking machines. The Laughlin families of Ferguson Valley, Mifflin County, know a branch of their family tree stems from the Hessians, but fortunately farming lifestyles nowadays are so far removed from the bayonet and musket clad fighters. The three Laughlin families live a quiet life devoted to family dairy farming and community service.

Noss Is Vice Chairman of National Dairy Board

VERNON ACHENBACH JR.
Lancaster Farming Staff

PORT ROYAL (Juniata Co.) — David Noss is a dairy farmer in partnership with his brother Larry in a 60-milking cow/cropping operation on more than 220 acres in Juniata County.

The farm is located near Honey Grove, along Rt. 75, which is a two-lane state road that cuts a path close along the northern slope ot the 75-mile long Tuscarora Mountain.

The Tuscarora Mountain is a long, narrow ribbon of a mountain that butts against the Mason-Dixon Line, and arches northeast in a half-moon toward the Susquehanna River.

It is one of several parallel-

Poultry Houses Need Proper Bracing To Endure Heavy Ice, Snow Loads

ANDY ANDREWS
Lancaster Farming Staff

MANHEIM (Lancaster Co.) — Excessive snow and ice loads last winter created heavy damage to the roofs of poultry houses throughout the region. But it wasn't necessarily the snow or ice that made them weaken or collapse.

In a word, it was "bracing." More precisely, improperly designed and installed bracing in the roof trusses caused millions of dollars worth of damage to houses, according to ag engineering experts.

In one engineer's estimate, for about 95 percent of the houses that were constructed with prefabricated wood trusses and that experienced winter load damage, the primary problem was lack of proper bracing and placement of bracing.

Galen "Bud" Collins, project manager for structural engineering at Rettew Associates, Inc., Lancaster, investigated the sites of 12 damaged hog facilities (with partial or full collapses) and one poultry house. He compared notes with another structural engineer.

What did they find?

"Every one of (the facilities) had, number one, a lack of adequate bracing, and, number two, faulty installation of bracing," said Collins.

He said, "In most buildings — I would venture to say, almost all buildings that collapsed this past winter — there was some inherent problem that caused the collapse, more than just snow."

Collins called the past winter, with record-breaking precipitation and cold temperratures, the worst the state has had in "about a hundred years. We had a combination of snow and ice that produced some of the heaviest loads that

FFA Officers Elected At Activities Week

STATE COLLEGE (Centre Co.) — This year marked the 65th anniversary of FFA as more than 1,250 FFA members, advisers, and guests attended the Pennsylvania FFA Activities Week here this week.

At the convention, 11 new state officers were elected. They are Jenny Zerby, West Snyder High School, state president; Marci Hamish, Manheim, state vice president; Theresa Inhoff, Owen J. Roberts High School, eastern region vice president; Kelli Zeigler, Big Spring High School, south central region vice president; Laurie Wildman, Cowanesque Valley High School, north central region vice president; Jim McConnaughey, Derry High School, western region vice president; Chad Slusser, Pequea Valley High School, treasurer; Heidi Dalhammer, Northern York High School, secretary; Traci Lobaugh, Biglerville High School, reporter; Tony Miller, Pequea Valley High School, sentinel; and Benjamin Dodd, Twin Valley High School, chaplain.

Tuesday evening included the annual Keystone Degree celebration, state officer parent recognition, and a special presentation by hypnotist Dr. Jim Wand. Wednesday included the featured speaker, Tyler Grandil, National FFA western region vice president. State officers were elected Thursday morning.

Other highlights included skill competition, public speaking, land judging, and related activities.

At the state FFA convention this week, 11 new state officers were elected. They are, front row, from left, Jim McConnaughey, Derry High School, western region vice president; Chad Slusser, Pequea Valley High School, treasurer; Tony Miller, Pequea Valley High School, sentinel; and Benjamin Dodd, Twin Valley High School, chaplain. Back row, from left, Heidi Dalhammer, Northern York High School, secretary; Traci Lobaugh, Biglerville High School, reporter; Kelli Zeigler, Big Spring High School, south central region vice president; Marci Hamish, Manheim, state vice president; Jenny Zerby, West Snyder High School, state president; Theresa Inhoff, Owen J. Roberts High School, eastern region vice president; and Laurie Wildman, Cowanesque Valley High School, north central region vice president.

New York & Philadelphia Frozen Eggs

Tuesday, June 14, 1994

Prices were unchanged to lower. Trade sentiment was unsettled, but generally weak. Demand was light, and buyers were still unaggressive. Floor stocks of finished products were at least adequate. Shell egg supplies were also at least adequate for the sluggish demand.

WHOLESALE SELLING PRICES (CENTS PER POUND IN 30 LB. CONTAINERS) TRUCKLOTS LTL (MIN. 25 CONT.) RANGE MOSTLY RANGE WHOLE 45-47 46 48-55 BLEND (/) - - 58-65 WHITES 40-42 40-41 43-49 SUGARED YOLKS (MIN 43% SOLIDS) 55-58 56-57 59-65 SALTED YOLKS (MIN 43% SOLIDS) 51-54 52-53 55-59 (/) - WHOLE PLUS YOLK PLUS SWEETENER, GENERALLY 28-32% EGG SOLIDS.

New York Egg Market

Wednesday, June 15, 1994

Prices were lower for the large sizes, and unchanged for mediums. The market tone continued mostly weak. Demand was light to fair. Supplies were adequate to ample.

National Egg Market

Wednesday, June 15, 1994

NATIONAL EGG - AT A GLANCE: Prices were unchanged to lower on the large sizes in the North Atlantic and Midwest areas, unchanged elsewhere. The market tone was cautiously steady to weak. Cartoned egg demand was light to moderate, occasionally better. Supplies of all sizes remained adequate to ample, and available. Breakers received adequate shell eggs from regular sources or surplus offerings. Live hen offerings remained at least adequate for the no better than moderate demand, and the trade sentiment was mostly steady.

North Atlantic Shell Eggs

Thursday, June 16, 1994

Report Supplied by USDA

MARKET COMMENT: DEMAND WAS GENERALLY NO BETTER THAN FAIR. SUPPLIES RANGED ADEQUATE TO AMPLE AND EASILY SATISFIED CURRENTLY DEALER NEEDS. BREAKERS WERE UNAGGRESSIVE AND USUALLY HAD SUFFICIENT STOCKS TO MAINTAIN DESIRED SCHEDULES. A EXTRA LARGE .60-.67, LARGE .58-.65, MEDIUMS .46-.49.

Northeast Broiler/Fryer Parts

Wednesday, June 15, 1994

Trucklot buying interest was fair to instances fairly good for mid-week trading. Supplies of boneless skinless breasts with tenders were well cleared to a good demand at steady prices. Big boneless and product without tenders were available and offered at lower prices and were slow to clear. Line run breasts were irregularly distributed. Most supplies cleared the market at steady prices but a few loads were offered at competitive prices to cautious buyers. Whole legs and leg quarters were starting to show and under pressure. Wings were in close balance. The trade is watching the impact of hot weather on the markets.

PRICES PAID PER POUND, ICE PACKED AND CO2 PACKED BROILER/FRYER PARTS, DELIVERED TO FIRST RECEIVERS IN POOL TRUCKLOT AND TRUCKLOT QUANTITIES. ITEM CURRENT NEGOTIATED TRADING* BREAST - B/S (W & W/O TENDERS) 195-200 BREAST - WITH RIBS 87-88 BREAST - LINE RUN 87 LEGS 49-50 LEG QUARTERS (BULK) 32-33 DRUMSTICKS 46-47 THIGHS 43-44 WINGS (WHOLE) 64-65 BACKS AND NECKS (STRIPPED) 10-12 LIVERS (5 POUND TUBS) 20-25 GIZZARDS (HEARTS) 30-35 INCLUDES NEW YORK CITY METROPOLITAN AREA, NORTHERN NEW JERSEY, MASSACHUSETTS, CONNECTICUT, RHODE ISLAND, AND PENNSYLVANIA (NORTHEAST OF HARRISBURG). * TODAY'S NEGOTIATED SALES AS OF 11:30 A.M.

Delmarva Broiler/Fryer Market

Wednesday, June 15, 1994

Movement of ready-to-cook whole birds slowed and was generally held to previous commitments. Offerings varied, but were readily available at some points, and were difficult to place. Live supplies were mostly moderate; weights remained in a full range, while trending lighter. Processing schedules remained very heavy. Less than trucklot asking prices were unchanged. Trade sentiment was mostly lower. Hot, humid weather at both production and receiving terminals was being closely monitored. In the parts complex, all items were at least adequate for current inquiry. Wings were in closest balance.

Take this PRIME Opportunity to GROW With Us!

As a business person, you recognize the importance of providing supplemental protein, vitamins and minerals to your dairy cows on a daily basis. That's why **Agway** has teamed up with **Mol-Mix® Liquid Supplements** and can now offer you **Free-Choice Prime** and **Prime with Bovatec®** products.

Balance.

Mol-Mix Free-Choice Prime Liquid Supplements are formulated to provide protein (from both natural sources and non-protein nitrogen) plus vitamins and minerals to balance your livestock's rations — especially when pasture quality is down.

Growth.

Mol-Mix Free-Choice Prime Liquid Supplements with Bovatec were the *first* FDA-approved Bovatec-medicated free-choice liquid supplements. They are used for increased weight gain of dairy and beef replacement heifers by enabling them to utilize energy and protein more efficiently.

Mol-Mix.

These **Mol-Mix Liquid Supplements** are also guaranteed to give you:

- Safety
- Convenience
- Palatability
- Consistency

Call us at **1-800-GO-AGWAY** or contact your local **Feed Sales Specialist** today for more information. Also, if you order your first lick tank and fill it with Prime with Bovatec before July 1, 1994, we'll add in a ***free pair of Wells Lamont® Grips™ gloves*** with your order.**

So join us in taking this **PRIME** opportunity for **GROWTH** today!

MOL MIX® Liquid Supplements

AGWAY®

Mol-Mix is a registered trademark owned by Cargill, Inc.
* Bovatec is a registered trademark of Hoffmann-La Roche, Inc. for its brand of lasalocid.
**To qualify, you cannot have used any lick tank product within the twelve-month period prior to purchase of the Prime with Bovatec product.

The OLD FARMER'S THIS WEEK WITH ALMANAC

JUNE 20-26, 1994

SUMMER SOLSTICE, JUNE 21.

SUMMERTIME

The Summer Solstice, the first day of summer in the northern hemisphere, arrives on June 21, at 9:48 A.M., EST, when the Sun reaches the Tropic of Cancer (23½° north latitude) People who live at this latitude (for instance, in the Bahamas) see the Sun directly overhead at noon The rest of us notice that the Sun is higher in the sky throughout the day. Since the Sun is north of the equator, we also notice that the Sun is up more than half the time On June 21, Atlanta, Georgia, has 14 hours, 24 minutes of daylight and Boston has 15 hours, 18 minutes, while at the Arctic Circle the Sun never sets, but skims along the north point on the horizon

A summer's Sun is worth the having. — French Proverb

TIP OF THE WEEK

On long car trips, take along a jump rope so the kids can work off excess energy when you stop for gas or food.

EARTHWISE

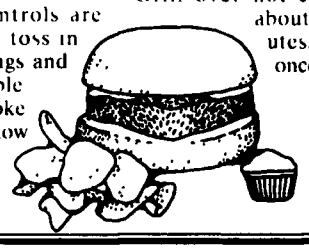
There is really no good reason not to compost Composting does not have to be expensive messy smelly or time consuming Bins can be made from discarded wooden pallets for free, or from 13-gauge kennel wire for about $5 each No special additives or elaborate temperature controls are required — just toss in your yard clippings and fruit and vegetable peels, give it a poke with a pitch fork now and then, and let it do its thing

GRILLED VEGGIE PORK BURGERS

1 pound ground pork
1 grated carrot
3 tablespoons chopped parsley
3 drops hot pepper sauce
1 teaspoon black pepper
¼ teaspoon salt

Mix all ingredients and form into 4 burgers approximately ½-inch thick (Don't overmix, it will make the burgers tough) Grill over hot coals for about 10 minutes, turning once

Makes 4 servings.



The OLD FARMER'S WEATHER FORECAST

NORTHEAST: Sunny and warm, clearing north, then rainy and cooler

SOUTHEAST: Showers and cool, rainy and warming thunderstorms and hot Florida

MIDWEST: Clear and warm then rain intermittent thunderstorms, turning colder

NORTHWEST: Sunny and warm some showers mountains and east, clear coast

SOUTHWEST: Sunny and warm inland, showers east, cool coast, clear and hot desert

VALLEY FRESH FOODS
RELIES ON THE
Big Dutchman®
CHAIN FEEDING SYSTEM

Valley Fresh Foods' complexes in Turlock, California, Townsend, Montana, Woodburn, Oregon, and Rochester, Washington house 2 5 million birds, with several houses of Big Dutchman Cage Systems

Joe Arias, President of Valley Fresh Foods, Inc believes his decision to use Big Dutchman Cage Systems with Chain Feeding is right on the money Mr. Arias has been changing over to Big Dutchman for several years and has plans to continue to equip future houses with Big Dutchman systems. The bottom line, he says, "is that Big Dutchman's chain feeding system promotes better management flexibility that equates to higher profits "

Arias chose the Big Dutchman chain system because it handles the feed capacities he needs for his high bird density houses It is easy to adjust the amount of feed and feeding schedule as needed when making feed formulation changes It all adds up to more eggs and better feed conversion

The computer print-outs from the current test* in Turlock, California, confirm to Mr Arias his decision to go with Big Dutchman Chain Feeding provides him with ***more*** eggs, ***better*** feed conversion and ***fewer*** undergrades than drag auger feeding.

*Test house contains both the Big Dutchman chain feeding system and Chore-Time's drag auger system. It houses sister birds and other parameters that are equal.

Lancaster Farming

OPINION

Lose Farming And Our Freedom

Almost everone would agree that it is vital to protect our environment. But how to do this has been the subject of an increasing number of disputes. And the large number of these controversies that are being settled by government agencies, and the laws they create, enforce, and adjudicate in clear violation of the principle of separation of powers, has endangered another resource--our liberty.

Robert Ernst, an attorney from Salinas, California, recently spoke at Hillsdale College, Hillsdale, Michigan, on the subject as reported in the May, 1994, *Imprimis,* published by the college.

Ernst said that all too often these days, the laws designed to protect our environment do more harm than good. The instances in which environmental laws have led to incredible waste of resources are legion. The laws favor false crises instead of real environmental problems and even create greater problems than they were made to eliminate. Scare campaigns against acid rain, asbestos, toxic waste, carcinogens, global warming and global cooling are just a few examples.

Even worse, such laws are instruments of tyranny. "According to the modern view of environmental protection, men count not more than the grass upon which they walk," Ernst said. "It is no wonder that this view attracts adherents who have little appreciation or patience for the nuances of ordered liberty or that the laws it produces are actually contrary to the rule of law."

The pantheism of radical environmentalists represents a near-complete rejection of the philosophy of America's founders and most of our farm community. It's politically correct to ignore the faulty theology, as well as faulty science behind the environmentalists' vision. The broadly-worded laws are left to executive agencies like the Environmental Protection Agency (EPA) for implementation. And our citizens, including farmers, are required to adhere to what is, in effect, a state-sponsored religion.

Let's hope we don't lose our farming and our freedom in the effort to save the environment.

Now Is The Time

By John Schwartz
Lancaster County Agricultural Agent

To Apply For Liquid Fuels Tax

Notice and application for the Pennsylvania Liquid Fuels Tax Refunds are in the mail.

This application must be filled out and returned in order to receive your tax refund. The application covers the period from July 1, 1993 to June 30, 1994 that you paid taxes on liquid fuels used in agriculture.

Even though farmers pay 12 cents per gallon when purchasing the fuel (gasoline, diesel fuel, etc.), they are exempt from the tax and must apply and request the refund. Based on Pennsylvania Treasury Department's figures, only 20 percent of the state's farmers applied for the refund.

Last year the average refund was $183. You need to have records on how much fuel was used in agricultural production. If you do not receive an application, contact the Board of Finance and Revenue, Room 500C, Finance Building, Harrisburg, PA 17120 or call (717) 787-6534.

Take the time now to request the money due you. Remember, this is your money the state of Pennsylvania owes you.

To Check Trusses

It is hard to believe that only six months ago we were experiencing one of the worst winters on record.

During this period, we saw several roofs collapse because of snow loads and construction flaws. The most common problem was inadequate bracing of trusses. Improperly installed braces and not enough bracing were two main reasons roofs collapsed.

Also, deterioration of nail plates from rust will weaken the roof.

Now is a good time to evaluate your load bearing capacity of your roofs and make the necessary repairs. If you are adding more insulation to your building, you will want to check your trusses and braces.

The added insulation will increase the snow load for your roof since less snow will melt when it hits the roof. (Insulation keeps the heat of the building from reaching the roof.) By checking your roofs, you could prevent a major disaster this winter.

To Keep A Diary

Experience is the best teacher. For experience to be a teacher, we must first take notes.

As time passes, these notes become more valuable. They act as a refresher when we experience a similar experience 5, 10, or 15 years from now.

One way to keep notes is in a diary. By using a 5-year diary, you may quickly glance back to what happened in the past.

You may also want to keep a production log. In this log you would keep a record of new things you tried and their results and observations.

Now would be a good time to walk your fields and observe crop stand, effects of winter or hot weather, insect populations, equipment performance, etc. Other items to record would be date of last frost, first frost, tasselling date for corn, dates of hay cuttings, and other useful and interesting facts as they relate to your farm.

These records could be very valuable to future generations as they begin to farm.

I still remember several of the observations may grandfather had, that is, frost occurs around a full moon, temperatures average out — if a cold winter, expect a hot summer, etc.

Take time to study and learn from the many areas that influence farming. You, your children and grandchildren will profit from these observations.

Feather Prof's Footnote: "In the name of love, give a child a dream."

THE BIBLE SPEAKS
BY LAWRENCE W. ALTHOUSE

IS THIS FREEDOM?
June 19, 1994

IS THIS FREEDOM?

Background Scripture:
Exodus 6:2-9; 11:1-3; 12:21-36
Devotional Reading:
Exodus 5:1-9

Can you imagine any more exciting news than what Moses brought the people of Israel from the Lord? "I have heard the groaning of the people of Israel whom the Egyptians hold in bondage and I have remembered my covenant. Say therefore to the people of Israel, 'I am the Lord, and I will bring you out from under the burdens of the Egyptians, and I will deliver you from their bondage . . . And I will bring you into the land which I swore to give to Abraham . . . I will give it to you for a possession'" (6:5-8).

This message of freedom came to a people who for several generations had been in grievous bondage to the Pharaoh, a people who could not personally remember the freedom of their forefathers, Abraham, Isaac and Jacob. Now, through Moses, God promised that their burdens would be lifted, they would escape from Egypt and have a land of milk and honey for their very own.

So how did they react to this good news? "But they did not listen to Moses, because of their broken spirit and their cruel bondage" (6:9). It was too good to be true. They had given up hope. They could not believe the good news. You and I may wonder at their lack of faith, but that's because we are not in their shoes. After all, they are only being realistic and logical, the two most idolized attributes of human personality.

BROKEN IN SPIRIT

Recently, in reading *Schindler's List*, I remembered that at the close of World War II, when some of the concentration/extermination camps were liberated by Allied Forces, the inmates stayed in the camps even when it was no longer necessary. They had been prisoners so long and so thoroughly that they did not know how to deal with freedom. Like the Israelites in Egypt, they were "broken in spirit."

I have also personally observed in Poland, Latvia, Russia and East Germany (DDR) that, after 40 years of political bondage, many of the people there do not know what to do with the freedom for which they had hungered. Throughout Eastern Europe and the countries of the former Soviet Union people are having a terrible time handling their newly-gained freedom. Suddenly crime is rampant. Economic chaos is the common experience. Moral decay is everywhere. I pray that these people may not grow weeary of their fearful freedom and once again embrace bondage. By itself, freedom can be every bit as frightening and dangerous as bondage — perhaps even more so — when we are broken in spirit.

MORE THAN FREEDOM

Something more then freedom is needed. Actually, the best news that Mosses brought them was not that they would be free, but that God had promised "I will take you for my people, and I will take you for my people, and I will be your God" (6:7). Faith in God, devotion to a purpose higher even than personal freedom, is the only thing that can make freedom work. I am hopeful because, while these countries are faltering politically and economically, there are evidences of a spiritual rebirth here and there.

True freedom is in danger, not only among people recently freed of political tyranny, but also in countries like our own where political freedom has been a heritage, if not a complete reality, for centuries. While the countries of Eastern Europe and the former Soviet Union are struggling to make freedom work, we ought to be no less concerned with the state of freedom in our own land.

It is possible to be politically free and spiritually or morally in bondage. With all the freedom we enjoy here, are we really free?

PIT BOSS™
Pit and Lagoon Treatment

The guaranteed solution to your toughest pit problems.

Less odor Faster, easier pump-out More value from every pound of waste your hogs and pigs produce

Too good to be true? Not if you add Pit-Boss™ pit and lagoon treatment to the containment reservoirs in your operation In fact, we guarantee it

Not an enzyme or bacteria.
Pit-Boss pit and lagoon treatment is a unique, environmentally safe, pH-controlled product—not an enzyme or bacteria like most competitive products Here's how it works

Waste digestion involves three distinct bacteria types aerobic bacteria, which break solids down into fatty and amino acids, anaerobic bacteria, which convert those acids into nuisance gases such as ammonia, hydrogen sulfide, and methane, and facultative bacteria capable of performing either role

Pit-Boss interacts chemically with waste constituents to boost the aerobic manure digestion process The result? Accelerated solids breakdown and relatively lower gas production

Virtually eliminates odor.
Relatively less gas and faster suspension of solids means dramatically reduced odor

The first application of Pit-Boss, for example, typically lowers combined gas levels 20 - 25%. With some confinement buildings recording levels as high as 55 ppm, that's a considerable reduction Subsequent applications achieve similar results In most cases, odor measures just 3 - 4 ppm after the third application, so your facility is safer for people, better for stock, and less likely to be targeted as a nuisance

Speeds the suspension of solids for faster, easier, more complete pump out.
Highly liquified waste not only emits less odor, it also saves you time and money by making quick, efficient pump-out possible

Pit-Boss pit and lagoon treatment breaks down solids fast **In fact, the first application of Pit-Boss typically reduces the sludge blanket on a holding pit by 4" - 6"**, the second by another 12" After the third application, most pits and lagoons are entirely free of solids

What's more, digesting the top crust on your pits or lagoons destroys egg-laying habitat for flies With Pit-Boss, you can count on less odor, easier pump-out, and fewer flies

Enhances the fertilizer value of waste by reducing nitrogen loss.
Up to 90% of the nitrogen in untreated slurry is lost as ammonia What's left at pump-out generally contains about 25 Lb of N, 19 Lb of P, and 20 LB of K per 1000 Lb of waste

GRAIN HULLS A PROBLEM? Ask Chem-A-Co how to suspend hulls so they're pumped out of your pits right along with the waste.

Guidelines for effective application

1. Start with an empty pit whenever possible.
2. For pits that are partially or completely full, the pH must be adjusted to 6.5 before applying Pit-Boss. This can be accomplished using Chem-A-Co's Adjusta-Boss ph balancer according to the instructions on the label.
3. Apply one gallon of Pit-Boss pit and lagoon treatment for each 60,000 gallons of usable pit volume (pit length x width x depth x 7.5). Premix each gallon of Pit Boss with 3-4 gallons of water and empty into the pit at several locations.
4. Do not agitate the pit or use lime or ammonia in or near the pit.

Oklahoma City Feeder Cattle

Oklahoma City, Okla.
Wednesday, June 15, 1994

Compared to last Monday: Feeder steers firm to $2.00 higher. Feeder heifers steady. Stocker cattle and calves steady. Trade active. Demand good early, moderate late. Feeder steers over 800 lbs. and feeder heifers over 650 lbs. comprised the majority of the supply. Most cattle under 600 lbs. are now new crop calves. Weigh-ups mostly average and somewhat improved from last week especially in late trade. Flesh condition of feeders varied from slightly thin to fleshy, however many cattle in very attractive flesh with slightly thin to average condition. Slaughter cows steady to $1.00 lower. Slaughter bulls steady to $.50 lower. Receipts this week 9,212; last week 12,454; last year 11,046. Supply consisted of 89 percent yearlings and a few calves over 600 lbs.; 8 percent calves under 600 lbs.; 3% cows and bulls. Prices follow with weighted average weight and price in parenthsis.

Feeder Steers: Medium and Large Frame 1: 500-600 lb. new crop calves (550 lbs.) $81.00-$89.00 ($85.46); 600-675 lb. calves (650 lbs.) $78.75- $84.75 ($78.89); 600-700 lb. stockers (650 lbs.) $80.00-$85.50 ($82.98); 650-700 lb. feeders (686 lbs.) $75.50-$79.25 ($76.96); 700-750 lbs. (727 lbs.) $75.00-$79.75 ($78.17); 750-800 lbs. (779 lbs.) $73.25-$77.75 ($75.08); 800-850 lbs. (822 lbs.) $72.00-$76.50 ($73.91); 850-900 lbs. (872 lbs.) $70.50-$74.00 ($71.94); 900-950 lbs. (914 lbs.) $67.75-$72.00 ($70.54); 950-1000 lbs. (975 lbs.) $67.00-$70.35 ($68.45); 1000-1050 lbs. (1018 lbs.) $65.00-$66.25 ($65.49). Holstein Steers: Large Frame 2: 525 lbs. $63.00; 750-800 lbs. $54.00-$56.25; 850-950 lbs. $51.00-$51.50; 965 lbs. $50.50.

Feeder Heifers: Medium and Large Frame 1: few 450-500 lbs. (476 lbs.) $78.00-$83.75 ($81.53); 500-550 lb. calves (531 lbs.) $75.50-$78.50 ($77.49); 550-600 lb. calves (574 lbs.) $73.75-$76.00 ($74.42); 550 lb. yearling stockers $82.00; 600-700 lbs. (650 lbs.) $72.00-$75.75 ($74.04); 700-800 lbs. (750 lbs.) $70.00-$74.00 ($71.91); 800-850 lbs. (820 lbs.) $67.00-$71.00 ($69.61); 900-950 lbs. (916 lbs.) $63.75-$67.00 ($65.12).

Slaughter Cows: Cutter, Boning and Breaking Utility Y.G. 1-4 average dressing $41.75-$43.75; high dressing $44.00-$47.50. Canner $36.50-$37.50.

Slaughter Bulls: Y.G. 1 1300-2050 lbs. average dressing $55.25-$56.50; few high dressing $59.75-$60.00.

Replacement Cows: Pretested for Bangs, pregnancy and age Medium and Large Frame 1, 5-6 years old 1100-1200 lbs. 4-8 months bred $600.00-$665.00/head.

Pairs: Medium and Large Frame 1, 8-10 year old 800-1000 lb. cows with 100-175 lb. calves $550.00-$625.00 per pair.

FOR DOUBLE-CROP SOYBEANS THERE'S ONLY ONE LEADER OF THE PACK.

PURSUIT® herbicide is today's best tool for double-crop beans. It not only delivers the *highest* degree of overall weed control, it's also the only postemergence product that combines contact and residual activity to give you superior control of more than 40 tough-to-control grasses and broadleaf weeds. Including velvetleaf, foxtails, cocklebur, pigweeds, nightshades, common ragweed, giant ragweed, sunflower, shattercane and seedling Johnsongrass. Without causing crop injury. And because of its advanced chemistry and low rates of application, PURSUIT offers a responsible choice for the environment. That's the kind of leadership everyone can respect. And reason enough to try PURSUIT. See us soon.

NEW LEADER L Series Spreaders

ATTENTION NEW LEADER OWNERS

$300 CERTIFICATE

NEW LEADER MARK III RETROFIT

Attention owners of NEW LEADER L-2020s or L-3020s equipped with MARK II spreader controls...

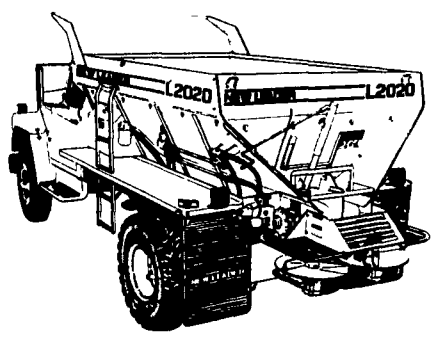
Move up to a NEW LEADER MARK III SYNCO-MATIC® SPREADER CONTROL with a DICKEY-john® radar today and receive an immediate $300 off. Simply present your NEW LEADER dealer this certificate when you place your order for a retrofit MARK III SYNCO-MATIC® and ask for Group #64160.

Look what a MARK III SYNCO-MATIC® SPREADER CONTROL with a DICKEY-john® radar can do for you.

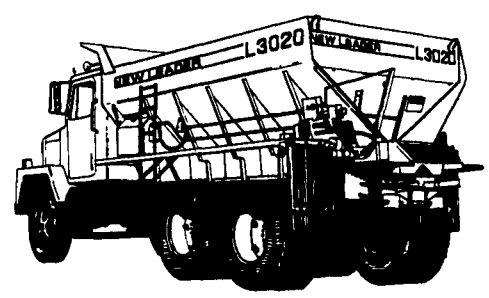
- **Display reads:** Acres covered; Distance traveled; Pounds/Tons per acre
- **Low maintenance:** Eliminates friction wheel; Eliminates speedometer cable; Eliminates two-speed gears
- **Change spread rate on-the-go from the cab**
- **MARK III retrofit kit includes:** In cab control with bracket; Wiring harness with all cables; Mark III Synco-Matic® control; Dickey-john® radar with brackets

This certificate is good for $300 off of a retrofit MARK III SYNCO-MATIC® SPREADER CONTROL with a DICKEY-john® radar group #64160 This certificate may not be combined with any other program(s) and is subject to change without notice This program expires at 5 00 p m CST on June 30, 1994.

Custom Applicators... Take Your Pick Of These Truck Mounted Spreaders



CHANCES ARE, IF YOU SPREAD FERTILIZER/LIME YOU ALREADY KNOW ABOUT NEW LEADER SPREADERS. BUT, DID YOU KNOW THAT:



- You get spread rate charts that are the most accurate in the industry.
- You get unequalled spread rate accuracy with the unique, MARK III SYNCO-MATIC® SPREADER CONTROL with a DICKEY-john® radar system.
- You get a choice of models to fit your specific application needs.
- You get reliable sales and service from factory trained dealers.

Hunsbergers To Host Somerset County Day At Farm

GAY BROWNLEE
Somerset Co. Correspondent

DAVIDSVILLE (Somerset Co.) — Like a freight train about to roll into his station, the 11th annual Somerset County Day at the Farm is sweeping upon Bill Hunsberger in a hurry. It is on Sunday, June 19, and Father's Day to boot.

"I don't know," sighs the slightly overwhelmed dairy farmer, "I'm getting knots in my stomach. There's so much to do," he says.

He's right, of course and speaks from experience that has no doubt dimmed a tad from when he and wife, Jeannette, hosted the first event back in 1984. He recalls some 800 visitors attended.

Sponsored by the Somerset County Farmers' Association, the free event has grown in both scope and attendance throughout the intervening years. Officials now charge $1 for vehicle parking space.

The popular hay bale toss and milk chugging contest, barn tours, hay rides, sheep shearing and milking demonstration and petting zoo promise an afternoon of great country fun.

Square dancers will be swingin' their partners to Day at the Farm "mood music." And folks really should demand a fiddle performance by 16-yr. old Matt Hunsberger, the eldest of the six kids. Matthew can really saw the fiddle!

Matt's so darn talented with the violin that he wound up a member of the Johnstown Youth Symphony Orchestra some five years ago and they've still got him.

Commodity queens and princesses will help the various agricultural organizations promote farming through food samples, fine exhibits and many door prize drawings. Day at the Farm, is after all, an educational event to teach non-farm consumers about dairy, beef, lamb, vegetable, maple and other agriculture products. Agriculture is the leading industry in Somerset County.

An added treat at the Hunsbergers is the cemetery on the hill in which the remains of Joseph Johns I, 1749-1813, are interred. He was the founder of Johnstown, a well-known city located just a few miles north of the Johns Cemetery.

Visitors to Day at the Farm may visit the cemetery which will be staffed that day. Doubtless they will find themselves so engrossed by the glorious panorama of country-side and the history of the deceased Johns family they'll linger and linger.

Headstones in the cemetery are in sequence. Each male was named Joseph Johns until the fourth generation, when for unknown reasons, the male descendent was named Sem. Joseph was again the name of the fifth and sixth generation males. Buried beside them are their wives.

Hunsbergers, by purchasing the farm in 1983, have broken a six-generation Johns family ownership. The sixth generation Joseph Johns is 81. With his sister, they still live in another house on the farm. According to Hunsberger, Joe, the last male in the line, never married and so leaves no male heir to continue the Johns name and tradition.

A Bucks County native, Hunsberger worked in Blair Co. before the Johns farm opportunity opened to him.

He and Jeannette's other offshoots are Nick, Butch, Reuben, Lydia and Olivia. The kids are in 4-H, American Youth Soccer Organization (AYSO), church and school activities. They all attend the Johnstown Christian School and all participate in the Kaufman Mennonite Church.

Hunsberger, and Dwight Speigle, his only full time employee, are busy with a dairy herd of some 130 Holsteins, including dry cows. Crops of corn, barley and alfalfa are raised, filling three silos that are staggered in size.

Two Harvestores flank the older concrete silo and hold haylage, high moisture corn and other grasses, much of what is raised on rented acreage. The farm itself has some 114 acres so Hunsberger rents another 340. He also has cows at two locations, some six miles apart, he said.

In the barn whirring fans ensure a comfortably cool environment for the cows, which Hunsberger says are allowed outside for exercise an hour each day.

He says his theory is if the cows are fed right in the barn there's no need to pasture them. And he's a die-hard believer in that theory. Right now the rolling herd average is around 22,415, he said.

Hunsberger listens as Speigle talks about a new problem in a day of many. "I'm gonna' take an early retirement," Speigle says in mock seriousness.

A past president of both the Somerset Co. Farmers' Asso. as well as the DHIA, Hunsberger has no wish to hold high office in the organizations to which he belongs.

"I stay clear of those now," he says, "there's a lot of calling around and I get tired of it."

He's also a member of Johnstown Christian's school board, a church youth leader and in the county Holstein Asso.

The Hunsberger family together on the lawn. From left, Butch, Matt, Nick (back), Bill, Reuben, Lydia, Olivia, and Jeannette (back).

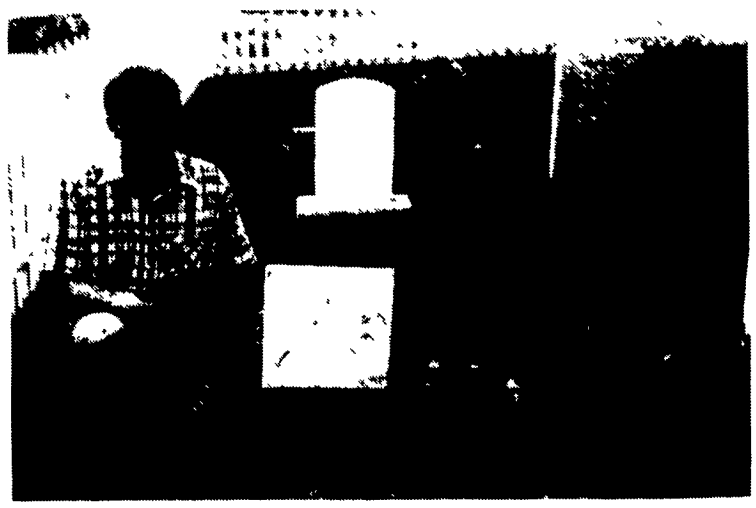
The Bill Hunsberger farm buildings.

The history of his farm is precious to Hunsberger. It's something he intends to preserve. For that the Johns survivors can be glad, as can the historians of Somerset and Cambria Counties.

Although she works parttime in a doctor's office, Jeannette, a licensed practical nurse, is always transporting some member of her very active group to an event.

The kids were delighted when Speigle and wife, Lori, gave them a soccer net for their Christmas gift. Now they hold sibling competitions in their own yard.

Hunsberger's farm is a mile from Route 403 in Davidsville, south of Johnstown but north of Somerset, off Route 219. Leave four-lane 219 at the Davidsville-Hollsopple exit, on Route 403. Turn at Davidsville's only traffic light according to Day at the Farm signs.



The burial site of Joseph Johns I, the founder of Johnstown, will be part of the visit to the Somerset County Day at the Hunsberger farm on June 19.

Chronic BVD 2 Threatens, It's Not Just BVD

VERNON ACHENBACH JR.
Lancaster Farming Staff

HARRISBURG (Dauphin Co.) — The state secretary of agriculture this week issued an advisory statement to beef cattle and dairy herd owners to have their animals vaccinated against a new, acute form of Bovine Viral Diarrhea (BVD) called "Type 2 BVD."

BVD is potentially deadly to bovines, but cannot be contracted by humans or other species of farm and domestic animals. However, deer and elk are susceptible.

Symptoms of infection can include fever, loss of appetite, depression, diarrhea, abortion, and in severe cases death. It has been reported to kill up to half an unprotected herd upon initial infection.

Although recommendations to vaccinate and increase farm biosecurity against BVD were made last week by the Field Investigation Unit (FIU) of the state Animal Diagnostic Laboratory at Penn State, there is additional information in Wolff's statement.

The Penn State FIU is part of a new statewide animal disease diagnostic program that was designed to pick up slack in preventative and emergency animal disease diagnosis and control. In its report last week, no mention was made of a potentially deadlier form of BVD.

Also last week, because the disease has been found in counties in the northwestern part of the state, the Pennsylvania Holstein Association canceled its annual Western Junior Judging School to minimize chances for exposure to the disease.

(Its Eastern Junior Judging School, scheduled for June 29-30, as of presstime was still planned. For more information, call the PHA at (814) 234-0364.)

In his advisory, Wolff said farmers should tighten biosecurity practices "because the disease has been confirmed in herds in northwestern Pennsylvania and is suspected in animal illnesses at two farms in Lancaster County."

In the release, Wolff stated, "Testing has confirmed that animals were infected with acute BVD on farms in Crawford and Mercer counties.

"Considering normal large-scale movements of animals from sales and from farm-to-farm, it would be prudent for farmers in all counties to institute precautions against BVD. Many veterinarians advise vaccinating herds to prevent infection."

Herds in Erie, Crawford, Mercer and Lancaster counties are under investigation, according to Wolff.

According to the release, "While a mild form of BVD is commonly found in many herds in the United States, recent investigations suggest cattle herds are being exposed to a more acute form of the disease.

"Cattle owners should minimize contact with other herds and consult veterinary practitioners for advise regarding protective measures. Persons having contact with cattle exhibiting signs of, or known to have been exposed to, BVD should avoid contact with other herds and should change clothing and footwear before leaving affected farms.

"Otherwise people who might deliver farm foods or supplies also should minimize their travel between herds and employ biosecurity precautions that would help stop spread of the disease," according to the news release.

Ag-Tech Day Demonstrates Cropping Techniques

DAVID R. HIEBERT
Westmoreland Co.
Correspondent

NORVELT, Westmoreland Co. — How will products and techniques work under real conditions? Recently Penn State Extension and the Westmoreland County Soil Conservation hosted afternoon and evening sessions to discuss the process and products used in the test plots next to the Westmoreland County Fairgrounds. Ag Technology Days was an opportunity for farmers to interact directly with several experts right on the field.

According to Don Fretts, Scottdale, who introduced the agenda for the day, this was a chance for all — even successful farmers — to pick up some pointers and see some new, helpful farming techniques. He registered about 25 different farms represented by 40-45 individuals at the two sessions.

The experts who interacted with the modest afternoon crowd of about 20 included academians and product representatives. Demonstration and information booths for services included production credit and a service for feed value analysis.

Bill Curran, Penn State, began the afternoon session by asking participants to identify 10 common plant specimens gathered from the area. Curran used the samples to talk about weed control methods. He noted that annual weeds can usually be controlled best by spraying in the spring when the plant is small. Perennials — which regenerate from a part of the previous year's growth — usually require a different strategy. Quackgrass should be 7-10 inches high to provide enough foliage for absorbing the herbicide. When the above ground growth is smaller, the roots may survive and continue to grow.

Out on the plots, Curran introduced ways to reduce the amount of herbicide needed for weed control. The suggestions included using a combination of pre- and postemergence treatments, combinations of herbicides and timing.

The corn expert, Greg Roth, Penn State agronomy, helped participants evaluate early season corn development in the test plot. He offered some specific mathematical tables to help evaluate the variations in the corn stand. Herbicide residue, weather, and equipment adjustment can all cause variations, a problem when uniformity suits mechanized farming the best. General perimeters for planting call for corn to go between 1½ " to 3½ " deep.

Under wet, early conditions, the planter should be adjusted toward the shallow end of that continuum, and toward the deeper end under later, dry conditions. Roth pointed out that more variation is acceptable if the corn will be cut for silage. Late sprouting corn is about as bad as a weed if the crop is to be harvested as shelled corn.

Roth's handout included a diagram for determining the stage of early corn growth, and mathematical steps to help the farmer answer that most difficult question: "Should I replant?" Part of the evaluation included the farmer's own assessment of the soil: Good soil could support more plants than poor soil. Roth suggested that a corn field should have between 20,000 and 25,000 plants per acre at harvest for optimum yield.

In the discussion about perennial weed control strategies, crop rotation was suggested as one way to reduce the spread of perennials such as thistles and milkweed. But tillage might spread morning glory. Bill Curran specifically suggested using Banvel, Roundup, and/or 2-4-D in the fall as a way to control late growing perennials.

In two larger plots, pest control and replanting forage are being demonstrated. Kurt Kinderwater, agronomist, and Glenn Kerr, field scout, both employed by Brubakers Agronomic Consulting Service, discussed pest control. Kinderwater suggested that farmers get and learn to use the sweeping net if they are serious about integrated pest management (IPM). In the short, dry, second cutting alfalfa stand, Kurt found three leafhoppers on ten sweeps with the net. He said that the threshold for an economic benefit from control in this plot would be when 3-5 hoppers are found. Before a decision to apply insecticide is made, the owner should also evaluate how many beneficial insects may be killed.

Kerr showed a cut worm he found on a field inspection. He noted the signs a farmer should look out for, and recounted horror stories of entire fields being decimated — sometimes before the farmer even knows it's happening.

In a plot on the hill top, two companies had provided seed to demonstrate alfalfa planting. Ron Dodds, of the SeedWay company, noted that the Pea-Cal seed mixture contains Canadian field peas and triticale. This combination should grow quickly after planting, shading the ground for weed control without hindering the alfalfa. Harvesting the triticale — a cross between wheat and rye — is ticklish. Peak feed value is retained for only about 72 hours. The test plot also showed the effects of low rainfall: only 1 inch of rain had fallen since planting May 1. Growth which should have been 8-10 inches high was only 3-4 inches high. In spite of the poor conditions for the Pea-Cal, the alfalfa stand looked good.

Future Ag-Tec days are planned for the same location on August 4 and September 15. The plots are open for anyone to see. Contact the Westmoreland/Penn State extension office, P.O. Box 250, Greensburgh, PA 15601 for copies of the test plot procedures.

In a basic introductory activity for the Ag-Tec day at the Westmoreland County Fairgrounds Farm, Dr. Bill Curran far right, asked participants to identify 10 different problem weeds from the area. Perennials and annuals, he noted, require different control techniques. And some annual species may have look-a-like perennial cousins growing in the same field (CF29). Photo by David Hiebert.

Maryland Ice Cream To Saudi Arabia

ANNAPOLIS, Md. — A cool flavor of Maryland — 23,520 pints of Baltimore ice cream — left the Port of Baltimore after Memorial Day for Saudi Arabia, according to Maryland Secretary of Agriculture Lewis R. Riley.

"The shipment, complete with two ice cream dipping parlors and related paper goods, were sold by Lee's Ice Cream of Baltimore to a firm in Saudi Arabia. It is scheduled to arrive June 13," Riley said.

"This is the first shipment of many we expect to make," said Lee's Ice Cream president Scott Garfield.

"We developed the contact for the deal at a trade show booth arranged for us by the Maryland Department of Agriculture's International Marketing Section," Garfield said.

"This shipment of ice cream is an example of the increased presence of Maryland food products in the international marketplace. We are continuing to make outstanding progress in finding foreign buyers for our products," Riley said.

For more information on the Maryland Department of Agriculture's International Marketing Program, contact the Maryland Department of Agriculture, Marketing Services, 50 Harry S. Truman Parkway, Annapolis, MD 21401, (410) 841-5770.

Waybright Retires From National Dairy Board Service

ARLINGTON, Va. — Dairy farmer Horace H. Waybright, of Gettysburg, retired from service on the National Dairy Board recently after completing the maximum of two consecutive three-year terms.

Waybright over the past six years served on the NDB's Public Relations, Program Evaluation, and Finance and Audit committees.

In recognition of his efforts to improve the market positioning of milk, he was presented with a certificate of appreciation from U.S. Secretary of Agriculture Mike Espy. The certificate was presented to him by Patricia Jensen, acting assistant secretary for USDA's Marketing and Inspection Services during a reception held at the Hart Senate Building in Washington, D.C.

Waybright directed the NDB's promotion, research and communications activities which are funded by dairy producer assessments of 15 cents per hundred pounds (cwt) of milk, with 5 cents per cwt automatically going to the national program.

Individual dairy producers can direct the rest of the assessment to a local program or to the national program.

From the left, Patricia Jensen, acting assistant secretary of USDA's Marketing and Inspection Services, presents a certificate of appreciation to Horace Waybright, for his years of service on the National Dairy Board.

Three Farms To Host Visitation Day

FOREST HILL, Md. — Sunday, June 26 is the date for the annual Harford County "Farm Visitation Day." This event gives the urban and suburban communities a chance to see first hand how the agricultural community works. The event is scheduled to begin at 1:00 pm and last until 5:00 pm.

This year there are three "Welcome Farms" for the Sunday event — My-Lady's-Manor Farm at Black Horse, Pond View Farm at White Hall and Merry-Lar Farm at Forest Hill.

My-Lady's-Manor Farm is owned and operated by the Ross E. Smith family of Monkton located on Old York Road. This 220 dairy utilizes one of the most up-to-date techniques in milking systems and milking machinery. A purebred Holstein operation, the My-Lady's-Manor Farm uses artificial insemination for herd breeding. Replacement calves are also raising for the milking string. The entire operation involves corn, alfafa, soybeans and cereal grains.

The second "Welcome Farm" is Pond View Farm owned and operated by Rayston and Rickey Smithson. This purebred and commercial beef operation is maintained on approximately 70 acres of farmland. In addition to the beef cattle located on the farm are 4-H sheep and swine project animals. Field production of alfalfa, corn and oats are the major crops produced on the farm.

The third "Welcome Farm" is Merry-Lar dairy farm owned and operated by James, Merryman and Larry Johnson. This dairy farm is located on 130 acres in the Forest Hill section of Harford County and is composed of a milking string of 75 Holstein cows. Also located on the farm are 80 heifers of various age groups.

The Harford County Farm Visitation Day "Welcome Farm" is designed as an educational and fun event for the whole family. All three farms are different, operate at differing production goals and are within a maximum of half hour driving distance of each other. A tour of all three is recommended. Along with the host "Welcome Farm Families" the Harford County Farm Bureau and the Harford County Cooperative Extension Service will be sponsoring the event.

To aid in farm visitation identification, there will be "Welcome Farm" signs posted along the roads leading to the farm sites. For more information on Farm Visitation Day and the farms involved, contact the Harford County Extension Service at 638-3255. The host families look forward to your visit; so come and enjoy the afternoon.

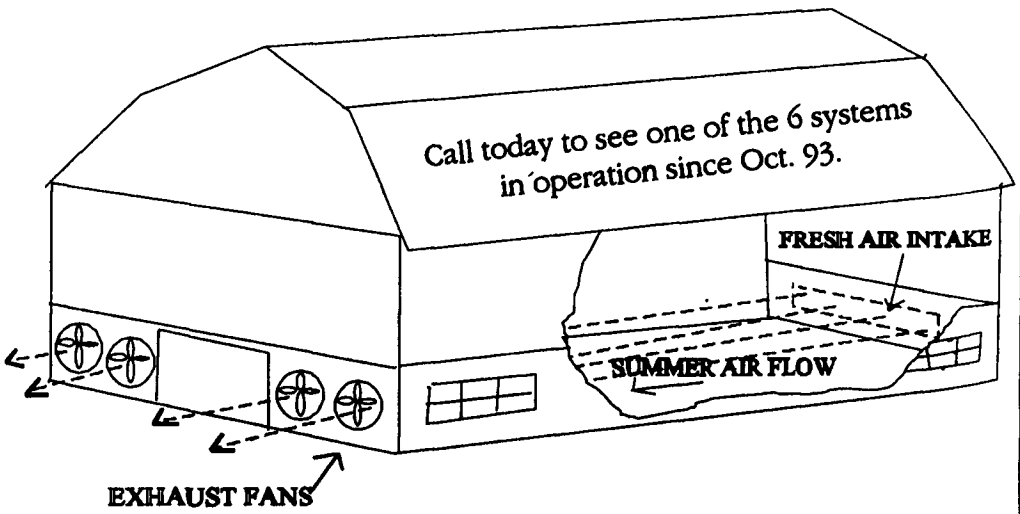
VENTILATION

1st Very Common Question: How should I ventilate my Barn?
A very good and simple answer: A Tunnel Ventilation System

2nd Very Common Question: What is a Tunnel Ventilation System?
Answer: A ventilation system that gives you even air flow throughout your entire building(approx. 2-5 MPH wind).

Advantages:

- no circulating fans
- summer and winter ventilation
- controls fly problems
- more comfort for your cows
- more comfort for you, the farmer
- more comfort - more milk



Call today for an appointment to draw up plans for your barn.

Lancaster Dairy Tour Visits Farms With Harvestore Structures

The Harvestore dairy group on tour in Lancaster County sees a demonstration of the new forage unloader. The scene was photographed at Glenn Good's new dairy facility with the three newly erected structures (one in progress) in the background.

LANCASTER (Lancaster Co.)—On a hot day, Thursday, 100 or more farmers were on tour of four good Lancaster County dairy farms to see how they used their Harvestore structures. The tour was sponsored by Penn Jersey Products, Inc., New Holland.

The first stop was in Paradise, at Neffdale Farm, where Roy, with sons Rick, Ken, and Charles Neff milk 85 Holsteins that produce 21,500m 698p 779f. Their Slurrystore system with a ram pump was installed in 1982. They use chopped newspaper for bedding and use no commercial fertilizer on corn ground where slurry is applied. They feed high moisture corn and alfalfa haylage in a TMR mix from their 20' x 42' and 25' x 60' Harvestore structures.

Over lunch the farmers on the tour visited Glenn Good's family farm located southwest of Strasburg where they are erecting a new dairy barn and three Harvestore structures. The workmen were building the one structure. In addition, the new bottom unloader that lubricates the chains with vegetable oil was demonstrated by Penn Jersey officials.

In the afternoon, two farms were visited: Singing Maple Farm, owned by Dale and Ruth Ann Stoner, Lancaster, and Landis View Dairy, owned by David and Lois Landis, Lancaster.

At Singing Maple, they have 68 Holsteins that milk 20,400m 658p 765f. Three Harvestore structures on this farm date back to 1970 when the original 20' x 30' was built for high moisture corn. Last year this structure was extended to become a 20' x 50'. In 1971 the 20' x 60' was built to process 50 acres of rye, rained-on haylage, and cornlage. The other 20' x 80' erected in 1993 is used for haylage. The belt feeder installed in 1974 is still feeding cows after 20 years of service.

At Landis View, Dave has been farming with Harvestores since 1970 when he built a 20' x 60' for haylage and a 20' x 30' for high moisture corn. This structure was increased to 60' last year. Another 20' x 60' was erected in 1989 for ryelage and haylage. They milk 100 cows in a double-four parlor, and they recently installed cow mattresses in their free-stall barn.

Star shaped core optimizes RFV.

With the new 4800 Series Round Balers, you'll be baling hay earlier.

You'll put more high-protein leaves in the bale for higher relative feed value (RFV). And, the star-shaped core allows the bale to breath, optimizing RFV at feeding time, too.

Best of all, the new 4800 Round Balers are easy to use.

Select the best size for your operation: 700, 900, or 2000 pounds. Then ask to see one at your White-New Idea dealer or call 1 800 767-3221.

Dairy Family Tree Stems From the Hessians

(Continued from Page A1)

Jim and Mary Laughlin farm 300 acres in partnership with their son Joe and his wife Beth. They often have "help" from Joe and Beth's three children, Charlie, 8, David, 6, and Katie, 3. Jim's father, Glenn keeps an eye on things from his garden tractor. His wife Elizabeth keeps the cupboards well stocked for great-grandchildren visits. With 300 acres, the Laughlin families raise everything they need, including their own replacement stock, for their 43 registered milking cow herd, except protein supplement.

"We're a rare situation in this area," said Joe. "We have an excess of most things and sell some corn and hay."

The Laughlins rent fifty of the 300 acres from what they call the ridge farm, a Century farm owned by Joe's grandmother's side of the family (Glenn's wife, formerly Elizabeth Brought). It's just a mile from Jim and Mary's "home" farm, Beech Run, where the dairy cows are kept. The Brought family bought the ridge farm in 1878, and Jim remembers the story of how his grandfather Brought met his future wife — retailing milk door to door.

Jim's grandfather, John C. Laughlin, started "dipping" milk (retailing milk from milk cans before bottles) to his customers around the 1900s. He bought Beech Run in 1921. Glenn, his son, remembers starting to retail milk from a car and purchasing their first truck in 1924. Their retailing of Guernsey milk helped satisfy the demand for quality heavy cream back then, and helped the Laughlins through the Depression. With labor one dollar a day per person, the Glenn Laughlin family hired workers to build two houses and an addition onto the barn during the Depression. Joe and his family live on a neighboring farm, bought in 1984.

Jim remembers continuing their milk route through the early '50s, being one of the last farmers to stop delivering milk door to door. "I delivered milk with an uncle and cousin before going to school," Jim said. Jim has farmed ever since high school except for two years in the Army.

But in July 1965, the barn on Beech Run caught fire. Jim and Mary had the family's bags packed for the World's Fair when a neighbor pounded on their door to tell them of the fire. With the fire confined to the top part of the barn, they were able to get the calves out of the lower part. The fire claimed a wagon shed but not the silo and milkhouse (except for the roof). The Laughlins decided to build a dome shaped stanchion barn on the same site to connect the silo at one end and the milkhouse at the other end. In the meantime, they milked in the pipeline-less chicken house and hauled the milk up to put in the tank. They were back milking in the new barn by November.

Of Jim and Mary's three children, Joe, Steve, and Mary Beth, Joe chose to stay in farming. Jim is thankful for Joe's interest in farming, but wouldn't want to give advice on how children decide whether to stay or not. "It must just happen. It would be difficult to farm without someone who was really interested in it. Joe's always been interested in the cows."

Mary agrees. "It's only one's guess. We have a nine-year-old grandson in Martinsburg who is saving money for his first tractor!"

Family farming ranks number one in the Laughlin family, but community service carries a close second.

Glenn, a member of the Fort Granville Grange for 57 years, received his 50-year pin in 1987. He also served on the ASC County Committee for a number of years.

Jim served on the Agway Committee and was active in senior extension. He has served as Grange treasurer for 10 years and Mary serves as secretary. The Fort Granville Grange boasts 372 members.

Joe and Beth's service to their community through leadership reached a new height this past March when they placed second in the state Atlantic Dairy Cooperative's Pennmarva Young Cooperator Contest at the Willow Valley Resort and Conference Center in Lancaster. Winners of the contest were recognized for their dairy proficiency and community leadership.

"I think it's important for people to be active in the community. It makes for a social outlet," Joe said. And, he's quick to point out that he and his wife's impressive leadership resume for the Atlantic contest covers a span of 10 years or more.

For Joe, their resume includes Mifflin County Conservation District's 1992 Cooperator of the Year Award with his father, president of the local Atlantic co-op for three or more years, secretary of Atlantic's District 18, past president of the Mifflin County Farmers' Association, vice president and secretary-treasurer of the Mifflin County Holstein Club, past member of the PFA Young Farmer & Rancher Committee, and current member of PFB's Advisory Council Committee. Joe currently serves on Agway's Geographic Committee and spent six years on their Petroleum committee. He served one year on the Mifflin County Extension Association Board, as well as six years on the local Sire Power Advisory Board, one year as president and another as junior director.

Joe and Beth attended the Young Farmer and Rancher leadership conference as Mifflin County representatives and attended Agway's annual meeting eight years ago. Joe serves on the Granville Township Ag Security Area board and the Mifflin County Agland Preservation Board.

Beth led the state PFB Young Farmer and Rancher Committee as chairperson for three years and is currently chairperson for the PFB state Advisory Council committee. A 4-H leader, Beth serves on the Mifflin County Youth Fair Committee and coordinates the open craft show at the Mifflin County Youth Fair. Beth helps plan farm/city activities as a member of the county committee, and is a member of the Mifflin County Garden Club.

All of the Laughlins are active members of the Ellen Chapel United Methodist Church.

Although they didn't know each other at the time, both Joe and Beth graduated from Penn State. "At one time I thought Dad and my grandfather did a lot of things I might have questioned (on the farm). But I learned that they were doing a lot of things I saw at Penn State. We've always read a lot and attended meetings to keep up-to-date," Joe said.

Joe has no immediate plans for the herd but would like to see a new heifer barn in the future, and to make things generally more efficient. The families have helped each other out with both work and leisure. Jim and Mary's resume of trips abroad include tours of the British Isles, Germany, Austria, Scotland, Iceland, and Greenland. But Jim puts their traveling in perspective.

"We generally stay at home and attend plays and concerts. But every once in a while we really take off. Two weeks is long enough. We can go months without missing a milking. Sometimes there's plenty of reasons to go, but we're always glad to get back."

"I'm appreciative of the opportunities Mom and Dad have given me," Joe says. "I've never had a bad relationship with my parents. That's not the way we do it."

Joe, Beth, and Katie (age 3) Laughlin stand before what will soon be a blooming flower garden and Beth's favorite hobby. Joe farms 300 acres with his father, Jim Laughlin. Katie's two brothers were at school.

Riding out to keep an eye on things, Glenn Laughlin joins his son Jim and wife Mary, right, and grandson Joe and wife Beth, left, and great-granddaughter Katie.

What Gail Strock enjoys most about writing for *Lancaster Farming* is bringing into print the people and news events of Mifflin County. For 4½ years, she has met with area people to tell their stories - hobbies, crafts, and careers, ag conventions, dairy shows and sales.

Her other publishing credits include *Pennsylvania Magazine*, *Common Ground*, a tourism brochure for the Juniata/Mifflin Tourist Promotion Agency, a Harvestfest promotional guide, a Bridal Guide, and Spotlight and Dining guide articles for the *County Observer* newspaper.

She also conducted a "Dealing With the Media" workshop for Pennsylvania Farm Bureau at their Young Farmer and Rancher State Leadership Conference in Somerset.

Gail was graduated from Penn State in 1979 with a degree in agricultural economics and rural sociology. After college, she and her husband Dennis traveled throughout the United States and Canada with his job as a Sperry New Holland combine field test analyst.

They have two boys, Evan, 10, and Aaron, 6, and live on their 27-acre farm near Belleville.

On-Farm Composting Field Day Set

MANHEIM (Lancaster Co.) — A field day on composting manure will be held at the farm of Robert and Lois Keller on Monday, June 27 at 6:30 p.m.

The event will focus on compost utilization, the economics of composting, current status of nutrient management regulations, and a demonstration of compost production with a Sandberger turner.

Robert Keller began composting his poultry and beef manure two years ago. Composting enables him to clean out his poultry houses with 66,000 layers on a 7 - 10 day schedule and in this manner control flies and reduce ammonia levels.

Keller is also interested in composting as a means of increasing the marketability of manure. He began composting by using a skid loader to turn the compost piles. He recently purchased a Sandberger turner to produce a more consistent and higher quality compost. The turner will be demonstrated as part of the meeting.

A field trial to assess corn utilization of nitrogen and phosphorous from composted manure, raw manure, and chemical fertilizer treatments is being conducted by Penn State and the Rodale Institute on the Keller farm. The results of this trial, which was also conducted at three other farms in 1993, will be discussed by Dr. Doug Beegle, an agronomist at Penn State.

The economics of composting on the Keller's farm was also documented as part of this study. Preliminary results of what it *really* costs to produce compost will be presented by Cary Oshins, composting specialist from Rodale Institute.

Beegle, who serves as a consultant to the Nutrient Management Advisory Board, will also provide an update on the current status of the nutrient management regulations.

Keller's farm is located on Rt. 772, 2.5 miles west of Lititz and 1.5 miles east of Manheim.

For additional information about the field day, contact Leon Ressler, Lancaster Cooperative Extension (717) 394-6851, Cary Oshins (610) 683-1415, or Leon Weber (610) 683-1401 at the Rodale Institute.

THANKS, DAIRY FARMERS

Average Farm Feed Costs For Handy Reference

To help farmers across the state to have handy reference of commodity input costs in their feeding operations for DHIA record sheets or to develop livestock feed cost data, here's this week's average costs of various ingredients as compiled from regional reports across the state of Pennsylvania. Remember these are averages so you will need to adjust your figures up or down according to your location and the quality of your crop.

Corn, No. 2y - 3.06 bu. 5.47 cwt.
Wheat, No. 2 - 3.35 bu. 5.60 cwt.
Barley, No. 3 - 2.23 bu. 4.76 cwt.
Oats, No. 2 - 1.65 bu. 5.13 cwt.
Soybeans, No. 1 - 6.77 bu. 11.30 cwt.
Ear Corn 83.34 ton 4.17 cwt.
Alfalfa Hay - 98.00 ton 4.9 cwt.
Mixed Hay - 102.25 ton 5.11 cwt.
Timothy Hay - 105.50 ton 5.28 cwt.

Noss Is Vice Chairman

(Continued from Page A1)

running mountains, really ridges, on the southeastern edge of the Appalachian Mountains.

They make a northwestern half-circle and outer border to the relatively flat, wide fertile farming area of south central and southeastern Pennsylvania.

It's kind of like a "Great Wall of China" that protects the thousands of acres of farmland from severe weather storms coming up the Ohio Valley. As a geological feature, it has many protective and beneficial attributes.

The Tuscarora is also unique in that the long mountain ridge serves as the natural and political boundary for five counties.

The Noss farm is one of many in the four- to five-mile wide farming valley that is formed between the Tuscarora mountain and the similarly stretchy Shade Mountain to the north.

In the valley that Noss lives, the community is rural and seemingly slow paced, compared to the congested traffic and residential development that has overcome the state's southeastern farmland. And it is quiet.

Noss said traffic has picked up, as everywhere, over the years. The highway has become more dangerous and requires more concern when moving farm equipment from storage to field.

But many things have changed over the years.

Including Noss.

Raised on his father's dairy farm, Noss went to college at Penn State and then sold farm machinery for seven years.

Then, in 1978, when David's father wanted to retire from a partnership with David's brother Larry, David bought his father's share of the operation.

The brothers milk out of a 51-tie stall bank barn at the home farm site and keep heifers and dry cows at Larry's place nearby.

David also sells Pioneer seed corn, and Larry also has his own sideline raising breeding stock chickens to produce hatching eggs.

In addition, there is also some custom field work that gets done to help pay bills.

Dave's wife Sharon works as a manager at the Lewistown branch of the Kishacoquillas Bank. They have a daughter Karen, who is a sophmore at Penn State University, and a son Ryan, a senior at Juniata High School.

And while he has plenty of work on the farm to keep himself occupied, Noss has been active in dairy promotions for years at all levels.

He is currently serving as vice chairman of the National Dairy Board, and he is also a member of the newly created Dairy Management Inc. — a combined overseeing board formed by a recently approved merger of staff and effort between United Dairy Industry Association (UDIA) and the National Dairy Board.

Although the joint effort, which is short of an official merger, has had several questions raised about its appropriateness (by the California Milk Advisory Board, and from some of the same people who have been calling for the demise of the National Dairy Board), the joint venture is official and legal and otherwise widely supported.

For the smaller member promotion organizations, the joint venture promises access to high cost milk marketing tools that were never available before. (See related story, "Promotion Groups Join Forces")

In a way, dairy promotion organizations are like the the chain of mountains to which the Tuscarora Mountain belongs — they are series of intertwining ridges.

In this analgoy, the Dairy Management Inc. represents the larger geological formation comprised of ridges of smaller, independent

Qualifying Judging School Set For July 13

STATE COLLEGE (Centre Co.) — Those who would like to qualify as a Pennsylvania Purebred Dairy Cattle Association-approved dairy cattle judge should attend the organization's annual judging school, set for July 13 in Juniata and Mifflin counties.

Those wishing to participate should complete an application form and send it to the PDCA, in State College, by July 5.

The school official is to be James Burdette, a Holstein breeder and dairyman in Mercersburg.

Participants are to have an opportunity to judge Holstein and Ayrshire cattle during the school. The exact locations of the judging school sites have not been released.

Those who place well at the judging school have a chance to have their names placed on the official PDCA Approved Judges list, which is sent to county extension offices and is available for local fair boards for use in locating qualified judges.

The school is not limited to Pennsylvania residents. Residents of Maryland, New Jersey, Delaware and New York are also invited to attend the one-day school, and can also qualify for inclusion on the list of approved judges.

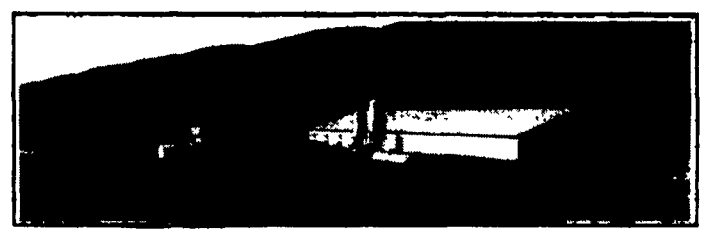
The cost of the school is $22, and that covers the cost of the school and lunch.

Checks should be made out to the Pa. PDCA. Mail forms to Ken Raney, PDCA secretary, 839 Benner Pike, State College, Pa., 16801.

For more information, call (814) 234-0364.

TRI COUNTY
SALES SERVICE QUALITY INSTALLATION
Confinement Systems, Inc.
SWINE CONFINEMENT
EQUIPMENT and FACILITIES LEADER

PIG SAVER "DUTCH CRATE"
Developed through testing in our research farms the goal was to develop a crate that nearly eliminates crushing, due to lay ons, unmatched durability and be easy to work around. All this has been achieved by a unique gravity fliprail that forces sows to lie down slowly and using stainless steel for rear doors and legs, proven horizontal and solid steel rod construction. All this at a reasonable cost. Crate also can be installed on an angle.



300 Sow Farrow - Feeder Pig Unit

CONFINEMENT STALLS
Developed in our R&D farm. Our goals were convenience, safety and durability. The low back and flat top rails are easy to reach over with no sharp edges. Stainless steel rear legs and front feet along with solid steel horizontal rods through punched uprights provide the strongest, most durable stall ever produced by Tri-County (21"-24" O.C. x86")

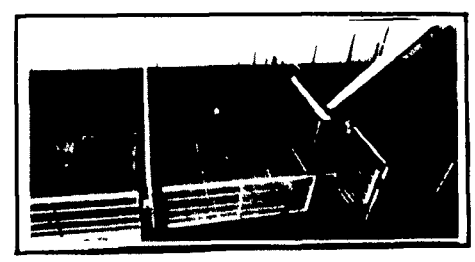
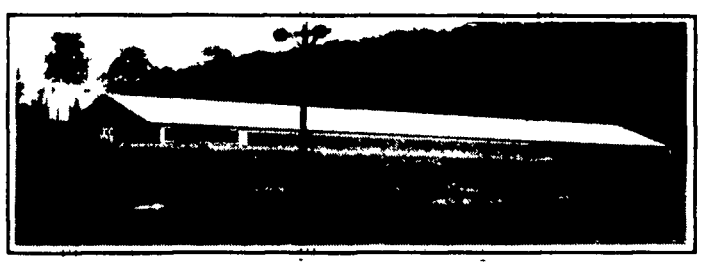
(Pull Plug, Preferated Ceiling Ventilated)

NURSERY PENNING
Nursery penning has been improved by the use of an optional solid stainless steel panel on the front gates which keeps walkways clean. Stainless steel feet on penning eliminate corrosion where penning attaches to the floor. Stainless steel drinker pipes & mounting brackets also increase durability.





2000 Head Finisher (2 Rooms)
(Deep Pit, Tunnel Ventilated)

FINISHING PENNING
Standard stainless steel feet and fasteners offer improved durability over other similar types of penning. Loop and flapper latch arrangement eliminates the use of drop pins. Stainless steel fence line feeders provide excellent durability and a minimum of waste.

Corn Club Contest

STATE COLLEGE (Centre Co.) — Pennsylvania corn producers have the opportunity to participate this year in the Pennsylvania Five Acre Corn Club.

The Corn Club is sponsored by Penn State and the Master Corn Growers Association. The club gives producers an opportunity to compare production practices, yields, and production costs with other corn growers.

If you grow corn and are interested in improving your system, the corn club is for you. To enroll in the club, contact your local extension office for the necessary forms and regulations.

To enroll, you must be 18 or older and have a production field that is five acres or more or strips in the same variety totaling five acres or more. You must also have had a soil test in the last five years.

There are four grain classes: 1. Shelled corn harvest; 2. Ear corn harvest; 3. Shelled corn-3 acre harvest sample; and 4. Ear corn-machine harvest sample.

For the 3 acre sample, the yield check must be at least three acres and include round trips through the whole field.

Club members will receive a complete report of yields and production practices for all members enrolled statewide plus a detailed report of the actual costs.

SRBC Public Hearings To Begin

VERNON ACHENBACH JR.
Lancaster Farming Staff

HARRISBURG (Dauphin Co.) — The first two of eight public hearings to be held by the Susquehanna River Basin Commission (SRBC) to gather public comment on its proposed revision of rules and regulations concerning the drawing of basin water are to be held Thursday, June 23 at the Fred L. Waterman Conservation Education Center, in Apalachin, N.Y.

As reported in the May 21 issue of *Lancaster Farming*, the SRBC has proposed almost a complete revision of its regulations covering procedures for its review of projects.

However, two additional public hearings, to be held in Maryland, have been added to the six previously reported, and dates have changed slightly.

According to Richard Cairo, SRBC general counsel and secretary, the revision of rules was seen as necessary because existing regulations and rules had been created piecemeal.

The SRBC staff, working with an agricultural adivsory committee for about a year, has proposed bringing together several separately created regulations and addressing some other areas of concern that had not been previously addressed.

The proposed rules would condense and bring consistency to the entire package, according to Cairo.

Among the areas not previously addressed in rules is a proposal of user "compensation" for those who would take significant amounts of water from the Susquehanna River Basin during drought in a "consuming" manner, .

To "consume" water is to use it in a manner which makes it no longer available to the flow of the basin. Three-Mile Island Nuclear Power Plant's evaporation tower is a well-known example of consuming water.

Using water in its liquid form and converting it to a gaseous form is a basic consumption of water.

Freezing water and selling it as ice outside of the basin, or hauling or pumping water out of the basin can also technically be considered to be consumptive uses because that water is no longer available to maintain basin flows.

Those who consume water, above a certain amount, would be required to make some form of water compensation. The compensation could be in a number of forms, but also could be in the form of money.

In lieu of adopting a practice or creating an alternative source of water (a pond, lake, etc.) to consume during drought, a water-consumer could pay a compensation rate of 14 cents per 1,000 gallons consumed on a year-round basis.

The proposal was published in its entirety in the June 8 issue of the Federal Register, the federal government's notification publication.

Copies of the proposal can also be obtained upon request from the SRBC. Write to the SRBC at 1721 N. Front St., Harrisburg, Pa., 17102, or call (717) 238-0423.

For those who are unable to attend any of the eight hearings, written comments on the proposal will be accepted by the commission until August 1, 1994.

To present written comments, all the commission requests are legible, concise and constructive comments, along with the name, address and phone number, if applicable, of the person or group commenting.

Send comments to: Richard Cairo, General Counsel/ Secretary, Susquehanna River Basin Commission, 1721 N. Front St., Harrisburg, Pa. 17102-2391.

The scheduled hearings are:

- June 23, 1:30 p.m., at the Fred L. Waterman Conservation Education Center, Hilton Road, Apalachin, N.Y.
- June 23, 7 p.m., same place.
- June 24, 1 p.m., at the Days Inn, along River Avenue, in Williamsport. It's located at the exit from Rt. 180.
- June 28, 10 a.m., in the auditorium of the Pennsylvania Game Commission Headquarters Building, 2001 Elmerton Ave., Harrisburg. It is located within several miles of the state Farm Show Complex, in Harrisburg.
- June 28, 7 p.m., at the SRBC Headquarters Building, 1721 N. Front St., Harrisburg.
- July 6, 1:30 p.m., at the Perryville High School Auditorium, located at 1696 Perryville Rd., Perryville, Md.
- July 6, 7 p.m., same place.

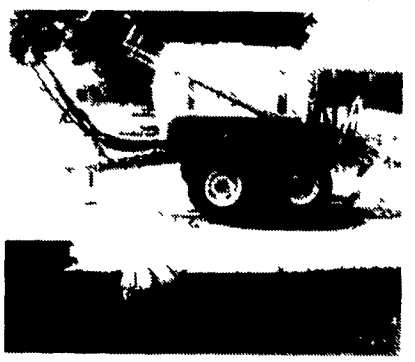
Your Complete Headquarters For Sprayers And Parts

HEAVY DUTY SPRAYERS BUILT STRONG TO PERFORM TOUGH



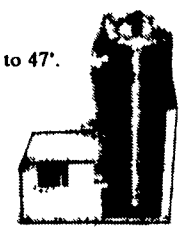
- 200, 300 & 500 Gal. Trailer Models
- 110, 150, 200 & 300 Gal. 3 Pt. Hitch Models

FEATURES AVAILABLE:
- 30', 35' and 40' Booms
- 30' & 45' All Hydraulic Folding Boom
- Quick Teejet No Drip Nozzles
- Independent Boom Suspension Eliminates All Boom Bouncing.

At Last! A Reliable, New Stainless Steel
AG-CHEM FOAM MARKER
Reg. $925.00 SPECIAL **$830.00**

Each Foam Marker Contains:
- Mixing chamber for each boom.
- Drop hoses for each boom.
- Electric harness for in-cab controls (on-off/left-right).
- Hose for boom lengths up to 47'.

The Ag-Chem foam marker offers you efficient operation with a 12 volt compressor that draws only 9 amps Independent left and right boom markers can be controlled from the cab for on-the-go operation That lets you operate either boom marker for precise, economical foam placement And best of all the Ag-Chem Foam Marker produces a dense foam within seconds of agitation, and has a dependable output that can be adjusted for volume
Use with the new 80-to-1™ high concentrate foam



TERRA-TRONICS I
Electronic Monitor Measures Working Acres And Ground Speed

- Easy to see digital readout
- Easy-to operate touch sensitive keys
- Operates with any field implement requiring acre measurement - pulled, mounted, or self propelled sprayers combines etc

Poly Square Means Healthier Calves

All-Season

Big Foot 5'x7'6"

The Poly Square Big Foot is constructed of Opaque material to eliminate the solar effect. It blocks out sunheat-not sunlight. Poly Square's inverted ribs and 5'(W)x7'6"(L) make it the biggest unit on the market today and extremely wind resistant. It has no pop rivets which means no breaks or cracks for snow and rain to sift In. The unit weighs 100 pounds plus manger & buckets. And Poly Square Big Foot is large enough so your calf can lay in the center, away from cold walls in the winter. Use Poly Square with our side feed station and bottle holder which is perfect for use with a fence in a more traditional setting.
New Side Hay Feeder — Made especially for Poly Square Big Foot, no other unit has this feature. Also has a center roof vent for better air movement.
Also Available: Poly Domes, Silo Chute Hoppers, Silo Chute Liners

Pa. Ayrshire Association Announces Events

WAMPUM (Lawrence Co.) — The Pennsylvania Ayrshire Association Field Day is scheduled for Saturday, July 16, at the Alvin String Farm, in New Jersey, but is just one event scheduled by the association for the year.

According to Nichol Bozlinski, association field coordinator, the field day is to feature forage seminars, a demonstration on "ag bag" wrapping, judging contests, and family oriented activities.

Bozlinski said members may want to extend the one-day event into a weekend, being within an hour proximity of Atlantic City and with the Cow Town Rodeo also scheduled for Saturday.

Further details are to be announced closer to the event.

In addition, Bozlinski announced a Plum Bottom Accomplishment/Sharing Sale to be held in August. The Ayrshire herd is owned by the John Rodgers family and for more information call Bozlinski at (412) 658-0655, or Rodgers at (717) 935-5242.

Membership Dues

Bozlinski also said it's time for membership renewal, and while many have already paid their dues for the year, she said that for those who didn't, the dues schedule is $5 per youth (consideration as a "youth" terminates on Dec. 31, the year of the member's 20th birthday), $15 per adult, $30 per family (husband, wife and children younger than 20), or $50 per farm.

In addition, there is a 25-cents-per-cow, according to DHIA count, charge for dues.

Membership is not restricted to Pennsylvania residents, with eligibility extended to residents of New Jersey and West Virginia.

Send dues to Earl Keefer, Box 188, Millersburg, Pa., 17061.

Junior Memberships

A junior membership to the national organization, the Ayrshire Breeders' Association, based in Brattleboro, Vt., of which Pa. Ayrshire Breeders' Association is an affiliate, is available to any youth who has recorded in his/her name with the association at least one registered Ayrshire, and with a $10 fee. For more information call (802) 254-7460.

Futurity

Nominations for the 1996 Pa. Ayrshire Futurity are being accepted until Oct. 1, 1994.

The futurity is a show of 2-year-old animals and those calves nominated this year are to be shown during the 1996 All American Dairy Show in Harrisburg.

During any year, those calves born between March 1 and August 1 are eligible for nomination to be shown as a 2-year-old during the association's annual futurity show.

Completed nominations are made by paying a total of four entry fees, with the last payment on Sept. 1, prior to the show.

The breeder of the calf must make the first nomination with a $3 entry fee, by Oct. 1. After the first payment, either the breeder or the new owner may make subsequent nominating payments in order to keep the animal eligible.

The second payment of $7 is due Sept. 1 of the following year. A third nomination fee of $10 is due by March 1 of the year of the show.

There are two parts to the futurity. The first is the show at the All-American, and the second is based on the 2-year-old, 305-day projected milk record, based on 3.5 percent protein-corrected milk.

A banner is to be given for the first place in both catagories.

A $100 first prize is to be given to the overall winner in combined show and milk performance. All participants will receive a monetary award for participating.

To enter a calf — as many as desired — make checks payable to the Pa. Ayrshire Breeders' Association and send them to Nichol Bozlinski, RD1 Box 1382, Wampum, Pa., 16157, or to Earl Keefer, Box 188, Millersburg, Pa. 17061.

Spring Sweepstakes

The association's Spring Sale Sweepstakes is used as a promotional tool and is designed to promote the cattle purchased at the Annual Spring Calf and Heifer Sale.

All animals are eligible as long as they have been sold through this sale uncalved.

All animals that have completed a first lactation record in the calendar year are eligible. The record is to be computed on the 305-day actual record with 3.5-percent protein-corrected milk. It is the calendar year that the record is made, that qualifies the cow for the sweepstakes (she must have completed the 305-day record by February).

Nomination is the responsibility of the owner/purchaser. The nomination should be sent to the secretary of the Pa. ABA before Dec. 31, the year the record is made.

DHIA, or DHIR records will be the only ones accepted. A copy of the record should be sent along for verification.

A 10 percent bonus is to be given to the animal if it has classified 80 points or higher during the same year the record is made.

Awards for the sweepstakes are $100 for first place; $60 for second; and $40 for third place. Nominations should be sent to Earl Keefer, secretary-treasurer.

Pa. Ayrshire Hires Field Coordinator

WAMPUM (Lawrence Co.) — The Pennsylvania Ayrshire Breeders' Association has recently employed a field coordinator, Nichol (pronounced nickle) Bozlinski, who lives on a dairy farm in Wampum, Lawrence County.

In an introductory news release, Bozlinski states, "I have recently been employed by the Pa. Ayrshire Association as field coordinator. My job is to promote Pa. Ayrshires by informing you, our supporters, about what is happening with the association and the latest news about sales and other Ayrshire happenings.

"I am looking foward to working with you and the Ayrshire association."

Bozlinski said she has been involved with Ayrshires for five years and has built up a herd of 10 milking cows and several young stock. The farm on which she lives has five of the six major breeds of dairy cattle.

"I believe that promotion is the key to success of the future. It is my hope that I get input from all of you about promotional ideas. I am here to help by advertising cattle sales both private, and public.

"I am very interested in your suggstions for promotion and also if you know of any items that you would like brought up ... give me a call."

Bozlinski can be reached at (412) 658-0655 or by writing to her at RD1 Box 1382, Wampum, Pa., 16157.

"I must warn you though, I do not have an answering machine. I would prefer that you talk to me and not a recording. The best time to call is before 10 a.m. or after 7 p.m.

"I look foward to hearing from you. Together we can have a great year promoting Ayrshires!"

Alfalfa Field Day Set

WARWICK, Md. — Alfalfa management is the topic for the Alfalfa Field Day on Wednesday, June 29, from 10 a.m.-noon here at the Hughy Salfner Farm.

Guest speakers will discuss and demonstrate ways to manage alfalfa for top production. They will review recommended methods for preparing the field for planting, no-till planting, optimal harvest of the established stand, and management techniques to help your alfalfa survive the winter.

Topics and guest speakers for the day include:

- "Planning Procedures For No-Till Alfalfa Establishments" by Hughy Salfner, Cecil County producer.
- "Setting Up The No-Till Drill" by Robby Fogwell and Ken Dudkewitz, equipment representatives for Cooper's John Deere Dealership, Cecilton.
- "Seedbed Preparation, Cutting Management, Seed Mixtures, And Yield Results" by Dr. Les Vough, extension forage crops specialist, University of Maryland Cooperative Extension Service.
- "Fertility/Weed Control And IPM Techniques" by Ted Haas, regional agronomy specialist, University of Maryland Cooperative Extension Service.

Lunch will be served at noon after the last presentation. Call (410) 996-5280 by Friday, June 24 to reserve lunch. Meal cost is $5.

The Salfner Farm is located at 400 Edgar Price Rd., off the intersections of Rt. 301 and Rt. 299.

MAHONING OUTDOOR FURNACES

"The Natural Way To Heat Your Home"

Burns Coal, Wood, Oil or Natural Gas

FUEL USED IN STANDARD UNIT: WOOD & COAL & WOOD BY-PRODUCTS (SAWDUST, PAPER, ETC.) FUEL USED IN MULTI-FUEL MODEL: SAME AS ABOVE INCLUDING OIL, PROPANE, NATURAL GAS

efficiency Rating 83% to 85% - Cut Emissions by 90%

3-Year Warranty Except Electrical Components (1 Year)

PROUDLY BUILT IN CLEARFIELD COUNTY, PENNSYLVANIA

100,000 - 500,000 BTU 24" - 60"

★ The only outdoor furnace made with a Catalytic Combuster. ★

Mahoning Catalytic Combuster Will Help In The Following Ways:

1. Burn one cord of wood which equals 166 gallons of oil
2. Your fuel source becomes enormous inexhaustible and poses few risks to public safety.
3. Over all efficiency of 85% which means the heat no longer goes up the chimney!
4. You get more heat from a log compared to the non-cat furnace
5. More burn time - less reloading time!
6. Zap 90% of pollutants, made from fire source
7. Saves you a lot of money!
8. User friendly, emits no smoke!

News

The Pennsylvania Cattlemen's Association annual membership meeting was held April 9 at the Farm Show Complex in conjunction with the 1994 Beef Expo. A directors' meeting was also held. At both meetings there were important developments that will allow the Pennsylvania Cattlemen's Association to more adequately serve the interests of all segments of the beef cattle industry in Pennsylvania and the Northeast. In revision of the PCA bylaws, out-of-state individuals and companies directly involved in beef cattle feeding, breeding or marketing can be full active, voting members. In the past several years the number of out-of-state members has increased, but they were not allowed full membership rights. There was another very important decision; the directors voted to form councils, specifically: purebred or seedstock; commercial cow-calf or stocker; cattle feeding and finishing, and dairy-beef. This will allow more direct input into PCA programs and policies by individuals within each of these different segments and PCA will be even more responsive in serving the needs of all of the industry. Particular emphasis will be placed on devising programs that will directly benefit cattle feeders in Pennsylvania and contiguous states. The National Cattlemen's Association, with which PCA is affiliated, has for sometime been based on similar councils. PCA has always had representation on each of the NCA councils and other standing committees. Through the development of active councils at the state level, Pennsylvania cattlemen should have more direct input into National policy and programs through NCA.

Officers Elected: At the director's meeting the following officers were elected: President: Robert K. Hay, Somerset County; Vice-President: Larry Moore, Huntingdon County; Treasurer: Oliver Weiss, Allegheny County; and Secretary: Lowell Wilson, Centre County. Managing Secretary is Joan M. Potter, Port Matilda. The directors extended their appreciation to past-president Ray A. Grimes, Adams County, for all the contributions and excellent leadership given to the Pennsylvania Cattlemen's Association over the past several years; but they also reminded him that past presidents never retire — they just keep on working.

Expo Summary: The fifth annual Pennsylvania Beef Expo has been through the first year at the Farm Show Complex in Harrisburg. The educational program was designed mostly for cattle feeders, but contained information of value to all persons interested in beef production. About 140 people attended the Friday evening annual Cattlemen's award banquet, at which Jerry Palen, ranch cartoonist and humorist, shared with the group some of his real-life experiences on his Wyoming ranch. Palen was at the Expo for all three days — drawing caricatures of anyone stopping by to visit. These cartons can be kept as a reminder of the "Good Life" and high points of farm living. The Adams County Beef Producers Association donated the prime rib for the banquet.

The high point of the 1994 Expo was the excellence of the junior activities — over 200 juniors competed in one or more of the three major events — the skill-a-thon, obstacle course, or the junior heifer and steer shows. The junior show, started three years ago, has quickly become the major junior agricultural event in the northeast.

The Cattlemen's Association and the Beef Expo committee, as well as all of the involved affiliated organizations, want to thank each individual and company who contributed either money or time to making the 1994 Expo a success. The Pennsylvania Beef Council, particularly, was helpful in assisting with the skill-a-thon, which included meats identification, marketing and quality assurance events, and revealed some of the long-range beef industry planning committee results from a comprehensive study that it is leading.

Cattlemen's Queen Selected: Nichole Willwert, Red Lion, Pennsylvania, was selected as the 1994-95 Cattlemen's Queen. She received the crown at the Annual Cattlemen's Award Banquet during the 1994 Expo. Nichole is pursuing a degree in Animal Production in the Dairy and Animal Science Department at Penn State and has been active in youth club activities. Nichole (Nikki) will be available for industry and beef promotional activities throughout the year. Arrangements can be made for her assistance at events by calling Sue Clair, Chairman of the Queen Committee at 814/238-1233 or fax: 814/238-1238.

Awards for 1994: The Industry Service Award for 1994 presented at the Annual Cattlemen's Banquet, was the Pennsylvania Beef Council represented by Elrose Glick, Chairman, Dave Ivan, Executive Director, and Tammy Balthaser, Industry Relations. The Seedstock Producer award was presented to Frank Darcey, Spring Bottom Polled Herefords, Fairfield, PA.

More On NCA: Just a bit of history on NCA, which is an outgrowth of the American National Cattlemen's Association founded in 1898. In 1977, ANCA was consolidated with the National Livestock Feeder's Association (founded in 1946). NCA has over 42,000 active, direct members, who represent 230,000 cattlemen throughout the nation through 46 affiliated state cattle organizations and 28 affiliated other organizations. NCA has offices in both Denver, Colorado, and Washington, DC.

Unification of National Industry Organizations: A lot of study has gone into the feasibility of unifying the four main national beef organizations: National Cattlemen's Association, Beef Industry Council, Meat Export Federation and the National Beef Board, into one organization. All four organizations have approved the concept and recognize the increases in efficiency and effectiveness that could result from one "lean" dedicated organization. The Pennsylvania Cattlemen's Association in January also approved the concept of the unification. The planning committee for this unification has identified several different reasons that the beef industry has not kept pace with other industries and retained a profitable share of the consumer's food dollar. The bottom line should also be an improvement of predictable profits for each segment of the beef industry. Most importantly, the people having the most input into the streamlining of these four important organizations are producers — purebred and commercial cow-calf producers, cattle feeders and the marketing segments.

Legislative Issues: There are many pending federal legislative initiatives — use of pharmaceutical products in animal production — dairy self-help programs — property rights — food labeling — foreign trade — taxes — credit availability — downer animals — estate taxes — and many others that affect our everyday life as cattlemen. PCA and NCA are dedicated to bringing about legislation to allow the cattle industry to be profitable and to grow — and not to be suffocated by legislative efforts that do not really consider either the beef industry or the nation's well-being. There is not very much that any one person can do, but when joined into an organization like PCA and having input through NCA — it is possible to bring about change.

Field Days Being Planned: PCA will co-sponsor two field days again this summer. One field day is tentatively scheduled for Saturday, July 9 at Laurel Valley Simmentals, Ligonier, PA. It will be co-sponsored by the Westmoreland County Cattlemen's Association and the Pennsylvania Simmental Association. Topics will be short-duration grazing, watering and fencing systems, balanced selection programs and quality assurance programs emphasizing the commercial cow-calf producers and juniors. The second field day will be in southeastern Pennsylvania and will emphasize subjects important to cattle feeders.

Rifkin Receives Top Honors: The National Anxiety Center, Maplewood, N.J., recently awarded Jeremy Rifkin of the Beyond Beef Coalition top honors at the center's fourth annual "Chicken Little Awards". Rifkin, the anti-beef activist, was recognized for "striving to create a national and worldwide beef phobia" through unsubstantiated claims.

The center also notes that cattle production generates almost $250 billion in U.S. business activity and is responsible for an estimated 3 billion jobs nationwide. According to Alan Caruba, founder of the center, the Chicken Little Awards were developed in 1990 "to shine a light on the endless, scientifically dubious, scare-mongering that too frequently creates widespread public anxiety, while diverting attention from some genuinely serious problems".

Myth Busters hard at work: Special myth buster programs, sponsored by NCA and some state beef councils have now trained 840 individuals in 29 states. These are all volunteers who want to become active in promoting the beef industry. A myth busters program was sponsored in Pennsylvania last fall cooperatively by the Pennsylvania Cattlemen's Association and the Pennsylvania Beef Council. PCA and PBC may sponsor another myth busters program later this year — please contact either of the two organizations if you are interested in attending one of these very worthwhile, industry-building sessions.

Agriculture Deemed Environmental Conscious: A recent "Better Homes and Gardens" survey asked which groups were responding better to environmental concerns. The 10,000 readers' surveys thought agriculture was the most environmental conscious — followed by citizens, corporations, business, and the government, which was listed as "far behind".

One environmental event held recently was Earth Day, which is designed to bring attention not only to efforts to protect the environment, but some of the activities of society that harm the environment. To help cattle producers prepare for Earth Day, NCA distributed packets to media and thought leaders that show beef in an environmentally friendly way, and promote the idea that cattlemen are responsible stewards of natural resources.

Injection-Site Blemishes Increasing: After an excellent record of decreasing the frequency of injection site blemishes from 22.3 percent in 1990 to 9.8 percent in March, 1993, blemishes are on the increase. In July and November, 1993 and March, 1994 injection site blemishes increased from 10.9 to 13.9 to 15.4 percent, respectively. These percentages are based on top sirloin injection-site defects. Reducing the injection-site defects is everybody's responsibility. The primary leader for the beef quality assurance programs in Pennsylvania is the Pennsylvania Beef Council. These activities are highly important for the continued acceptance of beef by the consumer.

Maryland DHIA Report For May

The May 1994 Dairy Herd Improvement information for dairy herds from the DHI processing center in Provo, Utah. The list includes herds from Maryland, Pennsylvania, and West Virginia. The information is listed by herd name, county association, number of cows in the herd and the average production per cow in the herd. To be included, the herd must have 10 cows averaging 65 pounds or more of 3.5 percent fat corrected milk per cow, per day. All herds reported are on official DHI or DHIR test.

Also listed are the top 10 herds in Maryland for the Brown Swiss, Guernseys, and Jerseys, and the top eight herds for Ayrshires.

Dairy Goat Show

ALLENTOWN (Lehigh Co.) — The Delaware Valley Milk Goat Association will be holding its annual Dairy Goat Show on Saturday, July 2 at the Allentown Fairgrounds. The show starts at 8:30 a.m.

There will be a food booth throughout the day as well as a raffle table with items donated by dairy goat enthusiasts and local businesses.

The general public is invited to come and see some of the finest dairy goats on the east coast.

For more information, contact Kathy Morgan, publicity chairman, (610) 326-9475.

REAL

Poultry Houses Need Proper Bracing To Endure Heavy Ice, Snow Loads

(Continued from Page A1)

most younger buildings have seen."

Collins spoke to 25 facility managers and contractors at the Poultry Management and Health Seminar in the midst of the year's first heat wave on Monday afternoon.

Collins told those present that the winter also caused more problems for existing and new facilities. Producers had to endure record-breaking cold, and for those that added insulation, more snow accumulated on the roofs and stayed there longer, creating more stress on the trusses.

If another winter like the past one occurs again, facility contractors and managers can take steps now to ensure the buildings are properly trussed and braced with these steps:

• Properly identify the design load of trusses. For the Lancaster region, building trusses should have a designed snow load of 25 pounds per square foot (PSF). For regions in the central to northern part of the state, a PSF of 30-35 may be necessary. Because of the harsh winter, Collins advises a PSF of 30.

• Don't forget to consider the effects of new and additional insulation in the design load. Make sure the design load is adequate, because additional insulation may mean more snow and ice load to the roof.

Consider the roof slope. Most facilities to 65 foot wide can accommodate a metal roof with a pitch from 4 to 12, if using prefabricated trusses.

• Examine the condition of the nail plates, used to join the trusses at critical points. Poultry houses with indoor composting create ammonia gas which causes heavy corrosion to the plates, weakening them. Protect the plates by cleaning, priming, and painting them in the correct way.

• Look closely to see if the trusses are properly braced. This is the "real clinker," said Collins. The amount of bracing and the proper placement of bracing must be considered.

Producers should consider the various types of bracing.

Foremost is continuous lateral bracing, or lateral 2 by 4's that run the lateral length of the trusses. This ensures the stability of the trusses.

Next is the use of diagonally placed bracing to "brace the bracing," said Collins. Some manufacturers indicate with tags that diagonal bracing should be placed, but do not indicate exact position or give a schematic to scale. "The truss manuacturers could do a lot to help that by providing a little note saying, if you have one (bracing), it has to be in the midpoint, if you have two, it has to be at third-points, and so forth. I think they could save a lot of problems."

Collins provided photo examples of improperly installed diagonal bracing. "The diagonal brace is probably missing in almost 100 percent — I'd say 90-some percent — of buildings with wood trusses. They just aren't there," he said. "Lack of that bracing was the *primary* cause of failure." The diagonal bracing should be placed on 20-foot centers in the house. In one house, because of the lack of diagonal bracing, the trusses completely collapsed on one side of the house. On the other side, the trusses remained in place because the framework holding the chicken cages kept them up.

X-bracing, an additional bracing method, links the trusses to keep them from "falling over like a bunch of dominoes," said Collins. They should be placed at 12-16 foot centers across the building.

Bottom cord bracing, placed across the bottom of trusses, provides additional support and stability, especially during high winds and stress loads. The Truss Plate Institute recommends placing them at 20 foot centers, but Collins recommends 40 foot centers, because he thinks 20 foot centers are too excessive.

Top chord bracing, placed at 60-foot centers across the top, according to Collins, works much like the bottom cord bracing.

Other factors that could cause failure include improper nailing (using one nail per bracing was the culprit in one collapsed house). Collins said he recommends "two nails at every truss and every brace as a minimum."

Also, if the trusses are not properly braced, "they will probably fail at or below the designed snow load." A truss that is designed for 25 snow load plus a 10 dead load, for a total of 35, should carry about 50 percent more than that before they actually collapse.

Existing poultry houses can add bracing to protect them now, particularly if additional insulation will be added.

The position of bracing is critical. Producers should make sure they understand what the truss manufacturer is providing and carefully question any guarantees.

"There's supposed to be a built-in safety factor, but the safety factor doesn't work if the trusses aren't properly braced," he said. "When the trusses are properly braced, they will give you — and I think they should give you — their design load plus a comfortable margin of safety."

Galen "Bud" Collins, project manager for structural engineering at Rettew Associates, Inc., Lancaster, investigated the sites of 12 damaged hog facilities (with partial or full collapses) and one poultry house. He compared notes with another structural engineer. What did they find? "Every one of (the facilities) had, number one, a lack of adequate bracing, and, number two, faulty installation of bracing," said Collins.

Pasture Management Group To Meet

BLOOMSBURG (Columbia Co.) — Penn State's multi-county extension unit in the central Susquehanna Valley area is offering monthly pasture discussion group meetings for dairy and livestock producers.

Dairy producer meetings are being held the fourth Friday of each month from 10 a.m. to 12 p.m. The livestock producer meetings are being held the first Wednesday of each month from 7 p.m. to 9 p.m.

The purpose of the meetings is to meet on area farms utilizing intensive grazing programs to discuss management strategies, successes, and problems. Grazing management and pasture plant species information from Penn State is also available at the meetings.

The next dairy pasture session will be on Friday, June 24 from 10 a.m. to noon at the farm of Tim and Denise Wetzel, near Selinsgrove in Snyder County. From Routes 11 and 15, take Route 35 South. The farm is along Route 35, three miles outside of Freeburg. If you live west or south of Freeburg, the farm is 1.25 miles north of routes 35/104 intersection.

The next livestock pasture session will be on Wednesday, July 6 from 7 p.m.-9 p.m. at the farm of Jeff Mamett, Numidia in Columbia County. This is a steer backgrounding operation. From Route 42, turn onto Ringtown Mountain Road at the blinking light in Numidia. Follow this road approximately one mile. The farm is on the right-hand side of a four-way intersection.

Producers are welcome to attend any or all sessions. No pre-registration is necessary. For more information, call Dave Hartman at the Columbia County Extension Office, (717) 784-6660.

PCA News

(Continued from Page A32)

houses indicates that beef is still the leading entree on restaurant menus. The survey, sponsored by the Beef Industry Council, showed that the average number of main dishes on the menus was 30, and beef, still the most popular center-of-the-plate item, accounted for about a third of the main dishes. Half the beef dishes involved use of ground beef. Beef was the entree ordered most often in half the restaurants surveyed. Ordering trends for beef have been stable in recent years.

Industry Funds Research on Foodborne Pathogens: The beef industry continues to fund research aimed at preventing illness from foodborne pathogens. When beef is properly handled and cooked, there is little danger from any bacteria on meat, but the industry is seeking to reduce numbers of possible pathogens in the meat supply. Since 1986, through beef checkoff programs directed by the Beef Industry Council, producers have funded considerable research on prevention of illness from pathogens.

Beef safety research projects conducted by university scientists have included: Effect of sodium lactate on microbial safety of roast beef; safety enhancement of partially cooked refrigerated meat products; control of E. coli in beef; detection and control of E. coli 0157:H7 in cattle; use of secondary barriers to inhibit pathogens in roast beef; and use of organic acid rinses on beef carcasses.

Consumer Attitudes Toward Beef Show Improvement: After slipping during the late 1980's, consumer attitudes toward beef have been improving. Consumer research conducted in connection with the beef industry's advertising campaign indicates that most consumer trends have changed for the better.

A report by the National Live Stock and Meat Board research indicates that the number of consumers agreeing that beef is versatile has increased 12%. Persons who feel that beef meals can be new and interesting have grown in number by 6%, the survey shows. Consumer agreement that beef can be the source of lots of quick meals is up 13%, that beef is in style, up 13%, and that beef is contemporary, up 7%. Attitudes about beef's healthfulness also are steady or stronger. Consumers planning to include beef more often in their meals have grown by 13%, market research shows.

Suggestions Welcomed: Any information referred to in this article or anytime that there is a suggestion for the benefit of the industry — contact the Pennsylvania Cattlemen's Association, RD #1, Box 83, Port Matilda, PA 16870 (814/692-4208).

Emus Viable Product For Future

ETTERS (York Co.) — On June 3-4, the Eastern Regional Emu Chapter (EREC) of the American Emu Association (AEA) held a combination annual membership meeting and seminar, "Emu For The Future," in Mahwah, N.J.

This northeastern event was attended by farmers, ranchers, investors from as far away as Maine, Vermont, Connecticut and Canada, as well as New York, New Jersey, Delaware, Maryland, Pennsylvania, and Virginia.

Mark and Roseann Annunziato of Rosemark Farms, along with the program committee of EREC, coordinated a comprehensive and entertaining seminar.

Guest speakers included Ralph Benton, Bernard Redlawsk, and Scott Morgan, members of the AEA board of directors; Dr. Bruce Wittels, DVM, owner/operator of the Mid-Monroe Veterinary Hospital and the Tristan Veterinary Clinic, both in New York; and Bill Hayes, vice president of EREC and attorney who raises emus at his Golden Pond Ranch in Williamstown, N.J.

Ralph Benton of Grotee Coyotee Wildlife spoke on the Emu market, where it is and where it is going, product development, and the function of cooperatives for the future success of the Emu ranchers. Three new products were introduced from Emu Ranchers, Inc., (ERI) and then donated by Ralph to the EREC Silent Auction for the benefit of the association. The Emu is a viable product for the future, land efficient, and totally consumable. Advice was given to look at the Emu not as a "Get rich quick scheme," but for a long-term growth investment. As with any new venture, the Emu is going through a correcting of pricing, which will make it attractive to many more ranchers of the future.

Bernard Redlawsk of Bernie's Flying Emu Farm and president of EREC presented a discussion on facilities for Emu, covering specialties for chicks, yearlings, and breeder pairs. Discussion included planning and taking care of Emus, especially in severe weather.

Scott Morgan talked about contracts from all perspectives - buyer, seller, investor, and boarder. He said that you should put everything into a contract that you can think of and that, if possible, you should consult an attorney in drawing up your contracts. He also emphasized that you should feel comfortable with the person with whom you are doing business, as if you could do business on a handshake. Contracts serve to refresh memories on already agreed details.

Wittels addressed the care and management of Emus, as well as preventive medicine/maintenance for Emus. He believes that 90 percent of all problems are directly related to improper management, and that the two most common ways diseases are transmitted on ratite farms are humans and other birds. Nutrition should be of key concern, as well as overall flock health and facility cleanliness (including incubators, work areas, and transporting equipment). He also thinks that facilities should be designed with reference to biosecurity and stress management of the birds.

Bill Hayes delivered his comments on how to sell yourself and your birds and how to get your local publications involved by writing feature stories on your birds, business, facilities, hatching, or just about anything of newsy interest that a newspaper/magazine would print. This equals free advertising. He suggested speaking before local clubs such as Kiwanis, Chamber of Commerce, etc. Getting involved outside your farm is crucial to educating others about this industry.

Linda Woo from Showcase Farms, a founding member of EREC, made a special effort to address attendees on EREC's function and purpose while thanking the founders for their past efforts.

A first "Roundtable Lunch Workshop" was held, with at least one experienced Emu breeder at each table. This format allowed one-on-one discussion and addressed specific problems and thoughts within the group. Afterward, each table answered specific questions, and these were compiled into a handout for all the participants.

Following the general membership meeting Friday night, there were vendors exhibiting Emu-related products and a reception featuring Emu meat cooked four different ways. Also set up was a comparison taste test of Emu and beef. The panel of tasters was selected at random from the audience. There were only two out of nine who correctly guessed which was which. Chef Pete Heth of College Fund Emu Farm was a hit with his wok preparation of the Emu and beef taste samples.

Young Farmers: Do You Have Strong Opinions?

ALBANY, N.Y. — Young farmers looking to broaden their capabilities and openly engage in lively discussions about issues impacting agriculture should plan to enter Farm Bureau's Young Farmer Discussion Meet.

Organized for farmers between the ages of 18 and 30, the discussion meet differs from a debate in the sense that the participants work together to arrive at the best solution to agricultural policy concerns. The winner is the individual who best develops and defends his positions.

The topics for this year's discussion meet competition include concerns that are critical to the future of American agriculture. The 1994 discussion topics are as follows:

(1) As agriculture's political influence is diminishing, should Farm Bureau seek coalitions with other organizations?

(2) What is agriculture's responsibility in management and disposal of waste?

(3) What role do we, as rural citizens, have in restoring our country's values?

(4) Why are so many farmers seeking off-farm employment?

The Farm Bureau discussion meet competition is an excellent way to sharpen leadership skills, meet new people, and have fun. As in past years, winners of the state competition will receive a cash award and 50 hours use of a Case IH Maxum Tractor, as well as a chance to vie for national honors. The national champion wins a Dodge Dakota Club Cab 4x4 pickup truck and have his/her registration fees waived for the 1995 Leadership Conference.

Past winners of New York Farm Bureau's Young Farmer Discussion have come from all across the state and include the following: 1993: Peter Dueppengiesser (Wyoming County); 1992: Kurt Gehrke (Jefferson County); 1991: Christine Nellis (Montgomery County); 1990: John Mueller (Ontario Co.); 1989: Dana Rudgers (Wyoming County); 1988: Mark Masler (Cortland County); 1987: Kevin Grupe (Saratoga County); 1986: Doug Young (Cayuga County); 1985: Paul Herrington (Rensselaer County).

For information on participating, contact your county Farm Bureau young farmer chairman or call (518) 436-8495 for details.

MAHONING OUTDOOR FURNACES
"The Natural Way To Heat Your Home."

Burns Coal, Wood, Oil or Natural Gas
FUEL USED IN STANDARD UNIT: WOOD & COAL & WOOD BY-PRODUCTS (SAWDUST, PAPER, ETC.) FUEL USED IN MULTI-FUEL MODEL: SAME AS ABOVE INCLUDING OIL, PROPANE, NATURAL GAS
Efficiency Rating 83% to 85% - Cut Emissions by 90%
3-Year Warranty Except Electrical Components (1 Year)
35 Years Heating Experience

PROUDLY BUILT IN INDIANA COUNTY, PENNSYLVANIA
100,000 - 500,000 BTU 36"-60" Fire Boxes

★ The only outdoor furnace made with a Catalytic Combuster. ★
Mahoning Catalytic Combuster Will Help In The Following Ways:

1. Burn one cord of wood which equals 166 gallons of oil.
2. Your fuel source becomes enormous inexhaustible and poses few risks to public safety.
3. Overall efficiency of 85% which means the heat no longer goes up the chimney!
4. You get more heat from a log compared to the non-cat furnace.
5. More burn time - less reloading time!
6. Zap 90% of pollutants, made from fire source.
7. Saves you a lot of money!
8. User friendly, emits no smoke!

Noss Is Vice Chairman

(Continued from Page A28)

promotion organizations.

Without each other, there is no strength of protection, only individual ripples across the surface of the earth.

However, the combined effect is significant in creating an area conducive to dairy farming.

The same is true of the individual in the dairy industry: without the strength supplied by each dairyman, the significance of milk promotion is nothing.

Noss said his personal interest in promoting milk comes from the fact that he believes in the quality of the product.

Further, he makes part of his living at producing milk, and he said he also believes that the only way to sell a good product is to tell people about it, and to be able to defend the product against rumors, unfactual statements, and attacks from whatever controversy comes.

And because dairying and selling milk is business.

Noss said he wants to provide the general public with facts that support the basic truth of the purity of the product. He wants to inspire people's confidence in dairy products.

He wants to help increase demand for the product.

So how does a dairyman from Juniata County get elected onto a national board that oversees the spending of many millions of dollars of American dairy farmer money to promote milk consumption?

"Back in 1982, (Juniata) county had a dairy promotion committee. That was before the checkoff was started in '84," Noss said. "I got involved in the county committee. In '87 I became a director with ADC (Atlantic Dairy Cooperative)."

He also served as a director for the Middle Atlantic Milk Marketing Association.

Over the years, he said he became more and more involved in promoting dairy products. So, when the board at ADC came to him in November 1992 and asked if he would be interested in serving on the National Dairy Board, he said, "Yes."

Penrose Hallowell, former Pennsylvania secretary of agriculture (resigned April 3, 1985), left the National Dairy Board in 1992.

In May 1993, U.S. Secretary of Agriculture Mike Espy appointed Noss to the National Dairy Board.

This past election, Noss was elected vice chairman of the board.

And he was also selected by the NDB to be one of 10 representatives to sit on the 20-member board of Dairy Management Inc.

"Now with the joint venture with UDIA (United Dairy Industry Association), I'm getting a lot more involved with it, and making an impact and giving ideas with how the way things I feel ought to go."

He said as vice chairman, one of four officers of the NDB, he is also involved with almost all of the board's committees, including the Finance Committee.

The new joint venture is to save effort and money so that dairy farmer promotion dollars can be more effective against other beverage and food promotions.

Many have cited the disparity between the amount of money and creativity the dairy industry has devoted to promoting and marketing its beverages as compared to the other players in the huge beverage industry.

Promotion Groups Join Forces

VERNON ACHENBACH, JR.
Lancaster Farming Staff

HARRISBURG (Dauphin Co.) — Members of the National Dairy Research and Promotion Board (NDB) and the United Dairy Industry Association (UDIA) have received official federal approval for the formation of a joint-venture group, Dairy Management Inc. (DMI) — an organization formed from members of each organization that is to review and recommend a joint business plan for the two dairy promotion and marketing organizations.

According to a news release from Dairy Managment Inc., which carries the letterhead of both the NDB and the UDIA, the formation of DMI required the approval of the U.S. Department of Agriculture, because of the laws involved

(Turn to Page A38)

"Instead of two staffs doing two things, we will have one staff, basically on one board. The remaining boards (the NDB and the UDIA) will still have the responsibility to allocate money to the new board, so they will still have control.

"The reason they still have that responsibility is because, in the law ... the NDB has to be responsible to budget and (approve) programs. If we would discontinue, and didn't have NDB ... we didn't want to mess with the law.

"By bringing the staffs together, we got a staff reduction, and can save a lot of money on travel and staff," he said, estimating an $8- to $9-million per year savings, under the new program.

The commitment to which Noss has agreed requires a lot of time. He said that serving on the National Dairy Board required 24 to 25 days per year. Being an officer, of course required additional time.

With his membership on the Dairy Management Inc. board, he said he wasn't sure how much time he would have to devote.

But he said he believes it is worth his time.

"Back in 1983, before the checkoff, the (federal) government was spending almost $3 billion a year to buy dairy products off the market. Today it is spending about $650 million to do the same thing.

"Back in 1983, dairy farmers produced about 139 billion pounds of milk. Today, it's about 152 billion pounds. We got rid of 20 billion extra pounds production, plus another 18 billion pounds that the government isn't buying.

"Promotion pays. There's no doubt of it. Every dollar put into promotion gets about $1.79 back, according to a USDA study in 1992."

Noss said that exporting programs with NDB also help, although it still remains to be seen what can be done with such things at the Dairy Export Incentive Program (DEIP).

As far as marketing closer to home, Noss said that as a member of Atlantic Dairy Cooperative, he has seen very few problems marketing milk, even with the advent of Posilac, Monsanto Corp.'s recombinant genetics derived form of bovine somatotropin (BST).

"ADC management and directors decided that decision (to use or note to use rBST) has to be made by the farmers. We have a few customers requesting rBST-free milk, but we can't guarantee that.

"BST is basically another tool to help (the dairyman). It takes a lot of management when you use BST, like anything else," he said, adding that he doesn't use it on his herd.

He said the dairyman is one of his own best marketing tools. Which is another reason he's been involved.

Port Royal dairyman David Noss is vice chairman of the National Dairy Board and also a member of the new Dairy Management Incorporated, a joint venture between the NDB and the United Dairy Industry Association.

Summer Clearance '95 Are Coming!

The Suzuki QuadRunner F250

Roll away your workday on the dependable Suzuki QuadRunner® F250.

- User-friendly features include electric start and an automatic clutch.
- Rugged 246cc 4-stroke engine pumps out plenty of low-end torque.
- Operator comfort provided by four-wheel independent suspension system.
- Ready for work with full-size cargo racks and trailer hitch.

Suzuki QuadRunner ATVs may be used only by those aged 16 and older. Suzuki highly recommends that all ATV riders take a training course. We'll even pay for it. For safety and training course information, see your dealer or call the SVIA at 1-800-852-5344. ATVs can be hazardous to operate. For your safety, always wear a helmet, eye protection and protective clothing. Never ride on paved surfaces or public roads Never carry passengers or engage in stunt riding. Riding and alcohol or other drugs don't mix. Avoid excessive speeds. Be extra careful on difficult terrain. Along with concerned conservationists everywhere, Suzuki urges you to "TREAD LIGHTLY" on public and private land. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when you ride. Professional rider pictured.

Promotion Groups Join Forces

(Continued from Page A37)

in the collection of milk promotion funds from dairy producers.

The joint effort falls short of a complete merger, in part because of the laws governing the use of mandatory dairy promotion funds, but also because each group desired to retain its autonomy as independent boards.

The purpose of the joint effort is to eliminate overhead costs of both organizations through sharing staff, which has already resulted in the elimination of 10 employees, and to better coordinate efforts to achieve the goals of each organization without redundancy of promotion and research.

The joint effort is also seen as a way for the entire dairy farmer supported promotion effort to get the most impact from the funds spent attempting to maintain and increase public desire and understanding of dairy products.

In the news release, it states that the USDA announced that the plan did fall within the guidelines of the Dairy and Tobacco Adjustment Act of 1983 and the Dairy Promotion and Research Order, which are the body of laws covering the producer-driven dairy promotion and research effort.

The new organization consisting of 10 members from each of the existing boards, in effect is to function somewhat like an executive committee and make recommendations to each full board, for each board to independently review and approve.

The new board does not have the authority to dictate what the NDB approves or does.

However, it is envisioned that with board members from each organization working together and with the same staff that mutual goals will be able to be met and more importantly the combined strengths better support the effort to position fluid milk and dairy products better in marketplace.

The chairman of the DMI is Herman Brubaker, who is also chairman of the UDIA, and chairman of the Mid-East UDIA — a UDIA-member promotion organization in the Ohio-Pennsylvania area.

Vice chairman of DMI is Robert Giacomini, from Point Reyes Station, Calif., while Robert Gaebe, of New Salem, N.D., is secretary, and Elwood Kirkpatrick, of Novi, Mich., is treasurer.

In addition to Giacomini and Gaebe, DMI board members from the NDB include David Noss, of Port Royal; Mary Cameron of Hanford, Calif.; Sylvia Hemauer, of Plymouth, Wis.; Harold Howrigan, of Fairfield, Vt.; David Krug, of Owen, Wis.; Alice Moore, of Frazeyburg, Ohio; Alvin Sherman, of Coupeville, Wash.; and John Sullivan, of Superior, Nebraska.

From the UDIA, in addition to Kirkpatrick and Brubaker, are Claude Bourbeau, of Swanton, Vt.; James Camerlo, of Florence, Colo.; Raymond Johnson, of Schaghticoke, N.Y.; Bucky Jones, of Smithdale, Miss.; Edward Nierman, of Concordia, Mo.; Bill Thornton, of Carlisle, Arizona; Lyle Tjosaas, of Kasson, Minn., and David Weitzer, of Poolesville, Md.

According to the news release, the purpose of the joint effort is to increase overall efficiency. However, a number of changes need to be made, and the already individually approved 1994 agendas of each organization have to be carried out before DMI comes into full play.

"... many difficult decisions have to be made regarding individual positions. Compounding the difficulty of such decisions is the need to maintain the capability of implementing the respective 1994 work plans of botht he National Dairy Board and UDIA — a series of programs and activities that were agreed upon last year and that must be honored to their fullest."

In that light, the boards report that they expect that a transition to bring about the changes of efficiency will be happening over the remainder of the year with DMI to be in full function no later than Jan. 1, 1995.

In the meantime, 10 staffing positions have already been cut, freeing up that money to be used for promotional activities instead.

"More significant that the reduction in staff is the revised structure of the merged organization. Two staffs have achieved a blended reporting relationship which marries the strengths of both organizations.

"Business priority team (yet to be established) will be an integral part of the organization and will revolve around the business priorities of the long-range plan," according to the release.

In the meantime, the staff is to immediately start working from an organizational transition chart that uses DMI as the pivotal organization for communication and direction of acitivies with oversight from the USDA and NDB on one hand and the UDIA and its member organizations on the other.

The formation of DMI is in line with what is occuring in almost every other segment of the dairy industry.

Currently, dairy breed oranizations have been reviewing and adopting practices of sharing staff and headquarters, Dairy Herd Improvement Associations have been merging and reforming, dairy cooperatives have been doing the same.

PDPP Joins Mid-East UDIA

The news of DMI comes also at a time when the board of directors of the Pennsylvania Dairy Promotion Program have approved membership under the Mid-East UDIA.

As a member of Mid-East UDIA, the PDPP board then automatically becomes a member of UDIA and will have representation on that board, and the new DMI.

According to PDPP Manager Brian Ross, what it means is that for the first time, the dairy promotion industry in Pennsylvania can: access marketing and promotion information unbefore unavailable, tie into national program materials of a quality unbefore unaffordable, and also concentrate on using its own funds and designing its own program to better serve its representative region.

"The information PDPP now has access to, I'm not sure I can put a dollar value on the information used in planning. It's invaluable.

"It gives us access to programming and market research that there's no way we could spend the money to" access as a totally independent group, Ross said.

He said anothe benefit "... is that they have some good people out there. It's a good resource.

"As a single promotion program, we don't have the money to do the market studies (that membership will now provide). If we tried, that's all we would do and we wouldn't have any money left for promotion.

"When you join with everybody else in the country you can (get that information), and you need that information when you evaluate how well you're doing."

Ross compared the benefit of being tied directly into a national resource as similar to what many newspapers do when they become subscribers to international news associations, such as the Associated Press. Left to providing world news on a small town newspaper budget, without affordable news services, most newspapers would be without story coverage, since budgets wouldn't permit hiring reporters to travel abroad.

"That's the way I see it," Ross said, "it's another resource. They put programs together based on sound marketing principals and sound research. And let's face it, there's a cost to that. And if we can do it together, you're going to come out ahead."

According to Ross, each UDIA or NDB member local promotional organization will now be able to access the same type of programs. Or not.

"Each organization that's a member, they can pick and choose what they'd like to get involved in. Each one of us will develop our own programs. We feel we need that. Not everything we do will be a DMI program, but we will have access and know what is going on."

Up until now, dairy promotion organizations have come up with their own ideas, and some have not been as open to sharing those ideas with members of different programs. In fact, some boards and managers of promotional groups have been secretive about how much money and what percent of the budget has been allocated toward a certain promotional program.

Further, many independent promotion group programs were approved based almost solely on the basis of board member' opinions, which vary greatly in scope and depth of knowledge and understanding.

With the new program, local organizations can know what national programs are underway, what other groups are doing, have access to expensive marketing reports and surveys, and be able to create higher quality local efforts.

"We're being outspent 6:1 by other beverages. The way they approach marketing is very integrated from the national level down to the local level. We're competing with them head-to-head. What we're seeing now is a more integrated marketing approach within the dairy industry," Ross said.

"It's a smarter way of doing business. A better way of doing business."

He said the PDPP membership with Mid-EAST officially goes into effect January 1995.

"As a manager, it's paid dividends already in knowing what's going on nationally, how it fits in. It's just laid things out a lot nicer. It really helps when doing our own programs to be able to look at what they're doing."

If you like old time music you'll just love

Charlie's Band
Featuring The *MUSICAL SAW*

Here is a rare treat! A fabulous collection of golden favorites by an original old-time band. Featuring the incredible Charlie Blacklock playing the musical saw while accompanying himself on the harmonica. But there's not just the saw! Charlie's Band also includes great accordion, guitar, fiddle, mandolin, clarinet, tuba, bass, vocals and whistling.

Just look at the titles - you get 17 best-loved, old-fashioned melodies. Tunes that will spark memories of good times from long ago.

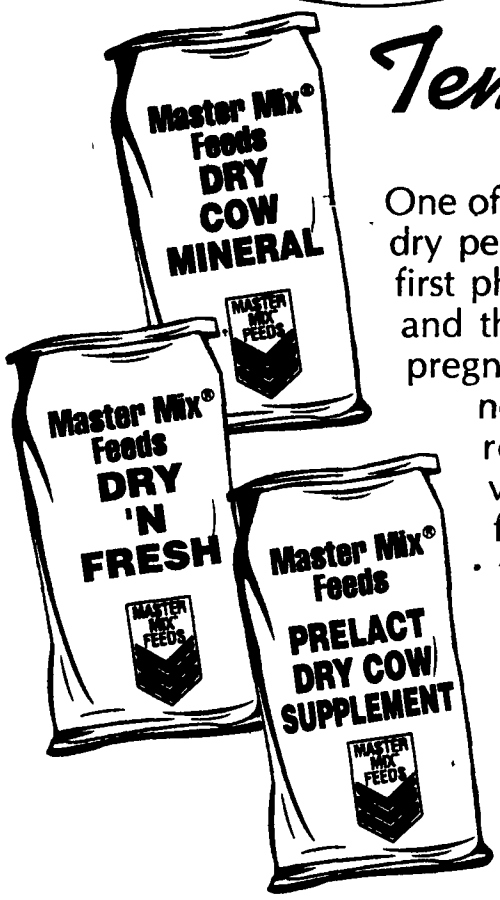
TOTAL VALUE: $35



Temperatures Are Rising!

One of the most important parts of a cow's lactation cycle is the dry period, which can be broken down into two phases. The first phase generally continues for the first four to six weeks, and the second phase occurs during the last two weeks of pregnancy. Special management and feeding practices are needed during these phases, so that your cows will receive the necessary amount of nutrients and vitamins. Master Mix® Dry Cow Feeds are known for their consistency and long-lasting quality during the dry period. That's why we're offering you this special deal, so you can see for yourself just how well our dry cow feeds perform.

Watch the temperatures rise with this free Master Mix® thermometer and watch lactational performance "heat up" after feeding the best dry cow feeds in the industry.

Novel Weddings

The Marriage Of A Dairy Princess

LOU ANN GOOD
Lancaster Farming Staff

LANCASTER (Lancaster Co.) — Remember Rebecca Sonnen — the 1987 Pennsylvania Dairy Princess and the Pennsylvania FFA president, who was active in many other agricultural-related activities?

In April, Rebecca, or "Becky" as she is more often called, married Fred Bube, a neighbor to her parents', Paul and Marilyn Sonnen's, Lebanon County farm.

Like many couples who have finished four years of college, finances are tight, and novel ways to reduce wedding costs become a prime objective.

Becky and Fred believe it is more important to put their money into buying a house rather than having an elaborate wedding. After graduating from Penn State in December, Becky began working for Middle Atlantic Milk Marketing Association in Maryland. Fred, a mechanical engineer, works in Reading.

Becky offers her tips for having a beautiful but economical wedding to our readers.

She said, "Remember, even the simplest wedding is beautiful — because it's a wedding."

But, like all brides, Becky wanted a memorable wedding day, one that both the bridal couple and the guests would recall with pleasure. And one that would not cost their bridal attendants unnecessary expense.

Although Becky and Fred dated five years, they were only engaged four months.

"People often say that you can't plan a wedding that quickly," Becky said, "but we proved it can be done."

The couple decided that tuxedos were one unnecessary expense for their bridal party. Foregoing the high costs of tuxedos, the guys purchased identical dress suits for almost the same price of a tuxedo rental, and now have permanent suits to wear. Becky and Fred purchased men's suits at a one-half price sale at a local department store. Because it was a one-day only sale, four of the suits needed to be purchased without being fitted because the men were unable to make the trip to the store. But with a few simple alterations, the suits fit.

Tuxedo shirts, cumberbunds, and ties were rented for $12 for each person. On the day of the wedding, many people were not even aware that the suits were not tuxedos.

Dresses for the two flower girls were the first purchase made for the bridal attire. The off-white dress suits were bought at an outlet sale.

Becky, who believes in being practical, did not want to require her bridesmaids to purchase gowns that would hang in the closet after one wearing; consequently, she and the bridal attendants shopped for suits and ended up purchasing teale blue-colored suits from a mail-order catalogue. They stitched lace down the front and across the pockets to give the suits a dressier flair.

Becky purchased matching necklaces and bracelets at a half-price sale for the bridesmaids to wear with the suits. And white leather pumps were worn.

Becky set aside one day to shop for a wedding gown. "The more I looked, the more confused I became," she said.

Former Pennsylvania Dairy Princess and state FFA president, Rebecca Sonnen sought ways to make her wedding memorable but economical.

Although she loved a dress that she had tried on in the beginning of the day, by afternoon she could not remember what it had looked like. She knew that she wanted an off-white satin gown with an average price.

Becky said, "When you are working on a budget, you can't find everything that totally suits. You can't be real picky about stuff."

But she was pleased to find exactly the dress that she wanted at a price she could afford that day.

When it comes to flowers, Becky says, "Cut out roses. Flowers are beautiful even if they are not roses, so why waste all that money on something that is going to die anyway?"

Real flowers were used for bridal bouquets, but Becky and a future sister-in-law used silk flowers for the reception table centerpieces, which were then given as gifts to those who helped with the reception.

"My sister-in-law is an absolute whiz with putting flower arrangements together," Becky said.

For some of the tables, they used brandy sniffers with candles and silk flowers arranged inside, and for some, they had black and white cow cups, which they used as a vase.

The rehearsal dinner was served at the church after practice. The church has a policy of providing the preparation of the meal free if the couple is married there. The only requirement is that the couple pay for the cost of the ingredients to make the food. Since Becky loves Italian food, the menu was lasagna, tossed salad, homemade bread, and ice cream sundaes.

The reception was held at the Berks County 4-H Center, partly because it was one of the few places that could seat 250 people, had sufficient space for the cater-

Love For Sheep Shearing Weaves Two Together

LINDA WILLIAMS
Bedford Co. Correspondent

BEDFORD (Bedford Co.) — "I had a little talk with the Lord," said Reverend John Sammel at the wedding of Barb Falvey and Vaughn Wood, "I told Him this was my first international wedding and these were good people. And, look at the day we got!"

Pastor Sammel's prayer was undoubtedly answered as the long awaited wedding of the two sheep shearers arrived with a robin's egg blue, cloudless sky, just right solar-heated temperatures, and spring flowers in abundance.

Barb, a native of Bedford County, who took her first shearing lesson from local shearer Karl Kaufman, was wed to Vaughn Wood, a professional shearer from New Zealand.

From the beginning, Barb knew she wanted to be wed in front of the family barn, near her own beloved Merinos. She wanted to be pulled up the lane in a carriage. She wanted a break from most wedding traditions but with old-fashioned flavor. In short, she wanted to have her cake and eat it too.

And, that she did! Even the fresh lilac decorated and home-baked wedding cake carried out the country-style theme.

Guineas and assorted other unusual breeds of hens clucked and roosters crowed, adding harmony to the folk band composed of various sheep shearing friends who were using a groom designed portable sheep shearing stand as a stage.

Other music was provided by a barbershop singing group of men. One of the barbershoppers was Karl Kaufman, who, was actually responsible for the whole wedding. "I often wonder what would have happened if I would have told Barb that I wouldn't teach her how to shear," he laughs.

Among their many songs was a specially composed rendition of "Sleep, Sleep, Sleep". Their version began, "Sheep, Sheep, Sheep! Close Your Eyes Count Sheep!"

The bridesmaids arrived in a cart pulled by miniature horses accompanied by a miniature colt. The bride's carriage was pulled by her mother's very special dapple gray.

Wearing a simple, but slightly elegant and perfectly-fitted lace dress, the bride's attire was set off with matching granny boots. She wore flowers in her hair and a smile that could conquer even the vast distance between Bedford, Pennsylvania, and New Zealand.

Bridesmaids wore similar country-style dresses, straw hats and carried baskets of fresh cut flowers.

The lane was adorned with baskets of spring flowers and the altar section in front of the barn was lined with potted mums.

The flags of the United States and New Zealand were painted on the barn door. They were works of art by the father of the groom. The groom's entire family all gathered at the Falvey farm for the wedding. They arrived from "down under," from other parts of the United States and from London, England.

Mr. and Mrs. Wood and their sheep shearing friends from both Bedford County and New Zealand. The ceremony in progress.

It was a wedding to be enjoyed by all. Children played on the green lawn or rolled small cars around the wedding setting, grandmothers rocked contented babies from the sidelines.

The smell of a fresh roasting pig filled the spring air accompanied by the equal mouth watering scent of fried chicken.

An old shed was converted into a cafeteria and kegs and bottles of brew were served from a makeshift barrel bar.

The international guests mingled sharing stories of their various homelands and the humor of New Zealanders was evident with their affectionate joking.

Barb and Vaughn plan to spend more than a month at the farm helping with summer chores before returning to New Zealand for another season of sheep shearing.

The bride came down the lane in a horse drawn carriage. The atmosphere was relaxed and pleasant.

Because Jaylene and John are both from farm families and will continue with agricultural careers, they wanted their wedding to reflect their love for farm life.

The bridal party left the church in a manure spreader — a new one fortunately.

Wedding With A Country Flair

LOU ANN GOOD
Lancaster Farming Staff

BELLEVILLE (Mifflin Co.) — May 28 started out like any other day on the farm for Jaylene Yoder. About 5 a.m., she went to the barn and pulled a calf.

But at 11 a.m., she was dressed in her satiny best and stood before the church altar to exchange vows with John Hess, a farmer from Gettysburg.

The couple had met at Penn State, where both were pursuing agriculture degrees. When planning their wedding, it seem appropriate to give it their own personal stamp of individuality — their love for country living. The setting, attire, food, and entertainment expressed the couple's affinity for country.

The groom, best man, and ushers wore jeans and cowboy boots with a bolo tie and tuxedo jacket, which they shed at the reception and donned cowboy hats.

The bridesmaids wore floral print dresses and flowers in their hair. The matron of honor worn the same style dress as the bridesmaids but was distinquishable with a straw hat decorated with wildflowers.

"For the bridesmaids, I chose dresses that could be worn for other occasions because I have seven expensive gowns from being a bridesmaid in other weddings that I will never wear again," Jaylene said.

The bride herself chose a stylish white satin mermaid gown. She did her hair in an upswept style and wore a fashionable hat with an detachable veil.

After the ceremony that was held at Locust Grove Mennonite Church, the bridal party climbed into a manure spreader — a new one — to go to the Yoders' farm for the reception. About one mile from the farm, the couple switched modes of transportation and climbed into an Amish white top buggy for a carriage ride down the farm lane.

A large tent was erected on the farm to hold about 300 guests.

It's not surprising that Jaylene, a former Mifflin County dairy princess, promoted the dairy industry at her wedding. An ice cream punch and a soup appetizer was served. The bean soup was cooked in a large cast iron kettle.

Ham, beef, and chicken was made over an open pit barbecue.

Guests could help themselves to the ice cream sundae bar. The wedding cake was decorated with lassos, cowboy hats, and flowers.

A large tent was erected on the farm for eating and country dancing. The wedding attire of the bridal party reflected the country theme with the guys wearing blue jeans, bolo ties, cowboy hats and boots; the bridesmaids wore floral print dresses — chosen for the versatility of wearing them for other occasions.

Table centerpieces were wildflowers, which the bride and her family picked. Additional wildflowers were purchased.

Preference was given to guests who were dairy farmers.

The announcement was made: "Farmers get to eat first."

This announcement stemmed from the experience of knowing how difficult it was to finish eating in time for farmers to return home to begin evening chores.

Following the meal, tables and chairs were folded up and the bridal part led guests in country dancing on the wooden platform floor.

It did not take long, for the father of the bride, J. Loren Yoder, to shed his suit for a T-shirt with the message: Dairy farmers are udderly remarkable.

With balloons streaming behind them, children ran through the fields. Some guests relaxed on rocking chairs on the porch or relaxed on swings underneath the large trees.

The Yoders said that they incorporated as much help as possible from friends and family members.

A former exchange student from Germany and his wife arrived a day early to arrange a rope of fresh pine and flowers to surround the doorway and to arrange the wildflowers.

Guests were from Norway, Germany, Canada, and numerous states.

After a wedding trip to the Poconos, the couple will live on the Hess family farm, where John will help his parents, John and Bonnie Hess, farm about 1,200 acres and milk 240 Holsteins. Jaylene is employed as a scout technician for Agway.

Jaylene, the 1988-1989 Mifflin County Dairy Princess, is the daughter of J. Loren and Wanda Yoder, who farm 125 acres in Belleville and milk 60 cows.

An Amish neighbor allowed Jaylene Yoder and John Hess to borrow his white top buggy to drive down the farm-lane where the reception was held on the Yoder's farm.

The nice thing about having a wedding on the farm is the ability for the bride's father to dress in his favorite attire — blue jeans and a T-shirt with the message: Dairy farmers are udderly remarkable.

Homestead Notes

The Marriage Of A Dairy Princess

(Continued from Page B2)

ers who prepared barbecue ribs and and chicken, and partly because the place holds fond memories of Becky's affiliation with 4-H and dairy princess activities.

The day before the wedding, the bridal couple helped friends prepare the reception decorations. They rented a helium machine and filled the balloons. Unfortunately, helium seeped from the balloons overnight and the balloons were lying on the tables. Unknown to Becky, Fred's brother discovered the deflated balloons and found a church that owned a helium machine and used it to fill fresh balloons so that by the time of the reception, the balloons were flying high.

Since Becky was a dairy princess, she thought it only proper that milk be served to guests and a milk toast was offered.

Becky encourages using the talents of friends to cut wedding costs and to make the wedding more personable. The disc jockey, the wedding cake decorator, and the photographer were friends.

Even the best laid plans can go awry. And, it did for the couple on their wedding night, but even that ended up saving them money. The couple had secured a suite with a jacuzzi at a well-known hotel chain. They had a confirmation number, but when they arrived, the hotel said that an unexpected busload had arrived and they had given the couple's room to someone else.

It was late, and Becky was near tears at this point. The chain sent them to a hotel next door, who when they heard of the newlywed's plight, gave the couple a more elaborate room than the previously booked one, all at no cost to the couple. The pair then traveled to Florida where they stayed in a a Bed and Breakfast, chosen from the many magazine clippings that Becky has saved for many years.

Even on the honeymoon, the couple found ways to conserve dollars. They ate a late breakfast, had no lunch, and ate an early dinner

When the wedding day and the honeymoon were over, the couple moved into a Lancaster home that they had purchased with money saved from budget-trimming wedding expenses.

"You save here and you spend there," Becky said about wedding costs. "No matter how inexpensive you try to do things, it ends up costing a lot when you have 250 guests.

"It is important for couples to decide what is the most important and more deserving of money and where expenses can be cut. It's a decision that can affect your lifestyle for years to come."

Bride Rebecca Sonnen is surrounded by her bridesmaids and flower girls. The teale-blue suits, which are suitable for other ocassions, were ordered through a catalog.

With about the same amount of money as a tuxedo rental would have cost, the groom and his groomsmen purchased suits. When combined with tuxedo shirts, cumberbands and bowties, few people noticed that the suits were not tuxedos.

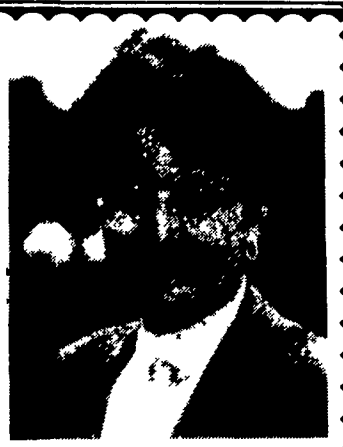
Consuming Thoughts

Fay Strickler

Penn State Extension Home Economist For Berks Co.



During the past several years, Pennsylvania State University food scientists in the College of Agriculture have conducted research on blanching vegetables.

Results of their research will help consumers improve the quality of freezing vegetables in their home. Blanching vegetables prior to freezing not only improves flavor but also improves color and texture.

Blanching is the process of heating vegetables quickly to destroy enzymes, remove air, and shrink food. This practice minimizes vitamin losses and slows unwanted color and flavor changes that occur after vegetables are frozen. It also reduces environmental and pesticide residues and kills or removes many microorganisms on vegetable surfaces.

Members of the Food Science Department have perfected microwave blanching, but learned that some vegetables are better if they are not blanched in the microwave.

They have successfully microwave-blanched and air-cooled spinach, sugar snap peas, green beans, and Brussel sprouts and found them to be superior to conventionally blanched and water-cooled vegetables.

However, researchers disliked microwave-blanched broccoli and cauliflower.

Air-cooling of blanched vegetables has been discouraged for years. Past directions emphasized that blanched vegetables should always be water-cooled, even using ice in many references, to maximize the nutrient content.

Now it is know that properly heat-stabilized (blanched) vegetables lose both water-soluble vitamins and fresh flavors when water-cooled. If the bacterial quality permits vegetables to be eaten raw, as is the case except where fresh animal manure is used around growing plants, then air-cooling of blanched vegetables is an acceptable practice and results in a safe food with superior quality.

Vegetables may be blanched in boiling water, microwave ovens, or steam. Compared with those blanched in boiling water, microwave and steam-blanched vegetables retain more water-soluble vitamins and have fresher flavor. However, microwave and steam blanching may be less effective in removing microorganisms and residues from food surfaces.

Blanching times depend on the blanching method as well as the kinds and sizes of vegetables. Ideal times are just enough to destroy most enzymes. If vegetables are blanched for too short a time, their quality may be worse than if not blanched at all. Over-blanching causes excessive quality losses.

The water used for blanching gradually accumulates dirt, residues, and vegetable components. It should be changed after each three to 10 batches to prevent it's adding strong off-flavors to blanched vegetables.

If you would like to receive a complimentary copy of the Penn state's recommendations for blanching vegetables pick up a copy at our office or send a self-addressed business size envelope with 45 cents postage to: Blanch Vegetables, Berks County Cooperative Extension, Berks Co Ag Center, PO Box 520, Leesport, PA 19533-0520.

Breakthroughs May Enhance Economic Value Of Dairy Products

HUNGTINGDON (Huntingdon Co.) — By manipulating the molecular structure of a milk protein, Cornell University scientists have demonstrated the feasibility of creating new dairy ingredients and products with enhanced economic value.

The researchers have borrowed genetic engineering techniques used by the pharmaceutical industry, in which properties of a molecule are predictably changed based on a knowledge of its three-dimensional structure. To illustrate the technique's potential, they have slightly altered the structure of a milk protein normally found in whey, beta-lactoglobulin, so that it almost eliminates the annoying tendency of yogurt to form pools of liquid during storage, said Carl Batt, associate professor of food science.

"Improvements to beta-lactoglobulin that enhance its performance during food processing will have a profound effect on its economic value," he said. "We've shown that genes can be altered to produce variants of beta-lactoglobulin. We've shown that these genes can be altered to produce variants of beta-lactoglobulin. We have every reason to believe that these genes eventually can be expressed in cows, which would open new markets for the use of whey proteins."

Beta-lactoglobulin is found in the milk of many, but not all, ruminants. An interior cavity in the protein binds a vitamin, retinol, and scientists believe beta-lactoglobulin's physiological function may be, in part, to deliver retinol to the developing nursing animal. Humans do not make this substance, although placental protein 14 is very similar

Yogurt made with small amounts of modified beta-lactoglobulin forms a gel six to 10 times as easily as ordinary yogurt, Batt said. The process also cuts the processing temperature from 85 degrees Celsius to 70 degrees or less, eliminates the need to add starch in order to obtain a better gel, and reduces the time needed for curd formation. All these factors could lower the cost of yogurt manufacturing. In addition, the modified protein reduced the separation of whey into the pools on top of yogurt by as much as 83 percent. The researchers also are exploring using modified beta-lactoglobulins as transport agents for pharmaceuticals

Dairy Recipe Extravaganza

Again and again we hear that our readers! not only love these dairy recipes that appear during the month of June but also the comments and pictures that accompany many of the recipes.

If you are one of those persons who enjoy reading these letters and trying the recipes, but have never sent in a picture of your family and told us about yourself, then you are cheating other readers from this pleasure.

Make it a priority to take a family picture, compose a few paragraphs about your family, and select a favorite recipe to be used in this dairy promotion next year. It is our readers who make this a favorite section with many of our subscribers. Thank you and enjoy another week of good reading and good eating!

THREE CHEESE POLENTA BAKE

3 cups coarse cornmeal (imported if available)
9 cups water
1 cup parmesan cheese
1½ pounds ricotta cheese
½ pound mozzarella cheese
1 pint heavy cream

Bring nine cups water to a boil, remove from stove and pour 3 cups cornmeal slowly into water, stirring constantly. Cover and return to stove on low flame. Let simmer and steam for about 30 minutes. All water will be dissolved. When cooking this, it is important to cover cornmeal as it thickens quickly and as it simmers will spurt out of pot. Once you cover it, do not open until cooked. After 30 minutes, set aside.

Grease large casserole with olive oil. Add a layer of cooked cornmeal, then a layer of grated parmesan, then a layer of ricotta, and a layer of shredded mozzarella. Repeat layers ending with cheese. Pour heavy cream over entire cornmeal. Bake at 350 degrees for about 20 minutes or until cheese is melted. Serve immediately with a salad on the side and a glass of red table wine on the other side.

The above recipe has been in the Didero family for many years and originated from Northern Italy and was a favorite dish of my husband's father Serafino Didero and is now also one of our favorites.

Helen Didero
Equinunk

BASTICCIA BOLONGNESE

6 slices bacon, cut in small pieces
2 onions, chopped fine
1 stalk celery, chopped fine
1 carrot, chopped fine
2 tablespoons butter
¼ pound chicken livers
1 pound chopped meat
1 teaspoon salt
½ teaspoon nutmeg
½ teaspoon pepper
1 cup tomato sauce
1 cup white wine for cooking
½ cup chicken broth
1 pound fettucine-style noodles (green if available)

Additional seasoning if desired, half bay leaf, half teaspoon rosemary, oregano, and sweet basil.

White Sauce:
3 tablespoons butter
3 tablespoons flour
1 cup milk
1 cup heavy cream
1 cup grated parmesan cheese

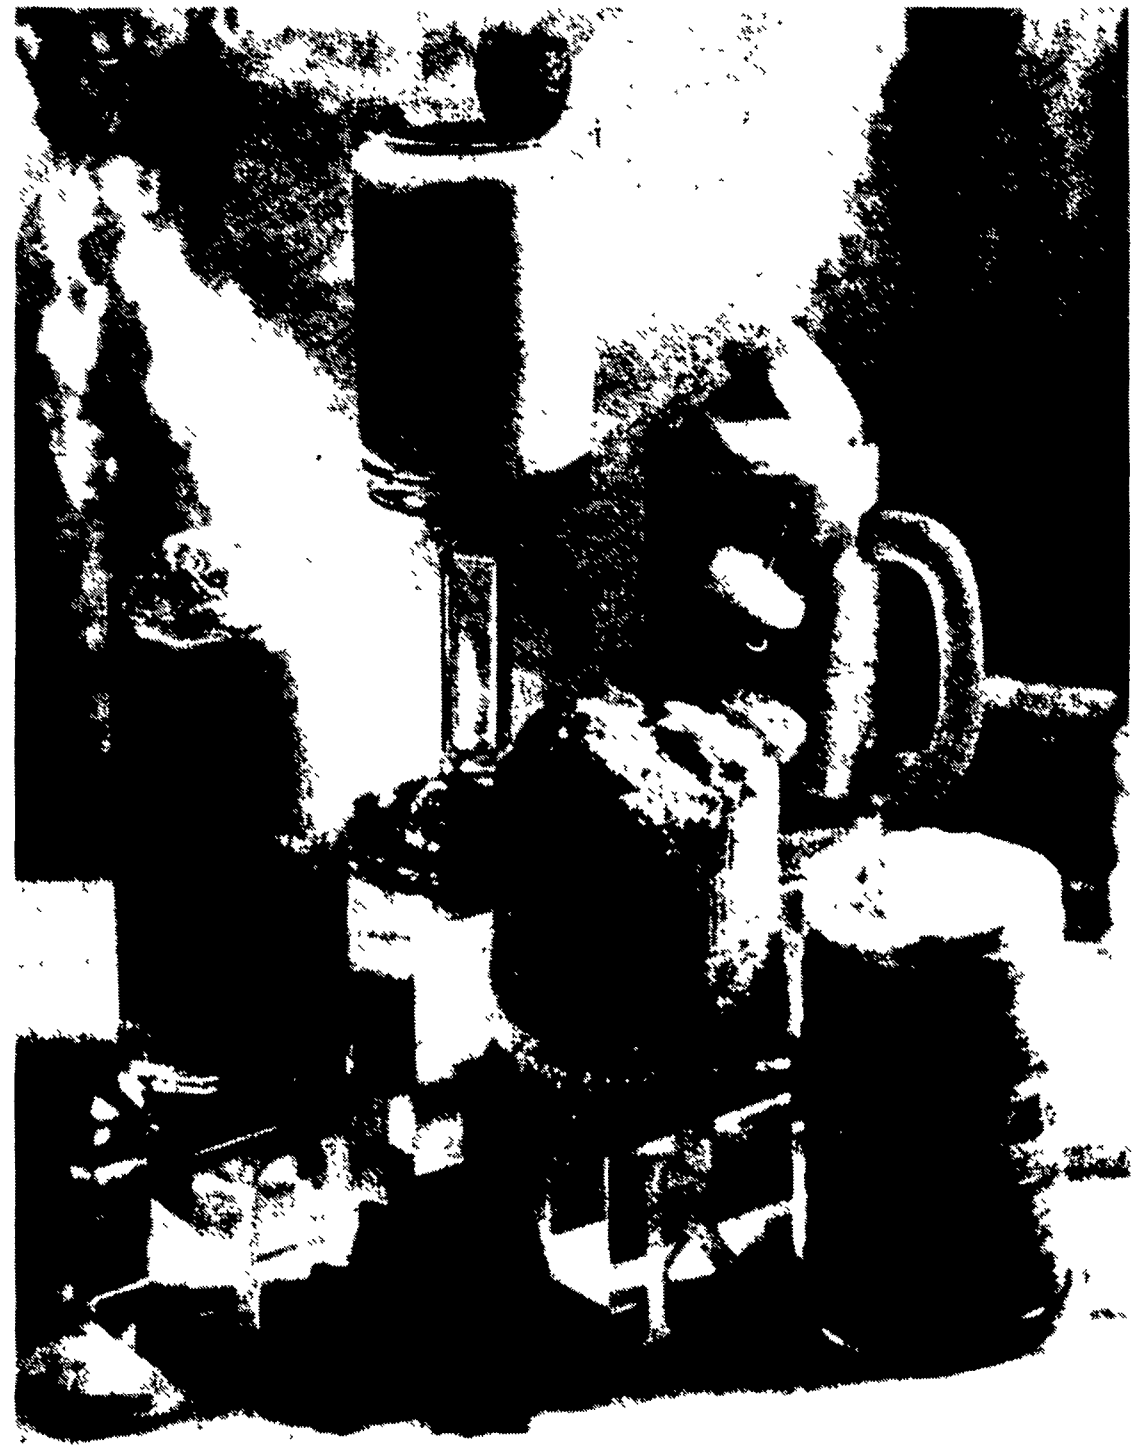
Melt butter, blend in flour. Stir in milk and cream and cook until it bubbles, stirring constantly. Add cheese and salt and pepper. Set aside.

Fry and drain bacon, add onions, celery, and carrots, cook until tender, set aside. Add chopped chicken livers to pan and brown, set aside. Add chopped meat to pan and brown. Season. Add tomato sauce, wine and broth and simmer, covered, 30 minutes.

Make white sauce and cook noodles. When all is completed, make layers using a very large greased casserole dish. Start with a layer of chopped meat mixture, then a layer of chopped chicken livers, bacon, onions, celery and carrots mixture, layer of noodles and white sauce. Keep repeating layers ending with noodles. Bake at 375 degrees for 35 to 40 minutes. Let set 10 minutes before serving. This can be made a day ahead, do not bake, this will blend all and then bake the second day.

This is a favorite recipe of the Ranieri family. It originated in Northern Italy. It is an elegant dish that can be made ahead and frozen and saved for that special occasion. It will bring many compliments.

Elena Ranieri
Duck Harbor



Frosty, delicious, easy-to-make milkshakes are a cool way to beat the summer heat! Tips for a mouth-watering treat made with fresh fruits, milk, ice cream, and assorted flavorings: Pre-chill glasses; start with cold ingredients. Always serve milk drinks immediately; do not make them in advance.

MAPLE AND SPICE ICE CREAM ROLL

4 eggs
1 cup brown sugar
⅓ cup maple-flavored syrup
1 cup all-purpose flour
1½ teaspoons ginger
1½ teaspoons cinnamon
¼ teaspoon ground cloves
¼ teaspoon salt
½ gallon maple nut ice cream

Sarah Z. Lapp
Myerstown

WET BOTTOM SHOO-FLY PIE

Liquid:
1 egg, beaten
1 cup corn syrup
¾ cup boiling water with ½ teaspoon baking soda

Crumbs:
1 cup flour
⅓ cup brown sugar
1 tablespoon butter

Set aside 1 cup crumb mixture. Stir remaining crumbs into liquid mixture. *Do not beat.* Pour into pastry shell. Sprinkle remaining crumbs evenly over top of pie. Bake at 400 degrees for 10 minutes, lower heat to 350 and bake another 50 minutes.

Pizzas are as much fun to make as they are to eat. The latest recipe leaflet from the American Dairy Association features easy pizza recipes for every occasion — appetizers, snacks or a meal.

Toppings and fillings include traditional sausage and tasty tidbits like veggies, pesto, pepperoni and a variety of delicious cheeses such as Mozzarella, Swiss, Blue, Provolone and Parmesan. Crusts include English muffins, tortillas, focaccia and pita bread and an easy homemade version.

For your copy and copies of other delicious dairy recipes, send a self-addressed, stamped, business-size envelope to: Recipes, Middle Atlantic Milk Marketing Association, P.O. Box 19464, Baltimore, MD 21026.

Here is one of the recipes in the brochure:

MICRO MEXI-VEGGIE PIZZA

1 serving

2 (7-inch) flour tortillas
1/2 cup (2 ounces) shredded Colby cheese, divided
1/4 cup refried beans
3 tablespoons cooked corn
1 tablespoon salsa
Sour cream, if desired

Place one tortilla on microwavable plate. Sprinkle with half the cheese. Place second tortilla on top of cheese and spread with refried beans. Sprinkle corn over beans. Top with salsa then remaining cheese. Microwave, uncovered, on HIGH (100%) for 1½ minutes, turning once. Serve immediately with sour cream.

Dairy Recipe Extravaganza

(Continued from Page B6)

HOT MILK CAKE

4 eggs
2 cups granulated sugar
2¼ cups all-purpose flour
1 teaspoon vanilla extract
1¼ cups milk
10 tablespoons butter
2¼ teaspoons baking powder

In a mixing bowl, beat eggs at high speed until thick, about 5 minutes. Gradually add sugar, beating until mixture is light and fluffy. Combine flour and baking powder, add to batter with vanilla and beat at low speed until smooth. In a saucepan, heat milk and butter just until the butter melts, stirring occasionally. Add to batter, beating until combined. Pour into greased 13x9x2-inch baking pan. Bake at 350 degrees for 30 to 35 minutes or until cake tests done. Cool on a wire rack. Yield: 12-16 servings.

I got this recipe from a farm magazine and I love it because I have all the ingredients at home. There is no need to run to the store for a special ingredient. My husband and I sold our dairy last spring and he became an over the road trucker. We still have sheep, goats, and board heifers. My day is kept busy by our four young children, Courtney, 5½; Kaitlyn, 4; Stephanie, 2; and Ethan, 1.

Ann Supa
Johnson City, N.Y.

The Supa children live with their parents Stephen and Ann in Johnson City, N.Y.

CHEESE CAKE

8-ounces cream cheese, softened
1 pound creamed cottage cheese
¼ cup granulated sugar
2 eggs
1½ tablespoons cornstarch
1½ tablespoons flour
2 teaspoons lemon or orange juice
½ teaspoon vanilla
¼ cup butter, melted
1 cup sour cream

Grease pan well. At high speed beat cream cheese and cottage cheese. Gradually add sugar and eggs; beat well.

At low speed, beat in cornstarch, flour, lemon juice, and vanilla. Add melted butter and sour cream. Beat until just smooth.

Pour into greased pan and bake for 40 minutes in a 325 degree oven for about 2 hours. Remove from oven and let cool completely. Refrigerate until ready to serve, at least six hours. Run spatula to loosen cake. Remove or serve from cake pan.

Good with strawberries, blueberries or pineapples.

I am a full-time dairy and hay farmer in Flemington, N.J. My brother and I are third generation farming my dad. We have dairy cows and sheep. I hatch and raise all types of poultry. I also raise and breed lineback cows and bulls. They are nice and beautifully marked. I collect odd types of vehicles, especially ATV's, six wheelers. I enjoy going to farm auctions. I am busy now baling hay, growing a garden, and hatching eggs. I love farming and all types of animals.

Flemington

Deidre Welisewitz of Flemington with Buckwheat.

ICE CREAM DESSERT

60 Ritz crackers, crushed
1 stick butter, melted
2 package coconut cream instant pudding
1 quart softened vanilla ice cream
1½ cup milk
5 ounces whipped topping

Mix crackers and melted butter. Press ¾ of the crumbs in the bottom of a buttered 9-inch by 13-inch cake pan. Blend pudding and milk.

Add ice cream. Blend well. Pour mixture evenly over crumbs. Let set in refrigerator until chilled. Spread with whipped topping. Sprinkle remaining crumbs on top.

Cook's Question Corner

If you are looking for a recipe but can't find it, send your recipe request to Lou Ann Good, Cook's Question Corner, in care of Lancaster Farming, P.O. Box 609, Ephrata, PA 17522. There's no need to send a SASE. If we receive an answer to your question, we will publish it as soon as possible.

Answers to recipe requests should be sent to the same address.

QUESTION — Helen Kofran would like a recipe for Amish shredded roast beef salad

QUESTION — Mary Martin, Annville, would like a recipe for Moravian pie

QUESTION — Nancy Kring, Johnstown, would like a recipe for Oriental muffins, a spicy muffin with a brown sugar bottom

QUESTION — L Weaver, Ephrata, would like a recipe for tomato sauce (similar to Hunt's) to can.

QUESTION — Ann Lincoln, Genesee, lost her Insterella Mozzarella Cheese recipe that she made from her sweet Jersey milk. Does anyone have the recipe?

QUESTION — Mrs. Donald Hill, Apalachin, N.Y., would like recipes for strawberry-rhubarb French toast, rhubarb barbeque shortribs, and raspberry rhubarb mousse such as that served at Kling House Restaurant at Kitchen Kettle Village.

QUESTION — Jannelle Jonrs, Volga, W.V., would like a recipe for elderberry pie that is not watery.

QUESTION — N.E.K. of Lebanon would like a recipe for both strawberry and apricot jellies that are made with fruit and sugar but no thickeners.

QUESTION — A York County reader would like a recipe for poultry stuffing made from crackers instead of bread.

QUESTION — Joanne Diller, Dillsburg, would like a candy roll recipe called Chacona Candy Roll. Her mother made it at Christmas. Joanne remembers that her mother cooked a mixture of brown sugar, dates, and nuts, formed into a roll, wrapped in a cloth, and refrigerated before slicing — so good!

QUESTION — Shirley A. Womer, Hiddleburg, would like a salsa recipe to can in small jelly jars for Christmas gifts.

QUESTION — Sanda Sanger, Lebanon, wants a recipe for chicken pot pie that uses potatoes has an ingredient.

QUESTION — Sandra Sanger, Lebanon, wants a recipe for glaze to serve on a ham slice.

QUESTION — Denise Fletcher, Trumansburg, N.Y., would like a recipe for Kentucky Derby Pie.

QUESTION — L. Rapp, Easton, wants a recipe for Montgomery Pie with a lemon bottom not molasses.

QUESTION — L. Rapp, Easton, wants a recipe to can Hungarian wax peppers.

QUESTION — Crystal Brant, Red Hill, needs a recipe to freeze homemade coleslaw. May any type of coleslaw be frozen or does it need to be a particular recipe?

QUESTION — Beulah Beitzel, York, wants a recipe for vinegar pie It looks similar to a lemon meringue without the meringue and is baked in the oven in an unbaked pie shell. It may be a southern recipe.

QUESTION — Dorothy Wilson, Middletown, Del., would like a recipe for peanut butter pie.

QUESTION — Sarah Clark, Breezewood, would like a recipe to make brownies from cake mixes.

ANSWER — Elfrieda Sames, Coopersburg, wanted a recipe for rhubarb cake. Thanks to a reader for sending two.

Rhubarb Cake

1½ cups brown sugar, packed
½ cup shortening
1 cup sour milk or buttermilk
1 egg
2 cups flour
2 cups diced rhubarb
½ cup sugar
1 teaspoon baking soda
½ teaspoon salt
2 teaspoons cinnamon

Cream brown sugar and shortening. Add egg. Sift together flour, salt, and baking soda. Mix small amounts of flour mixture and add milk to egg mixture. Fold in diced rhubarb. Pour into greased 9x13-inch pan. Mix sugar and cinnamon. Sprinkle on top of cake batter. Bake 350 degrees for 35 to 40 minutes. Serve with whipped cream or ice cream.

Rhubarb Upside Down Cake

5 cups rhubarb
1 cup sugar
3 ounce package strawberry Jell-O
3 cups miniature marshmallows
18-ounce package yellow cake mix

Cut rhubarb into ½-inch slices and place in greased 9x13-inch pan. Sprinkle gelatin and sugar over rhubarb Place marshmallows over mixture.

Prepare cake mix as directed on box. Pour over rhubarb mixture. Bake at 350 degrees for 40 to 60 minutes.

Remove from oven and turn upside down on serving tray or cookie sheet. Serve with whipped cream.

ANSWER — Christine Martin, New Bethlehem, wanted a recipe for vegetable pizza dough made from scratch instead of using refrigerated crescent rolls for the base. Thanks to Mary Ann Smucker, Reedsville, and R. Wenger, Dayton, Va., for sending recipes

Vegetable Pizza Dough

½ cup butter
1 cup flour
1 cup water
4 eggs

In saucepan, bring water and butter to a boil. Add flour all at once and stir rapidly until mixture forms a ball. Remove from heat and cool. Beat in eggs, one at a time, beating well after each addition. Spread on ungreased 10x15-inch cookie sheet. Bake at 400 degrees for 30 minutes. Cool.

Vegetable Pizza Dough

½ cup milk, scald and let cool
½ cup margarine
¾ teaspoon salt
1 tablespoon yeast
½ cup water
⅓ cup sugar

Mix together and add:

1 egg
4 cups flour

Brush oil on top and let rise one hour. Spread dough on cookie sheet. Bake at 350 degrees for 11 to 13 minutes. Cool dough then spread filling on top and add an assortment of fresh vegetables.

ANSWER — Patricia Potter, Middleburg, wanted a recipe for blueberry dessert that has graham crackers for the crust and blueberry filling on top. Thanks to Anna Joyce Martin, East Earl, and Pam Mummert, Glen Rock, for sending recipes.

Blueberry Cream Cheese Dessert

Crust:

1 pack plus 6 graham crackers, crushed
1 cup confectioners' sugar
½ cup butter, melted

8-ounces cream cheese
2 small packages dry Dream Whip
½ cup confectioners' sugar
1 teaspoon vanilla

Top with blueberry pie filling or strawberries thickened with clear jell.

Blueberry Bonanza

1 envelope Dream Whip
½ cup milk
1 teaspoon vanilla
8-ounces cream cheese
1½ cups confectioners' sugar
1 can blueberry pie filling

Make a graham cracker pie crust from the following:

2¼ cups graham cracker crumbs
⅓ cup margarine, melted

Press into the bottom of a 13x9-inch pan. Mix Dream Whip, milk, sugar, vanilla, and cream cheese. Beat together ingredients until well mixed. Pour into cracker crust. Pour pie filling over cream cheese mixture. Refrigerate about 2 hours before serving.

ANSWER — A reader from Morgantown wanted a recipe for spaghetti sauce that tastes like the Ragu brand. Thanks to Sarah Clark, Breezewood, for sending a recipe.

Spaghetti Tomato Sauce

2 tablespoons olive oil
1 medium onion, chopped
1 small green pepper, chopped
1 large clove garlic, chopped
16-ounce can whole tomatoes, undrained
8-ounces tomato sauce
1 tablespoon chopped fresh or dried basil leaves
1½ teaspoons chopped fresh oregano leaves
¼ teaspoon salt
¼ teaspoon fennel seed
⅛ teaspoon pepper

Heat oil in 3-quart saucepan over medium heat. Cook onion, green pepper, and garlic in oil, about 2 minutes. Stir in remaining ingredients. Break up tomatoes. Heat to boiling, reduce heat. Add a pinch sugar. Stir. Cover and simmer 45 minutes. Makes 2 cups.

ANSWER — Rebecca Helm wanted to find a recipe for soft tortilla shells made with cornmeal and whole-wheat flour. Thanks to Beverly Hoover, Thomasville, for sending a recipe for soft shells that use white flour. She suggests that Rebecca substitute some of the white flour with conrmeal or whole-wheat.

Flour Tortillas

2 cups white flour
1 teaspoon salt
1 teaspoon baking powder
¼ cup shortening
½ to ¾ cup boiling water

Mix dry ingredients. With fingers, cut in shortening (do not use butter or margarine). Sprinkle water gradually and keep mixing until soft like playdough but not sticky. Knead for one minute or so. Divide, roll into 10 balls. Flatten and pinch edges until circular. Roll once, turn ¼ turn, repeat until 7-inch circle. Put on hot ungreased skillet. Cook until brownish on bottom, flip, and cook on other side. Takes about 3 minutes for each tortilla. Yields 10.

Dairy

(Continued from Page B7)

CRAB/SHRIMP MORNEY

4 tablespoons onions
4 tablespoons celery
4 tablespoons butter
4 tablespoons flour
2½ cups milk
2 cups shredded cheddar cheese
2 cups crabmeat or shrimp (cooked or 2 4½-ounce cans)
¼ cup white cooking wine
Dash pepper
¼ teaspoon salt

Saute onions, celery, butter, add flour, salt, and pepper. Stir and add milk and cook until bubbly. Stir in cheese. Add crab or shrimp. Add wine. Heat thoroughly. Serve over angel hair pasta.

My husband and I have three girls who are married with a total of four grandsons. When my family was all at home, we always had extra dinner guests and served them the food that we raised including meat, vegetables, and fruit There was always plenty to eat. Now it is very difficult for me to prepare meals for two!

Carol Lownes

GOURMET POTATOES

2 pounds potatoes
½ pound chopped onion
2 tablespoon butter
10¾-ounces cream of celery soup
¾ cup shredded cheddar cheese
1 cup sour cream
1½ tablespoons butter, melted
½ cup crushed Corn Chex

Cook potatoes with skins. Cool, skin, and shred. Place in a large casserole. Saute onions in butter, add soup, cheese, and sour cream. Mix together and pour over potatoes. Cover and refrigerate overnight. Just before baking, add Corn Chex and drizzle butter over top. Bake at 350 degrees for 45 minutes. Serves 8.

My husband and I are dairy farmers in Huntingdon Co. We milk 150 registered Holsteins. We have three children, Nicole, 6; Janelle, 4; and Joshua, 2, who like to help feed the calves. Will's brother Joe is also involved in the dairy operation. We are members of Maple Grove Mennonite Church.

Betsy Yoder
Huntingdon

STRAWBERRY FREEZE

2 cups graham cracker crumbs
2 tablespoons brown sugar
½ cup melted butter

Reserve ½ cup of this mixture.

Prepare 1 can evaporated milk or 2 cups real cream (real cream is best). Set aside. Soften one 8-ounce package of cream cheese. Add 2 cups strawberries (crushed) or 2 cups raspberry juice. Beat until smooth and creamy. Beat in ½ cup sugar. Fold in whipped cream. Put in 12 by 9-inch crumb-lined pan and put remaining crumbs on top. Freeze.

Mrs. Amos Fisher
Strasburg

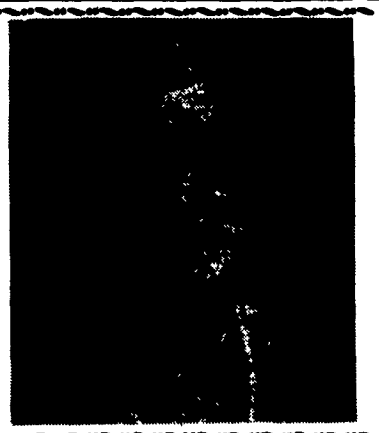
CHEESE AND HAM CASSEROLE

1 small onion
1 tablespoon butter
2 cups ham, diced
3 eggs, beaten
1½ cup cracker crumbs
1 cup sharp cheese
1¼ cup milk

Saute onion in butter until soft. Combine with ham in 8 by 10-inch greased casserole. Mix beaten eggs and milk. Add cheese and crackers to casserole, then milk and egg mixture. Bake at 325 degrees for 45 minutes.

Lois Baumgardner
Dillsburg

(Turn to Page B14)



Ida's Notebook

Ida Risser

People talk about recycling things and taking care of the environment. I feel as though that has been part of my life always. My parents saved many things that I thought should have been thrown away.

But, now I, too, save cord string and have a small ball in a kitchen drawer. In the same drawer is a bag of all-sized rubber bands. My stove drawer holds brown paper bags which I reuse as necessary. The top shelf of a cupboard has boxes and paper that can be reused to wrap gifts.

The other day when I was peeling the tough asparagus stems, I asked my husband how many other women, he thought, did the same thing rather than throw the tough parts away. My mother peeled them because we did not have much asparagus and so we used every bit. Now I do the same thing.

This reminds me of the story of the daughter who asked her mother shy she had to always cut a ham in half before she baked it. The mother said, "Well, I'll ask Grandma as she always did this too." When Grandma was asked her reply was, "I cut the ham in half because I did not have a big enough pan for the whole ham."

Our family has always had shoes repaired that needed new heels. Why buy another pair? Stockings with runs can be worn under slacks and no one will notice. Plastic bags can be laundered and we need not buy new ones.

I wouldn't think of throwing away chicken necks or backs as that is the part of the bird that ends up on my plate. Why I even keep some clothes that no longer fit just because they bring back pleasant memories.

When we were first married, it was a necessity to live conservatively and somehow over the years I've learned to live without and still be happy.

Kid's Korner

Students Visit Modern-Day Old MacDonald's Farm

BETH MILLER
Cumberland Co. Correspondent

BOILING SPRINGS (Cumberland Co.) — Lee Hoover really has an Old MacDonald's Farm on his 180 acres near Boiling Springs.

He has beef animals on his farm, plus goats, sheep, chicken, guineas, ducks and all sorts of things with feathers and fur.

Hoover said he didn't plan to have such a variety. It just happened all on its own.

The way the ducks came to be on the farm is an example of how things worked out.

The first of the ducks arrived when the Hoover's daughter, Linnea, was in first grade at Rice Elementary School. The little girl's class incubated duck eggs. The hatchlings stayed in the classroom for a little while, but after a time, they needed somewhere else to go.

The Hoover farm became their new home and, ever since, there have been ducks on the place. That was six years ago, Hoover said.

School children still come to visit the ducks, and see all the other animals at the farm.

But the farm isn't a zoo. It is a real working operation.

The Hoovers milk 50 cows on their 180 acres and have another 50 heifers and calves. They also grow corn, hay, and barley.

The Hoovers do like variety.

For example, they don't have just one or two breeds of cows like many farms. Instead, they have six breeds.

They have Brown Swiss, Milking Shorthorns, Guernseys, Ayrshires, Jerseys, and Holsteins. Hoover said they show all the breeds except the Jerseys.

Holsteins are the main milkers, he said. Hoover said the various breeds mainly were gotten for the Hoover children to show.

In addition to Linnea, who is now a student at Boiling Springs Junior High School, there are Larry, who is going to Penn State for a two-year degree in agricultural engineering; Loren, who is a diesel mechanic; and Lynn, who is studying welding in high school.

Hoover said all of his three boys still want to farm, but they are also determined to learn another trade.

Living on a farm like the Hoovers' makes one a jack-of-all-trades.

Not only do the Hoovers have to deal with the cows, they also have to know how to handle their four sheep, 10 goats, and 10 rabbits.

The goats are used for breeding and the Hoovers sell the kids. In addition, Linnea milks two of the goats.

The chickens that are all over the place are used for their eggs, which the Hoovers sell fresh directly from their farm.

To keep track of all their feathered friends, the Hoovers buy a different chicken cock each year so they know exactly how old each different group of chickens is.

One thing is certain on the Hoover farm. The Hoovers may be rather busy, but they never are bored.

The Hoovers' goats and sheep

The kindergarten students play with the Hoovers' goats and sheep.

Step right up and enjoy a splash.

Linnea Hoover shows one of her Oxford Sheep, Strawberry.

4-H Summer Day Camps Offered

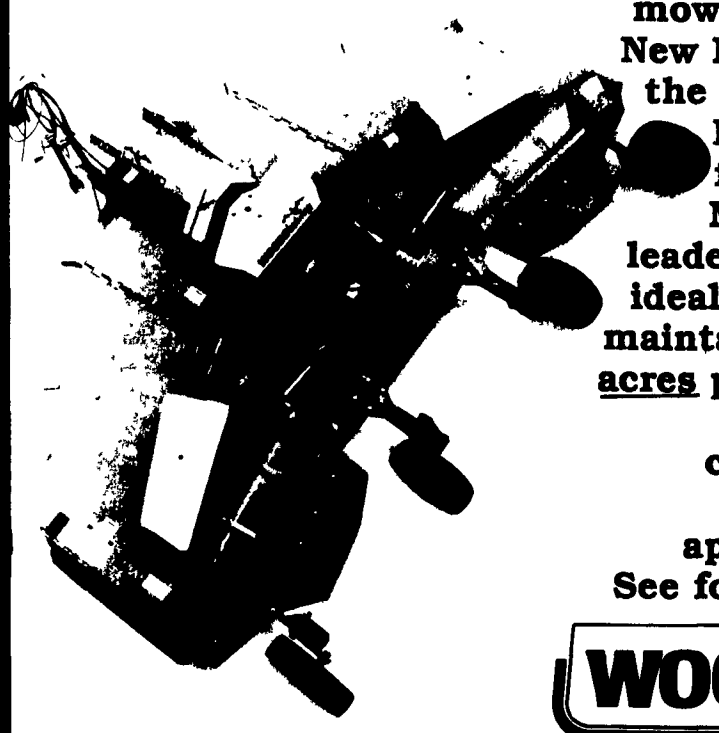
CREAMERY (Montgomery Co.) — School will be out shortly! How do your children plan on spending the summer? Here are a few ideas. The Montgomery County 4-H Center is offering two day camps this summer. The Animal Science day camp is being offered for youth ages 9-14 the week of June 27. Youth will be able to learn more about and work with a variety of farm animals. During the week of July 25, there will be an Environmental day camp for youth ages 8-12. Both camps will have lots of hands-on experience and will be run by teen leaders of the 4-H community. A small fee will be charged and parents must provide transportation to and from the 4-H Center located on Route 113 between Routes 73 and 29. Scholarships will also be available.

Please consider these great summer opportunities and mark them on your summer calendars! Brochures and registration forms will be available shortly. Call the 4-H office at (610) 489-4315 to request one. Inquiries about the Animal Science day camp should be directed to Nancy Kadwill and questions about the Environmental Day camp to Ann Wetzel.

WOODS

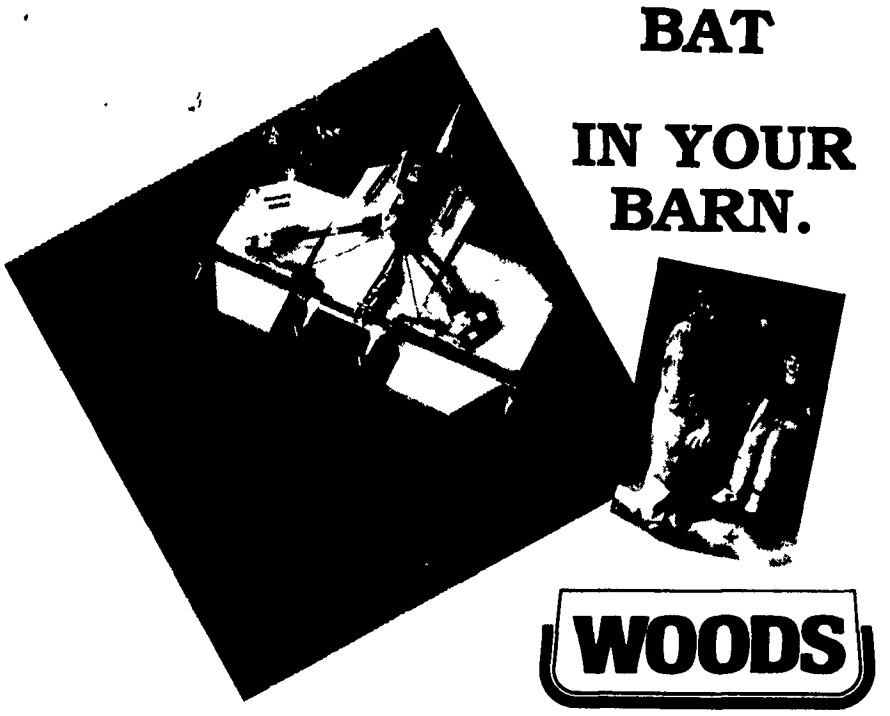
Advantage: Woods

No matter how you look at medium-duty Batwing® rotary mowers, Woods New MD315 has the advantage. Feature for feature the MD315 is a leader...and the ideal choice for maintaining ARP acres plus a wide variety of commercial mowing applications. See for yourself.



WOODS

PUT A BAT IN YOUR BARN.



WOODS

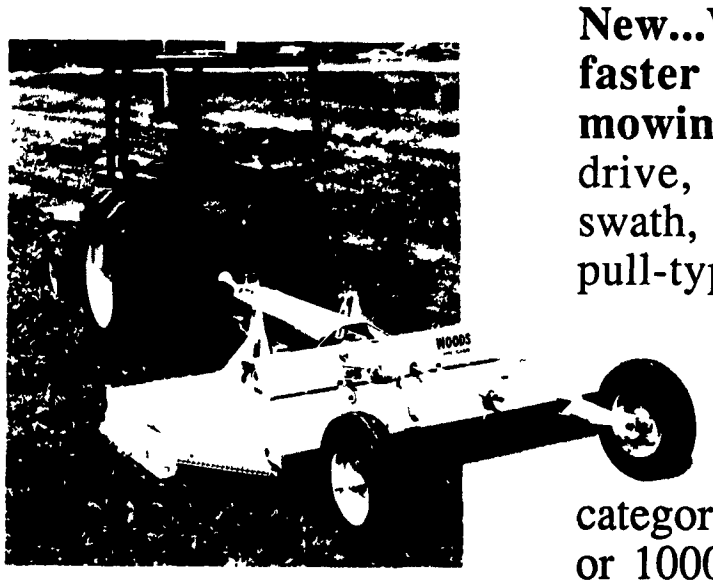
WOODS BATWING 3180

The toughest mower we've ever built. It features heavy-duty deck construction, high-speed blades, and drivelines that can handle 40% more torque than many competitive mowers. And it's backed by Woods' national parts and service network. What's more, the 3180 Batwing comes complete with a 36 month gearbox warranty, for years of trouble-free, high-performance mowing.

Bag yourself a Bat. The 3180 Batwing. At your local Woods dealer now.

WOODS

MODEL 121



New...WOODS Model 121 now offers faster blade tip speed for improved mowing performance. Model 121 gear drive, 2 spindle mower, cuts a 10 ft. swath, is available in either mounted or pull-type models. The 121 is ideal for mowing grass and weeds, clipping pasture, cutting brush and shredding stalks. Designed for tractors rated 40 to 80 hp with standard category 2, 3-point hitch and either 540 or 1000 rpm PTO.

Jani Burke Wears Bradford Dairy Princess Crown

CAROLYN N. MOYER
Bradford Co. Correspondent

EAST SMITHFIELD (Bradford Co.) — "I'm totally shocked," said Jani Burke, daughter of Gary and Edith Burke, of Sugar Run, after being crowned Bradford County's new Dairy Princess. "The competition was really good this year."

Indeed, Ms. Burke was not the only one to feel that the competition was tough. Judges Charles Ruslavage, retired health and physical education teacher from Clarion University, Tonya Martin, 1991 Pa. First Alternate Dairy Princess, and Stephanie Myers, New York Dairy Princess coordinator, had the arduous task of selecting the new dairy princess and her court from a field of five talented contestants.

Chosen as the first alternate was Kirsten MacBride, daughter of Robert and Deborah MacBride, of Troy, while Danielle Pepper, daughter of Edward and Pamela Pepper, of Canton, will wear the second alternate banner.

Other contestants in the pageant were Carrie Green, daughter of Randy Greene of Canton and Nancy Greene also fo Canton, and Ellen Keeney, daughter of William and Bonnie Kenney of Wyalusing.

As part of the pageant held at the SRU Middle School in East Smithfield, Saturday, June 4, each contestant had to present a skit and answer an impromptu question.

Ms. Burke inspired the crowd as she whipped the mbmers of her "cream team" into shape. "Welcome to the Bradford County "Cream Team Training Camp. I'm your coach, Milk Daily, and I'm here to coach you to a gold medal. Being chosen for this team is a great honor and you should be proud to represent your county."

She condtinued to give her team the facts that they would need to work hard to promote their sponsor, "Real".

Ms. MacBride carried the audience back in time tot he days of the knights in shining armor as she told the story of the Knights of the Butterchurn as they reigned victorious in the king's dairy tournament, because they drank plenty of milk.

Posing as "Nellie, the singing cow," Ms. Pepoer said, "I teach people just like you, the important facts about dairy products, things like, June is dairy monthy and things with the real sealon them contain vitamins like A and D and calciumand riboflavin and many more minerals." She then reminded the crowd to "Take a little drink for a healthy body and a pearly white smile."

1993 Bradford County Dairy Princess Amy VanBlarcom, crowns Jani Burke the 1994 Bradford County Dairy Princess at the pageant.

Carrie Greene made the transition from a non-milk drinking teenager who knew nothing about dairy products, to one who drank plenty of milk after learning more about it while completing a school project.

In her skit, Ms. Keeney told the audience where milk comes from and how it reaches the consumer using cut-out pictures. She reminded people of all the dairy products and about looking for the real seal.

Each contestant was also asked to respond to the judges' question, "Most of the non-dairy public looks at a dairy princess as a beauty contest winner. What can you do to change this image?"

Answers centered around the work that each contestant must do to prepare for the pageant and the knowledge of the industry that each girl must posses.

Ms. Burke received her crown from outgoing Bradford County Dairy Princess Amy VanBlarcom. "Thank you to everyone here this evening, for the support of the dairy industry and your support for me. Before this evening began, Stu Rosengrant asked me if I would need a roll of paper towels. I told him, 'No, I can handle it. I survived the year as dairy princess." Well," said a tearful Ms. VanBlarcom, "I guess I proved myself wrong."

Following up on last year's performance, Ms. VanBlarcom reminded the crowd of her belief, "If you believe it, and conceive it, then you can achieve it." I believe

(Turn to Page B17)

Five dairy maids will assist the Bradford County Dairy Princess and her court. They are from left, Stacey Mattocks, Desirae Pepper, Robin Wilson, Christina Saxton, Kimberly Davis and Holly Mattocks.

Dairy Recipe Extravaganza

(Continued from Page B8)

BLUEBERRY STREUSEL MUFFINS
(Yields 12)

1 cup milk
¼ cup melted butter
1 egg
1 teaspoon vanilla
2 cups unbleached flour
½ cup sugar
1 tablespoon baking powder
½ teaspoon salt
1¼ cup fresh blueberries or 1 cup thawed and drained frozen blueberries
Topping:
½ cup flour
¼ cup brown sugar
½ cup soft butter

Preheat oven to 400 degrees. Grease a 12-cup muffin pan. Beat milk, melter butter, egg and vanilla with a rotary beater. Combine flour, sugar, baking powder and salt and add to liquid ingredients, stirring just until blended. Batter should be lumpy. Gently fold in blueberries. For topping, combine flour and brown sugar and mix well. Cut in soft butter with fork until mixture particles are the size of small peas. Spoon batter into muffin cups. Sprinkle topping evenly over muffins. Bake for 15 to 18 minutes, or until they reach a light golden brown color.

These muffins are delicious. They don't stay around long at our house. I often double the recipe. My husband Arlan and I are kept busy with milking cows and farming. We also enjoy our children, Justin, 6; Matthew, 4½ ; and Heidi, our darling little daughter, who is 9½ months old. Also we give thanks for Andy, Rodney, Randy and Albert who help us when we are busy and need an extra hand with the milking.

Louise Kurtz
Morgantown

Heidi Louise Kurtz is a new addition on the farm.

FRUIT AND YOGURT PIE

2 containers (8 ounces each) of fruit-flavored yogurt
3½ cups whipped topping
½ cup mashed fruit to complement fruit-flavored yogurt
9-inch graham cracker crust

Fold yogurt into whipped topping, blend well. Add fruit and spoon into crust. Freeze until firm, about four hours. Remove 30 minutes or longer from freezer for softer texture before cutting. Keep chilled in refrigerator. Garnish with additional whipped topping and fruit if desired. Store any leftovers in freezer.

We are a dairy farm family that uses lots of dairy products. We have two children, Dwight, 4, and Melinda, 2.

Irvin and Anna Mae Wenger
Lititz

Justin and Matthew Kurtz enjoy their mother's blueberry muffins.

CREAM CHEESE PECAN PIE

8-ounces cream cheese, softened
½ cup sugar
1 egg, beaten
½ teaspoon salt
1 teaspoon vanilla
10-inch unbaked pie shell
1¼ cups pecans, chopped

Cream together softened cream cheese, sugar, beaten egg, salt and vanilla. Spread over bottom of unbaked pie shell. Sprinkle pecans evenly over cream cheese layer. Topping:

3 eggs
¼ teaspoon salt
1 cup light corn syrup
1 teaspoon vanilla

Combine all topping ingedients and beat until smooth. Pour over pecan layer. Bake 35 to 45 minutes at 375 degrees until pecan layer is golden brown.

Rosella Shirk
Mifflinburg

BAKED MACARONI AND CHEESE

1½ cups elbow macaroni
4 tablespoons butter
2 cups milk
Dash pepper
2 cups Velveeta cheese

Cook macaroni in boiling, salted water until tender; drain. Place in 1½ quart casserole dish. Add butter, milk, pepper, and cheese. Bake at 350 degrees for 45 minutes or until bubbly and browned. Makes 6 to 8 servings.

We're the Brants: Curtis, Donna, Carrie, Kellie, and Evan. We farm in Fulton County with Curtis's parents. Our children's ages are 13, 9½ , and 3½ years old. We are members of the Pleasant Ridge Church of the Brethren. In the summer, we enjoy dipping ice cream with the Fulton County milk promoters at our local fairgrounds.

This recipe is one our family enjoys at home and on picnics.

Donna K. Brant
Harrisonville

TRADITIONAL BUTTERMILK BISCUITS
12 biscuits

1¼ cup flour
2 teaspoons baking powder
½ teaspoon baking soda
1 teaspoon sugar
¼ teaspoon salt
¼ cup butter
⅔ cup buttermilk

Combine dry ingredients in bowl. Cut in butter until mixture resembles coarse crumbs. Stir in buttermilk until dry ingredients are moistened. Form dough into a ball. Turn out onto well-floured surface. Knead gently 10 to 12 times. Roll dough to ½ -inch thickness. Cut into biscuits using a 2½ -inch in diameter biscuit cutter that is dipped in flour. Place on unbuttered cookie sheet. Bake at 450 degrees for 10 to 12 minutes or until golden brown on top. Serve warm.

My father-in-law gets your paper, he is retired from farming and we live upstairs and he is downstairs.

I always look at the recipe column and use many of the recipes and look forward to new ones.

We have three girls, 20, 18, and 9 years. My husband is self-employed.

Sondra Sanger
Lebanon

SPAMBURGERS

½ pound American cheese
1 can Spam or 12-ounces pork roll
1 medium onion
2 tablespoons mayonnaise
3 tablespoon milk
1 tablespoon pickled relish
3 tablespoons ketchup

Grind together meat, cheese, and onion. Add other ingredients. Mix well. Spread on hamburger buns and wrap in aluminum foil and bake at 250 degrees for 30 minutes. Freezes well.

Try these for your next picnic or make a bunch and stick them in the freezer for those days when farm life seems so busy and you wonder, what's for lunch.

Our family lives on a dairy farm of 85 cows and 175 acres. We have a herdsman and Nelson takes care of the remainder. He also works closely with his father. As a farmer's wife, I sew clothes for myself and our two girls, do garden work, can all my vegetables, mow lawn, and run for farm parts. We love being on a farm where we can enjoy God's creation.

Melinda Weaver
Quarryville

POP-UP PIZZA CASSEROLE

1½ pounds ground beef
½ cup chopped onion
⅛ teaspoon minced garlic
2½ cups pizza sauce
8 ounces mozzarella cheese slices

Brown beef and add remaining ingredients. Simmer 5 minutes. Pour into 9x13 glass casserole dish. Top with cheese slices.

Popover Batter

1 cup milk
1 tablespoon vegetable oil
2 eggs, beaten
1 cup flour
½ teaspoon salt
½ cup parmesan cheese

Mix well, pour over mozzarella cheese slices, covering completely. Sprinkle with parmesan cheese. Bake 25 minutes at 400 degrees. Makes 10 servings.

Anna Musser
Manheim

MOCHA PUDDING

Cook together:

1 large package cooked vanilla pudding
3 cups milk
1 tablespoon instant coffee

Cook mixture until it comes to a boil. Cool. Whip into pudding:

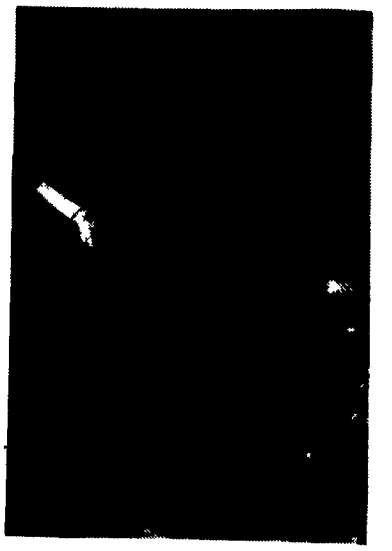
8-ounces whipped cream topping

Layer pudding in dish with:

Chocolate cookies, crushed

Sprinkle cookie crumbs on top.

Shirley Horning
Stevens



Nelson and Melinda Weaver with Gwendolyn and Cheryl live on a Quarryville farm.

VANILLA ICE CREAM
For 6-quart freezer

Dissolve 1½ tablespoons unflavored gelatin in 6 tablespoons cold water. Add to 1¼ quart warm milk

Beat 6 eggs well.

Add 3 cups sugar; stir well.

Add 1 quart cream, 1 can evaporated milk, vanilla flavoring.

Pour into freezer, fill with ice, crank until firm.

Ruth Stoltzfus
Paradise

MOTHER'S OLD-FASHIONED TAPIOCA

½ to ¾ cup tapioca
2 quarts milk, scalded
4 eggs
4 teaspoons vanilla
1½ cup sugar

Beat together eggs and sugar.

A secret from mother:

When milk is hot, take a cup of milk out of pan and mix in with milk and egg mixture. Then pour back in hot milk and stir until nice and creamy. That keeps it from curdling. (Do not let milk cook.) Low heat all the time — mixture will set as it cools. I always take it off of heat before it's too thick.

We live on an 80-acre farm with an average of 40 cows. The men are busy in the field. All the work is done by horse-drawn teams. It's really a challenge to get crops planted in time

Also, we sell strawberries in June. They are organically grown — no spray is used. We sell them locally. Our farm is located on Temperance Hill Rd., on Orange Street, off Rt. 501 beside the Kountry Kupboard. Fresh berries are a big hit with tapioca pudding!

Mrs. Henry Stoltzfus
Lititz

Dairy Recipe Extravaganza

(Continued from Page B14)

CHEESE CAKE

8 ounces cream cheese
12 ounces evaporated milk (cooled)
1 cup sugar
3 ounces Jell-O (any flavor)
1 teaspoon vanilla
8 double graham crackers
1 tablespoon butter

Prepare the Jell-O, but use only 1 cup of hot water, and set aside to cool. Mash the graham crackers and mix with the butter. Pat in the bottom of an 8½ -inch by 11-inch pan, reserving a little to sprinkle on top. Beat the cooled milk and vanilla in one bowl, then beat the sugar and the cream cheese in another bowl. Add the cooled Jell-O to this mixture and beat again. Then add this mixture ot the milk/vanilla and beat again. Pour gently on the graham crust, add the remaining crumbs on thte top, and refrigerate several hours until it is set. Note: Please remember not to use the 2 cups of liquid that the Jell-O package normally requires.

My children liked this recipe very much, but they are grown now and living on their own. When they were young, we had a dairy farm with Holsteins.

Lois M. Pifer
Reynoldsville

Jenalee Nicole Shields is on the phone with Grammy Pifer. Jenalee says, "Grammy, can I come to see the Guernseys?" Jenalee is the granddaughter of Mr. and Mrs. Warren Pifer, Reynoldsville, and daughter of Carol and Larry Shields, Summerville.

CHEESE CAKE

½ cup butter, softened
1 pack graham crackers

Combine with ½ teaspoon of lemon extract. Press into greased springform pan, reserving ¼ cup.

½ cup cugar
2½ teaspooons lemon extract
2½ pounds cream cheese
1¼ cup sugar
3 tablespoons flour
1½ teaspoons orange extract
½ teaspoon vanilla
5 eggs, unbeaten
½ cup whipping cream
2 egg yolks

Beat cream cheese, sugar, flour, orange, and vanilla until fluffy. Add eggs and egg yolks one at a time. Stir in cream. Sprinkle remaining crumbs on top.

Bake at 250 degrees after one hour. Turn off oven. Leave in more than 1 hour, then remove and cool at room temperature. Remove from pan.

We live on a farm. We have about 34 Jersey cows.

My brothers' names are John David, Samuel Jay, Jonathan Jay, and Elen Ray. My parents' names are Isaac L. and Mary Lou Fisher.

Mary Louise Fisher
Coatesville

Chad, Brett, Drew, and Dove are the children of Steve and Gina Reinford of Mifflintown.

COTTAGE CHEESE PIE

1½ cups small curd cottage cheese
¼ teaspoon salt
1½ cups sugar
1 large can evaporated milk
3 heaping tablespoons cornstarch
3 egg yolks
2 cups milk
3 egg whites, beaten

Mix all the ingredients, adding egg whites last. Pour into two 9-inch pie shells. Bake at 400 degrees for 15 minutes, and then at 350 degrees for 30 minutes.

To make our favorite pumpkin pie, I substitute 1½ cups mashed pumpkin and 1½ teaspoon pumpkin pie spice in place of the cottage cheese.

This recipe was given to me by my mother in law. It is our favorite cheese pie because it is so light and delicious served with molasses.

We live on a dairy farm in Juniata County where we milk 90 cows. My husband's name is Steve and we have four children, Chad, 11, Brett, 8, Drew, 6, and Dove, 3.

Along with cooking and baking, I enjoy reading, piecing quilt tops, restoring our old farmhouse, and trying out new recipes from the Lancaster Farming. But my greatest joy is watching our four children grow up enjoying all that country living has to offer.

Gina Reinford
Mifflintown

RHUBARB FORTE

Graham cracker crust for bottom:

2 cups graham cracker crumbs
½ cup brown sugar
¼ cup melted butter

Pat into a 13-inch by 9-inch pan, bake at 350 degrees for 8 minutes. Cool.

2 cups granulated sugar
3 tablespoon cornstarch
8 cups diced rhubarb
1 cup water
1 small box strawberry gelatin
1 recipe graham cracker crust
8 ounces whipped cream topping
2 cups mini-marshmallows
1 small box vanilla pudding (cook type, prepare as on package, cool).

Combine sugar and cornstarch, stir in rhubarb and water. Cook and stir until thickened, reduce heat, and cook 2-3 minutes. Add gelatin, stir until dissolved. Spread on top of cooled graham cracker crust, cool. Fold marshmallows into whipped cream. Spoon on rhubarb mixture. Prepare pudding. Cool, then spreads over all. Sprinkle reserved crumbs over top. Chill. Makes 12-15 servings.

Eva M. Martin
East Earl

John and Jackie enjoy working on the Zilnicki family's potato farm in New York.

BAYOU BROCCOLI

1 small box instant rice
1 package frozen, chopped broccoli
½ cup onion, chopped
½ cup celery
¼ pound butter, melted
8-ounces Cheez Whiz
1 can cream of mushroom soup

Prepare rice and broccoli according to package directions. Saute onion and celery in a small amount of butter in skillet. Combine sauteed vegetables, rice, broccoli, and butter. Melt Cheez Whiz in soup and ½ cup water in saucepan. Stir in broccoli mixture, blending well. Spoon into large greased casserole dish. Bake at 350 degrees for 30 minutes. Serves 8 to 10 people.

This is one of my family's favorite recipes except for Dad, who doesn't like broccoli. I live on a dairy farm in the hills of Sullivan County and attend Sullivan County High School, where I am a senior. I plan to further my education by attending Lock Haven University this fall. I have enjoyed my year as Sullivan County Dairy Princess, but it has been a busy one. I have made many new friends and met so many people during my reign. Even though I was dairy princess, I still have my daily chores of feeding calves and helping around the barn to do. I am active in 4-H and spent several weeks last summer in Japan through the Penn State International Program.

Amy Warburton
Sullivan County
Dairy Princess

JOANNE'S SCALLOPED POTATOES

4 to 5 cups sliced potatoes
3 tablespoons butter
3 tablespoons flour
3 cups milk
1 onion, diced
1½ cups grated cheese
Pepper
Garlic powder
Bread crumbs

Cook potatoes for 20 minutes or until glossy. Melt butter in pan; blend in flour. Add milk, stirring constantly. Heat until thick and smooth. Remove from heat; add cheese and seasonings. Spoon potatoes into medium-sized, greased casserole dish; arrange onion over potatoes. Pour cheese over the potatoes and onions. Sprinkle top with bread crumbs.

Bake in a 350 degree oven for 45 minutes. Serves 8 people.

I entered this recipe in a local cookbook before I was married.

Growing up on a potato farm on the east end of Long Island always meant we had plenty of potatoes available. This recipe for scalloped potatoes is one of the family's favorites, and mostly requested for family gatherings. My two children, John and Jackie, enjoy the scalloped potatoes with a little ham chopped up and added to them. They love to help on the farm.

Enjoy the paper — especially Section B.

Joanne Zilnicki
Riverhead, N.Y.

Amy Warburton, Sullivan County Dairy Princess

CORN PUDDING

½ cup butter
2 large onions, diced sauteed onions and butter
16 ounces sour cream
1 egg, slightly beaten
16 ounces creamed corn
16 ounces whole corn
2 packages corn muffin mix
1 teaspoon garlic salt
½ teaspoon black pepper
½ teaspoon ground cayenne

Mix everything well and pour into greased casserole. Bake in 350 degree oven. Serves 8.

My husband and I enjoy the Lancaster Farming. Of course the B section is the favorite of my daughter and I.

The recipe that I include is the favorite I gave the recipe to some friends and goes well in pot luck parties.

Our family consists of six members, Stephanie and Alex, 19 years old, Michael, 18, Janice, 15. Janice is in Junior Honor Society, enjoys cooking, won a contest at age 12 for the grange making sponge cake.

The two older kids are in the Air Force. Michael graduates from high school soon. This summer as a family project we have planned a school called Le Petite Cuisine, a culinary school for children ages 8 to 14, both girls and boys. We look forward to more recipes.

Irene Schmidt
Accord, N.Y.

Dairy Recipe Extravaganza

(Continued from Page B15)

Jim Rupert takes Jonathan for a ride.

WARM AND GOOD PINEAPPLE CASSEROLE

1 cup granulated sugar
½ cup butter
4 eggs
¼ teaspoon salt
½ cup milk
12 slices bread, cubed
4-ounce can pineapple chunks and juice

Mix sugar and butter. Add eggs, salt, and milk. Stir in bread and pineapple chunks, including juice. Pour mixture into 2-quart buttered casserole dish. Bake at 350 degrees for one hour. Serve warm.

This one is a hit at covered dish get-togethers.

Our family has yet to find our dream farm, but not from lack of trying. We've even packed up the two kids, Michelle, 9, and Jonathan, 6, and looked in Kentucky — twice. This is my husband's dream. I'm a city slicker and not too sure what he's trying to get us into, but we all love animals and the outdoors, so we'll see

We enjoy ***Lancaster Farming*** *and I've gotten lots of great recipes from your paper and added to our family favorites.*

Connie Rupert
Lititz

OREO COOKIE DESSERT

1 cup milk
½ cup peanut butter
8 ounces cream cheese
12 ounces whipped cream topping
2 cups confectioners' sugar
30 Oreo cookies

Break up cookies. Put on bottom layer (save few for top). Mix remaining ingredients, then blend in whipped topping. Top with remaining cookie crumbs.

Nancy Hershey
Manheim

COUNTRY CHEESE SNACKS

1 cup mayonnaise
1 cup grated parmesan cheese
8-ounces cream cheese
2 green onions, minced

Combine ingredients and spread on party rye bread slices. Broil 4 minutes or until browned and bubbly. Garnish with green olive slices. Makes 4 dozen

My husband John is a grain and hay grower. We live near the Finger Lakes, outside Rochester, N.Y. Our daughters, Linnell, 7, and Serita, 4, enjoy helping on the farm and in the garden. In my spare time, I make quilts for sale

Barbara Randall
Holcomb, NY

CHEESE SOUP

4 cups water
3 chicken bouillon cubes
1 onion, chopped
2 cups potatoes, chopped
2 cans cream of chicken soup
1 bag of frozen mixed vegetables (12 ounces)
½ pound Velveeta cheese

In a large kettle (about 6 quarts), cook 2 cups of water, 2 bouillon cubes, potatoes, and onions until soft. (Coarsely mash this with my old-fashioned potato masher.)

In a smaller kettle (2 quarts), cook 2 cups of water, 1 bouillon cube, and vegetables. Also add a stalk of broccoli.

When vegetables are cooked, add them and the remaining ingredients to the large kettle and simmer (do not boil) until heated thoroughly. Add milk if you don't like thick soup.

Each year I think about submitting a recipe to this dairy products' salute, but so many of my recipes came from your newspaper! I like ***Lancaster Farming's*** *recipes because they are my kind of cooking, and you never have to go to the grocery store for some exotic ingredient that you will probably never use again.*

I grew up on an "all-purpose" farm and married a "town boy," who has me back on a 5-acre horse farm. We have four horses, a flock of chickens, cats, a dog, and, at various times, we've had sheep, cattle, turkeys, a corn field, an alfalfa patch, and a large garden. (I will not allow a cow because I'm the only one who knows how to milk, although I drink milk by the gallon!)

The recipe I sent I obtained from my pastor's wife. I chose it because it is one of my 9-year-old grandson's favorites. My husband always says "No soup in the summer. It's too hot." So last August, when everybody starts teasing kids about going back to school — "No more swimming, no more vacation, etc." — my grandson looked at me and said, "That's OK, Mom-Mom. If summer's over, now we can have cheese soup again!"

Thanks for all the good recipes!

Marian Roseboro
Denver

Shawn Louis, 9, is grandson of Marian Roseboro.

CHOCOLATE PUDDING CAKE IN THE MICROWAVE

2 tablespoons butter

In a round microwave cake pan, melt the butter on high for 45 seconds. Set aside.

1 cup sugar
3 tablespoons cocoa
1¼ cups hot water

In a 2-cup measure, stir together the sugar and cocoa. Add water, stirring to combine. Microwave on high about 6 minutes until it boils. Meanwhile, take the melted butter and add:

1 egg
½ cup milk
½ teaspoon vanilla

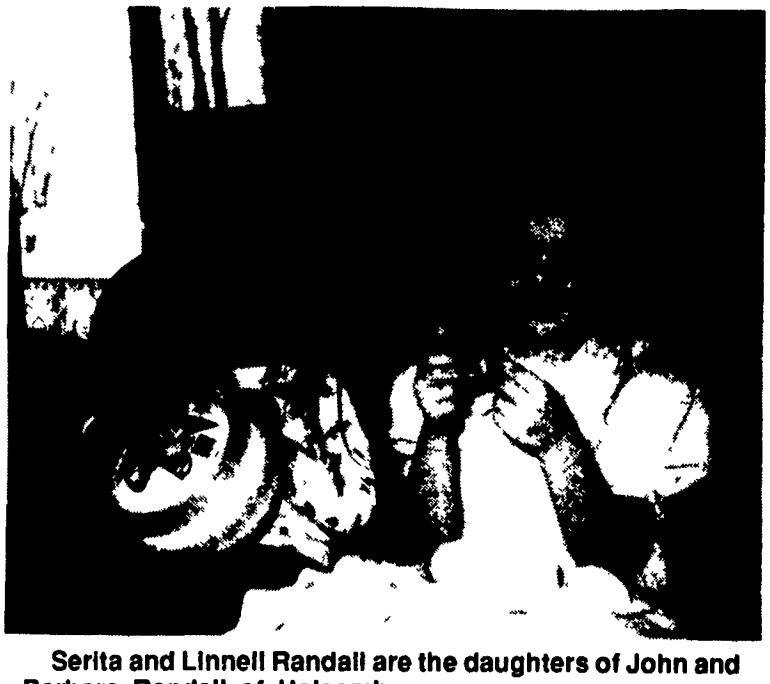
Stir well, then add dry ingredients:

1 cup flour
1 teaspoon baking powder
¼ teaspoon salt
¾ cup sugar
3 tablespoons cocoa
½ cup chopped nuts (optional)

Stir to mix well and spread evenly in cake pan. When water mixture in microwave is boiling, remove and gently pour over top of batter in cake pan. Microwave uncovered on medium for 16 minutes. Rotate every 5 minutes if your oven cooks unevenly. Let stand to cool about 10 minutes. Serve warm with vanilla ice cream. Serves 6.

We manage the farm for Philhaven Hospital. We raise 110 acres of corn and alfalfa. We milk 100 cows and raise all the heifer calves. There is a small petting zoo for the patients to enjoy, which includes goats, sheep, calves, pigs, a pony, rabbits, cats, and a dalmation dog. We have 5 sons ages 11 to 20 years.

Aaron and Ruth Shirk
Lebanon



Serita and Linnell Randall are the daughters of John and Barbara Randall of Holcomb.

DIRT PUDDING

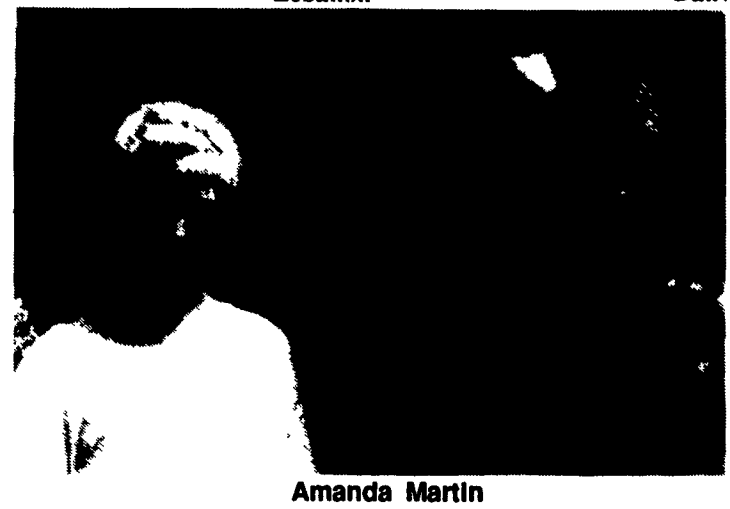
2-quart plastic flowerpot, unused
Artificial flowers
Child's sand shovel, unused
16 ounces Oreo cookies, crushed in food processor
¼ cup butter, softened
8 ounces cream cheese
1 cup confectioners' sugar
2 small packages instant French vanilla or chocolate pudding
3½ cups milk
8 ounces whipped toppings

Beat together butter, cream cheese, and confectioners' sugar; set aside. Beat together pudding and milk, then add whipped topping. Beat together all ingredients except cookie crumbs.

To assemble, put some of the cookie crumbs in the bottom of the flower pot. Pour some of the pudding mixture over the top, then make more layers of cookies and pudding, ending with cookies. Wrap flower stems in plastic wrap and stick into center of pot. For an extra touch, put some gummy worms in the dirt. Chill, then serve with sand shovel.

I live on a dairy farm with my parents Kathy and Gene, and my sister Allison and brother Andy. I'm a member of No-So-Ann Dairy Club. I have five Holstein animals, including a cow named Angel who likes to produce milk.

Amanda Martin
Lebanon



Amanda Martin

DOUBLE DECKER KNOX BLOX SNACKS

3 envelopes of unflavored Knox
3 3-ounce packages flavored gelatin
2½ cups boiling water
1 cup heavy cream

Combine Knox with flavored gelatin in large bowl. Add boiling water and stir until completely dissolved. Slowly stir in cream. Pour in shallow 9x9-inch pan. Chill until firm. Cut into one-inch squares.

I enjoy ***Lancaster Farming*** *especially Section B. We live in the country on approximately 10 acres. We have six adult geese, 7 goslings, plus two nesting. Also have some mallard ducks.*

Dottie Kemmerling
New Tripoli

MOTHER'S SUGAR COOKIES

3 eggs
2 cups sugar
1 cup shortening
1 tablespoon vanilla
1 cup buttermilk
2 teaspoons baking soda
1 teaspoon cream of tarter
4 cups flour

Bake at 350 degrees for 12 to 15 minutes. Mix eggs, sugar, and shortening until light and fluffy. Then alternately dry ingredients with buttermilk until mixed together. Add vanilla. Drop on greased baking sheet.

Jean Runyon
Willow Hill

THE BIG APPLE

1 gallon fresh cold milk
12 ounces apple concentrate
1½ quarts vanilla ice cream, softened
Cinnamon
Nutmeg

Add all ingredients in a large bowl and beat until frothy. Pour into a punch bowl. Add cinnamon and nutmeg to taste. Makes about 25 servings.

My family and I live on a dairy farm in northeastern New York. We milk about 36 Holsteins, with some Brown Swiss, Jerseys, and one Ayrshire. We also have pigs, goats, a horse, and a pair of mules. This recipe is great for gatherings or dairy promotion activities.

Sarah Van Orden
Catskill, N.Y.

PEANUT BUTTER CRUNCH PIE

⅓ cup peanut butter
⅓ cup light corn syrup
2 cups rice crispy cereal
1 quart vanilla ice cream, slightly softened

Mix together ingredients until cereal is well coated. Put in 9-inch greased pan. Chill until firm. Add ice cream. Freeze.

A few minutes before serving, place on hot, wet towel to remove pie pieces easily.

We are dairy farmers in Northumberland County.

Lloyd and Verna Zimmerman
Danville

OVEN FISH CHOWDER

2 pounds cod or haddock fillets, cubed
4 potatoes, peeled and cubed
Few celery leaves, chopped
1 bay leaf
2½ teaspoons salt
4 whole cloves
1 clove diced garlic
3 onions, sliced
½ cup butter
¼ teaspoon dried dill seed
¼ teaspoon white pepper
½ cup dry white cooking wine

Put the ingredients and two cups boiling water in a 3-quart casserole, cover and bake in 375 degree oven for one hour. Then, heat to scalding:

2 cups light cream

Add to chowder. Serve with garnish of chopped dill.

We're a hillside farm in east-central Vermont. We raise replacement Holstein heifers, cross-bred beef, and do custom cropping and maple sugaring in partnership with my husband's brother and his wife.

My widowed father-in-law lives on a smaller place about six miles from us and at 80 years old still has more than 20 bred Percheron and Belgian mares, some of which are having their first crop of mule foals.

We're starting the first mowing today and it looks to be a very heavy crop.

Lucy Button
Chelsea, Vt.

Bradford Dairy Princess

(Continued from Page B12)

in the dairy industry and I conceived the goal of bettering myself by achieving this as the Bradford County Dairy Princess." She also thanked the people of Bradford County for their support and sent special thank yous to her parents, Jim and Darlene VanBlarcom, her family, alternates, Kirsten MacBride and Angel Butchere and dairy princess coordinator Arlene Wilbur. She then performed a continuation of the rap that she performed at last year's skit.

Second alternate Angel Butcher also bid farewell to the people of Bradford County. She thanked everyone for being good friends and for support throughout the past year and highlighted a few things that she learned.

"I have learned that everyone, especially children, is eager to learn about the dairy industry. It's really been a wonderful experience that I'll never forget."

Assisting the dairy princess and her court will be five dairy maids. They are Stacey Mattocks, daughter of David and Gail Mattocks of Troy; Desirae Pepper, daughter of Edward and Pamela Pepper of Canton; Robin Wilson, daughter of Gordon and Mable Wilson of Rome; Christina Saxton, daughter of Stephen and Susan Saxton of Columbia Cross Roads; Kimberly Davis, daughter of Ronald and Sally Davis of Warren Center; and Holly Mattocks, daughter of David and Gail Mattocks of Troy.

Master of Ceremonies Senator Roger Madigan lead the events of the day. He noted that all the contestants are winners and he is proud to have so many people willing to promote the dairy industry.

"Someone spoke at a meeting a few weeks ago that I attended, and pointed out the real importance of our dairy princess pageant and dairy promotion," said Senator Madigan, "that we are two generations away from all of us growing up on the farm. Today there are only about 2.6 percent of the population directly involved in farming, but we impact on 100 percent of the consumers."

The pageant was the culmination of a weekend full of events, including a meet-the-candidates dinner on Friday and a dairy festival, complete with parade, contests and plenty of food on the morning of the pageant.

Past Bradford County Dairy Princesses in attendance were Viola McQueen Metzger, 1963; Hope McMurray Thompson, 1989; Robin Wilbur, 1991; and Mercy Keeney, 1992. Also attending the pageant were New York State First Alternate Dairy Princess LIllian Lunde and Pennsylvania Ayrshire Princess, Karen Neville.

Members of the Bradford County Dairy Promotion Committee inlcude Larry Brown, president; Kim Seeley, vice-president; Kathy Wanck, secretary; Stu Rosengrant, treasurer; Arlene Wilbur, dairy princess coordinator; Janet Leiws, Traci Thompson, Bonnie Keeney and Steve Pelton.

The new dairy royalty in Bradford County are, from left, Second Alternate Danielle Pepper, Dairy Princess Jani Burke, and First Alternate Kirsten MacBride.

SUMMER CHEESE DELIGHT

14 cinnamon crackers
8 ounces cream cheese
¾ cup sugar
3 eggs yolks
1 teaspoon vanilla
1 cup cream, whipped
3 egg whites, beaten

Crush crackers and put in 10-inch pie plate. Save a few crumbs for top. Beat cream cheese, sugar, egg yolks, and vanilla until smooth. Then mix cream cheese mixture, whipped cream, and beaten egg whites together. Pour mixture on top of crumbs and top with crumbs. Freeze 2 hours or up to two weeks. Partially thaw and serve with with thickened fruit.

My husband and I are 65 years old, but he still grows crops and raises heifers for the two sons who are full-time dairy farmers. I put in a big vegetable gardens for us and Allen's father and tend ½ dozen apple trees, one cherry, and one pear tree

I mow our big lawn and a neighbor widow's lawn with our riding mower Allen does his father's lawn I like to share garden things with the family

Allen is pastor of a mountain mission church and we try to visit several older folks regularly.

Anna May Strite
Clearspring, Md.

CHEESE CAKE

1 large package lemon Jell-O
1 cup boiling water
1 large package cream cheese softened
1 cup sugar
2 teaspoons vanilla
1 can evaporated milk

Dissolve Jell-O in boiling water and let cool Combine softened cream cheese, sugar, and vanilla Blend with cooled Jell-O Whip milk until stiff Fold into cheese filling

Crust

30 graham crackers
2 tablespoons confectioners sugar
½ cup butter

Melt butter and mix with crumbled crackers and sugar Line an 8x12 inch pan Place cheese filling in pan and chill

Greetings from Sugar Valley, a sweet place to live Our farm is located only two miles west of the Jersey Shore exit of Interstate 80

My husband Joe, farms about 75 acres After milking cows for more than 30 years we now do only crop farming hay and corn

Our three children have been away for quite some time Our oldest son Dana lives in Indiana Pa our second son lives in the area of Afton Wyoming and our daughter Laurie lives near Rocky Ford Colorado

We are thankful that we can see Dana and his family every month or so but visits to our western kids are less frequent We usually head West about twice a year Even so our four Western grandchildren change so much from one visit to the next They vary in ages from 8 months to 15 years Dana's son Danny is 8 years old and we enjoy having him close by He thinks it's great to go fishing with Pappy

I enjoy the many recipes in Lancaster Farming each week Joe likes to spend a quiet Sunday afternoon reading the whole issue We've subscribed to your paper for many years

BONNIE'S COOKIE ICE CREAM CAKE

1 pound crushed chocolate vanilla creme sandwich cookies
⅓ cup butter, melted
½ gallon vanilla ice cream
1 large jar fudge sauce or chocolate syrup
9 ounces whipped cream topping

Save ⅔ cup crushed cookies for topping. Place remaining in bowl and add melted butter. Mix together. Press in bottom of a 13-inch by 9-inch pan. Freeze 10 minutes. Spread soft ice cream over crumbs and freeze 15 minutes. Spread fudge on next. Freeze 15 minutes. Spread whipped topping on top and sprinkle rest of crumbs on top of whipped topping. Keep in freezer until ready to serve.

My name is Patricia Potter. I have a husband and two boys, ages 6 and 10. We worked on dairy farms for 10 years and for a year now, we've been living and working on a big Christmas tree farm here in Middleburg. We enjoyed dairy farming, and are finding out that Christmas tree farming is just as challenging as cows!

This recipe is a summer favorite with my family, especially after a hot day in the trees.

Patricia Potter
Middleburg

FOUR-LAYER CHOCOLATE DELIGHT

½ cup butter, melted
1 cup all-purpose flour
1 cup chopped walnuts
8 ounces cream cheese, softened
1 cup confectioners' sugar
12 ounces frozen whipped cream, thawed
2 packages (3.9 ounces each) instant chocolate pudding
3 cups cold milk

Combine first three ingredients and press into the bottom of a 13-inch by 9-inch pan. Bake at 350 degrees for 10 minutes. Cool. Meanwhile, beat cream cheese and sugar until creamy. Fold in 1 cup whipped cream. Spread over crust. Chill. Prepare pudding mixes with milk. Spread over cream cheese layer and spread remaining whipped cream on top. Refrigerate for three hours.

Gordonville

PINEAPPLE CHEESE TORTE

Pat-in-the-pan crust:
1 cup all-purpose flour
1¼ cups confectioner's sugar
¼ cup finely chopped almonds
⅓ cup butter, softened

Filling:
2 8-ounce packages cream cheese, softened
½ cup sugar
2 eggs
⅔ cup unsweetened pineapple juice

Pineapple topping:
¼ cup all-purpose flour
¼ cup sugar
20-ounce can crushed pineapple, juice drained and reserved
½ cup whipping cream
Fresh strawberries, optional

Combine crust ingredients and pat into the bottom of a 12x8x2-inch baking dish. Bake at 350 degrees for 20 minutes. Beat cream cheese in a mixing bowl until fluffy; beat in sugar and eggs. Stir in juice. Pour filling over hot crust. Bake at 350 degrees for 20 minutes or until center is set. Cool. For topping, combine flour and sugar in a saucepan. Stir in 1 cup reserved pineapple juice. Bring to a boil, stirring constantly. Boil and stir one minute. Remove from heat; fold in pineapple. Cool. Whip cream until stiff peaks form; fold into topping. Spread carefully over dessert. Refrigerate six hours or overnight. Garnish with strawberries if desired. Yield: 12 to 16 servings.

My husband and I and our two girls, Emmy Lou, 2½ , and Regina Mae, 16 months, live on a farm. I enjoy trying new recipes and always check ***Lancaster Farming*** for more.

POTATO CASSEROLE

2 pounds frozen hash brown potatoes
1½ cups sharp cheddar cheese, grated
2 teaspoons salt
¼ teaspoon pepper
10¾ ounces can cream of chicken soup
1½ cups sour cream
2 cups corn flakes, crushed
¼ cup melted butter

Mix all ingredients together, except corn flakes and butter. Pour into a 9-inch by 14-inch greased casserole. Crush corn flakes. Mix with butter. Spread on top of casserole mixture. Bake for 1½ hours at 300 degrees. Can be prepared ahead of time and frozen.

Marian Klinger
Klingerstown

HAWAIIAN WEDDING CAKE

1 package yellow cake mix
20 ounces crushed pineapples
8 ounces cream cheese
2 cups milk
3 ounces instant vanilla pudding
Whipped cream

Bake cake in oven according to directions on package. Punch holes in top of cake with a knife or fork. Cool 15 minutes. Spoon pineapples and juice over top of cake, allowing to penetrate. Beat together cream cheese, pudding mix, and milk. Pour thickened mixture over pineapples. Top with whipped cream to serve.

This is a very moist cake and tastes even better if stored in refrigerator for several days.

We live on a farm. My dad raises heifers and does sandblasting and painting. We have seven puppies.

Lititz

DELICIOUS POTATO SALAD

12 to 15 cooked and cubed potatoes
1 cup chopped celery
1 medium onion, chopped
3 hard boiled eggs
½ teaspoon salt
Parsley

Mix all together in a large bowl, set aside.

Dressing:
2 beaten eggs
1 tablespoon flour
½ teaspoon salt
¾ cup sugar
2 tablespoons vinegar
½ cup milk
1 cup mayonnaise
1 tablespoon butter

Make the dressing by melting the butter in a heavy skillet, and then adding all the dressing ingredients, except the mayonnaise. Boil until thickened. Cool slightly and then fold in mayonnaise. Pour dressing over potatoes and gently toss.

It will be 45 years this fall that my husband and I have been dairy farmers. We have seven sons. Three are farming with us. Altogether, we are farming close to 1,000 acres — 175 acres are potatoes, the rest grain, corn, and hay. We want to thank the Lord for our good health and 11 grandchildren.

Mrs. David M. King
Cochranville

MUFFINS THAT TASTE LIKE DONUTS

1¼ cups all-purpose flour
1½ teaspoon baking powder
½ teaspoon salt
½ teaspoon nutmeg
¼ teaspoon cinnamon
½ cup vegetable oil
¾ cup granulated sugar
1 egg
¾ cup milk
½ cup melted butter
¾ cup granulated sugar
1 teaspoon cinnamon

In a bowl, combine flour, baking powder, salt, nutmeg, and cinnamon. In another bowl, thoroughly combine vegetable oil, sugar, egg, and milk. Add liquid ingredients to dry ingredients and stir only to combine.

Shake muffins out of pans immediately and while hot. Dip in melted butter then sugar and cinnamon.

For a delicious variation: fill tins half full of batter, put in 1 teaspoonful jam, and spoon remaining batter on top.

Either use cupcake pan liners or grease muffin tins.

Bake at 350 degrees for 20 to 25 minutes.

This is an old recipe. I don't really know where it came from, but my mother use lard and oleo or homemade butter instead of oil and butter.

We were farmers. I'm the youngest of 5 (lost a brother and sister). I am 68 years old (me and my good watch dog still live in the old farmhouse). After I graduated from high school I stayed home all my life on the farm.

I married an automobile mechanic. Lost him; it will be five years this Christmas. He was disabled 20 years from heart problems and died from cancer. We had two boys, one is a lumberjack and the other a math teacher.

Gladys Stephens
Starrucca

ASPARAGUS AND BREAD DISH

Several slices bread
2 cups milk
4 eggs
Salt and pepper to taste
2½ cups cooked asparagus
1 small chopped onion

Beat eggs, add milk, onions, salt and pepper. Lay bread in buttered 9x9-inch casserole. Pour on milk mixture. Bake 25 minutes or until set in 350 degree oven Pour cooked asparagus on Top with cheese Return to oven until cheese is melted

Sylvia Lantz
Lititz

LIGHT AND CRISPY WAFFLES

1 tablespoon dry yeast
2 cups lukewarm milk
4 eggs, separated
2 tablespoons sugar
2 teaspoons vanilla
1 teaspoon salt
½ cup melted butter
2½ cups flour, sifted

Dissolve yeast in warm milk Beat egg yolks, add vanilla and salt. Mix into the yeast mixture Stir in melted butter, add flour and sugar. Combine thoroughly. Beat egg whites until stiff, carefully fold into batter. Let mixture stand about 45 minutes or until it doubles in bulk. Bake, then sprinkle with confectioners' sugar.

This recipe is a favorite with my family It goes well with bacon and eggs for breakfast or with ice cream sandwiched between two waffle squres for a delicious snack

On being a farm wife - And other hazards

Joyce Bupp

Gone.

But not forgotten. Because the reminders linger on.

They're there every time we open the car trunk — a pair of cylindrical, one-pound containers of table salt, loosely wrapped in a plastic grocery bag. Right next to the heavy garden shovel that's still kicking around in there.

Every time I load groceries in the truck, or haul recycling materials to the township building, I mentally remind myself to remove this residue of winter. Normally, I haul a container of bulk rock salt around with me through the cold months along with a shovel, equipment stashed against the possibility of having to shovel out of a snowbank somewhere.

When salt became worth its weight in gold along about February, regular table salt was the only kind available one particular day I shopped. Thankfully, it was never needed. Still there, it's a precautionary step in case of a June blizzard. And serves as a reminder not to complain about hot, humid, sweat-inducing weather.

Another lingering remembrance is the pile of gravel swept from the garage floor and the blacktop surrounding it. After sweeping up the collection of tiny stones and dust late one recent evening and not having figured out where to most usefully deposit it other than outside the door, I've since stumbled through it a couple of times.

Maybe the township road crew would like it back for reuse again next year.

Our partially-collapsed barn roof has since been winched back into place and only needs some minor, finish-up repairs. One small section of ceiling in the calf nursery still droops a bit from where snowmelt came through, another lingering remembrance.

When the water pipes in the old bank barn froze up, The Farmer substituted large tubs and hoses. Short a tub for a pen of young steers, he devised one by chainsawing off a section of a large, plastic barrel. After the fountains thawed, the white plastic tub was abandoned outside the pen.

After coveting that tub for several weeks, I finally scrubbed the cattle "residue" from it, filled it with soil and planted it with red impatiens. A matching one for the other side of the front porch would be nice, but there must be some easier way to get one than repeating last winter.

A glance over the countryside now belies the barren, bitter coldness that enveloped it just weeks ago. Mother Nature has recovered nicely from her seasonal extremes, though she's been a mite stingy lately with her moisture.

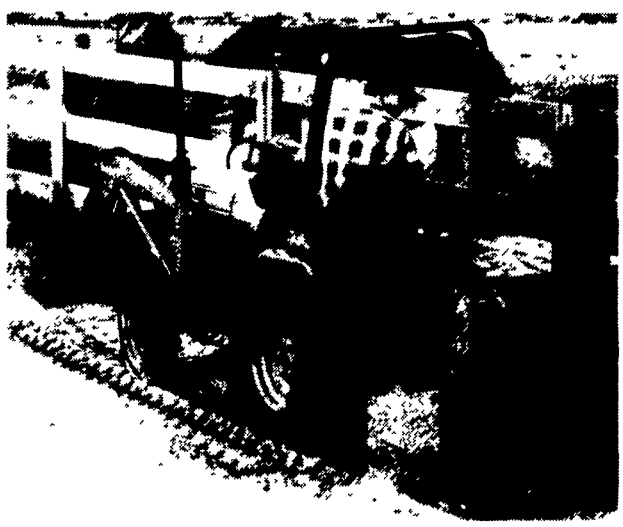
Barley is nearly ripe, alfalfa greening back up for second-cutting hay and corn stretching out to shade the bare ground beneath. Trees and bushes are re-leafing branches burnt bare by icy, drying winds and deep-freeze chills. An old hedge growing near the back porch looks scruffy on top, but is pushing more green sprouts from the ground than usual.

And the roses I feared were history instead look healthier than they have for a couple of years, sending up thick new canes from rootstocks insulated by the deep snow.

Fading into the fuzziness of memory, winter will long be remembered for its fury, its intenseness, its seemingly-endless duration. Building repairs, regrowing shrubbery, lingering accumulations of gravel and salt-killed lawns — and orchard friends with precious little harvest to look forward to - linger on.

Winter. Wiped out by the lush loveliness of June.

MULTIPLY YOUR EFFICIENCY



Kubota's B-Series compact diesel tractors have so many uses they'll actually multiply your efficiency around the homestead or farm.

On the B-50 Series, choose from 14-20 PTO horsepower tractors, all with standard mid and rear PTO. Put a sturdy 2 wheel drive model to work, or select a 4 wheel drive model with Kubota's optional, revolutionary Bi-Speed turn. Hydrostatic transmission is also available to save you footwork and time.

From home use to commercial applications, the B7100 HST 16 HP tractor is just right for all kinds of jobs. This tractor comes with hydrostatic transmission – that means there is no gear shift. And, the B7100 4WD compact tractor is powered by a Kubota liquid-cooled diesel engine.

See your neighborhood Kubota dealer today, and let them show you how a Kubota B-Series tractor can multiply your efficiency.

Kubota Tractor Corporation markets a full line of tractors through a nationwide network of over 1,000 dealers.

Dairy Recipe Extravaganza

(Continued from Page B18)

HAMBURGER CHEESE BAKE
(6 to 8 servings)

1 pound ground beef
½ cup chopped onion
16 ounces canned tomato sauce
1 tablespoon sugar
¾ teaspoon garlic salt
¼ teaspoon pepper
4 cups uncooked noodles
1 cup cottage cheese
8 ounces cream cheese
¼ cup sour cream
⅓ cup sliced green onions (optional)
¼ cup chopped green pepper
¼ cup Parmesan cheese

Saute and brown ground beef and onion. Add tomato sauce, sugar, garlic salt, and pepper. Cook noodles at rolling boil for 2 minutes. Remove from heat. Let steam for 7 minutes. Drain and add cottage cheese, cream cheese and sour cream. Add green onion and pepper, if desired. Spread half of the noodles into a 7-inch by 11-inch baking dish. Spread half of the meat mixture on top. Repeat with remaining noodles and meat mixture. Top with Parmesan cheese. Bake at 350 degrees for 30 minutes.

This is a casserole that our family really enjoys. It is just loaded with dairy products.

C. Weaver
Elverson

SCALLOPED OYSTERS

1 pint oysters
2 cups (medium coarse) cracker crumbs
½ cup butter, melted
¾ cup light cream
½ teaspoon salt
¼ teaspoon worcestershire sauce

Drain oysters, reserving ¼ cup liquid. Combine crumbs and butter. Spread ⅓ of crumbs in 8 by 1½-inch round pan. Cover with half the oysters. Sprinkle with pepper. Spread another third of the crumbs on top, and cover with remaining oysters. Sprinkle with pepper.

Combine cream, reserved liquid salt, and worcestershire sauce. Pour over oysters. Top with remaining crumbs. Bake in 350-degree oven about 40 minutes. Makes 4 servings.

M. Musser
Myerstown

VANILLA ICE CREAM

4 eggs
¾ cup sugar
¼ teaspoon salt
3 tablespoons vanilla
1 can sweetened condensed milk
3 cups whole milk
1½ pint whipping cream

Beat eggs for 1-2 minutes. Add sugar and salt. Beat until creamy. Add vanilla and milk. Beat. Fold in cream. Freeze in ice cream churn.

Cheryl Thrush
Chambersburg

CHEESECAKE

Crust:
1¼ cups graham cracker crumbs
¼ cup walnuts, chopped
½ teaspoon cinnamon
⅓ cup melted butter
Filling:
3 eggs
Two 8-ounce packages of cream cheese
1 cup sugar
2 teaspoons vanilla extract
3 cups sour cream

Mix all crust ingredients together. Reserve 3 tablespoons for topping. Press remainder into bottom and sides of a 9-inch springform pan. Combine eggs, cheese, sugar, and vanilla. Beat until smooth. Blend in sour cream. Pour into crust. Top with reserved crumbs. Bake at 375 degrees for one hour. Chill 4 to 5 hours. Serves 12.

I like flowers and plants, also gardening. My husband and son and his family together have an orchard of apples, peaches, nectarines, cherries, plums, and pears. I have 5 grandchildren, three nearby and two in North Carolina, which we enjoy very much. I attend church regularly. I help with church suppers and bake sales. I enjoy reading the articles in Lancaster Farming.

Fern Schlegel

RANCH POTATO CASSEROLE

6-8 medium potatoes
¾ cup sour cream
½ cup ranch salad dressing
½ cup crumbled bacon
2 tablespoons parsley
1½ cups shredded cheddar cheese
2 cups crushed corn flakes
¼ cup melted butter

Cook potatoes in water until soft; cut into quarters. Place in greased a 12-inch by 8-inch baking dish. Combine sour cream, salad dressing, bacon, parlsey, and 1 cup cheese in bowl; mix well. Pour over potatoes, tossing gently to coat. Sprinkle remainiong ½ cup cheese over potato mixture. Toss corn flakes with melted butter. Sprinkle on top. Bake at 350 degrees for 40-45 minutes or until light brown. Yields 6-8.

My husband, John, and I live on a 56-acre dairy farm with our two children, Christine, 9 and Lowell, 7. I enjoy cooking and baking, so I always go for the B Section of Lancaster Farming. Thanks for all the good recipes!

Esther Weaver

CREAM OF BROCCOLI SOUP

1 cup diced onion
1 cup sliced mushrooms
3 tablespoons butter
5 tablespoons flour
3 cups chicken broth
1 cup cooked broccoli
1 pint half and half
1 cup cheddar cheese

Saute onions and mushrooms in butter. Add flour. Cook and stir until bubbling. Blend in broth. Cook until smooth and thick.

Add broccoli. Simmer. Just before serving, blend in half and half and cheese and heat until cheese melts. Can also be cooked in microwave or crockpot.

We live on a farm in Cambria County. I have four children and three grandchildren. My son raises corn, oats and hay. I have a large garden and do a lot of canning.

I am superintendent of canned and baked goods at the Cambria County Fair. I am a member of the Society of Farm Women, and am active in my church.

Recipe

(Continued from Page B20)

CHEESE PIE

1 pint cottage cheese, whipped
8-ounces cream cheese
1 heaping cup sugar
3 tablespoons cornstarch
3 eggs, separated
12-ounce can evaporated milk
2 cups milk

Beat egg yolks and both kinds of cheese. Add sugar and cornstarch and beat until smooth. Add the evaporated milk and regular milk.

Beat white of eggs, forming soft peaks Fold into above mixture. Pour into unbaked pie shells. Bake 50 minutes at 350 degrees or until done. Makes two deep 9-inch pies.

I am 15 years old and enjoy cooking and baking We like this recipe that my great-grandmother gave

My dad is a hoof-trimmer for dairy cows We also have a greenhouse where we raise about 50 calves I have three brothers and our job is to help with the calves.

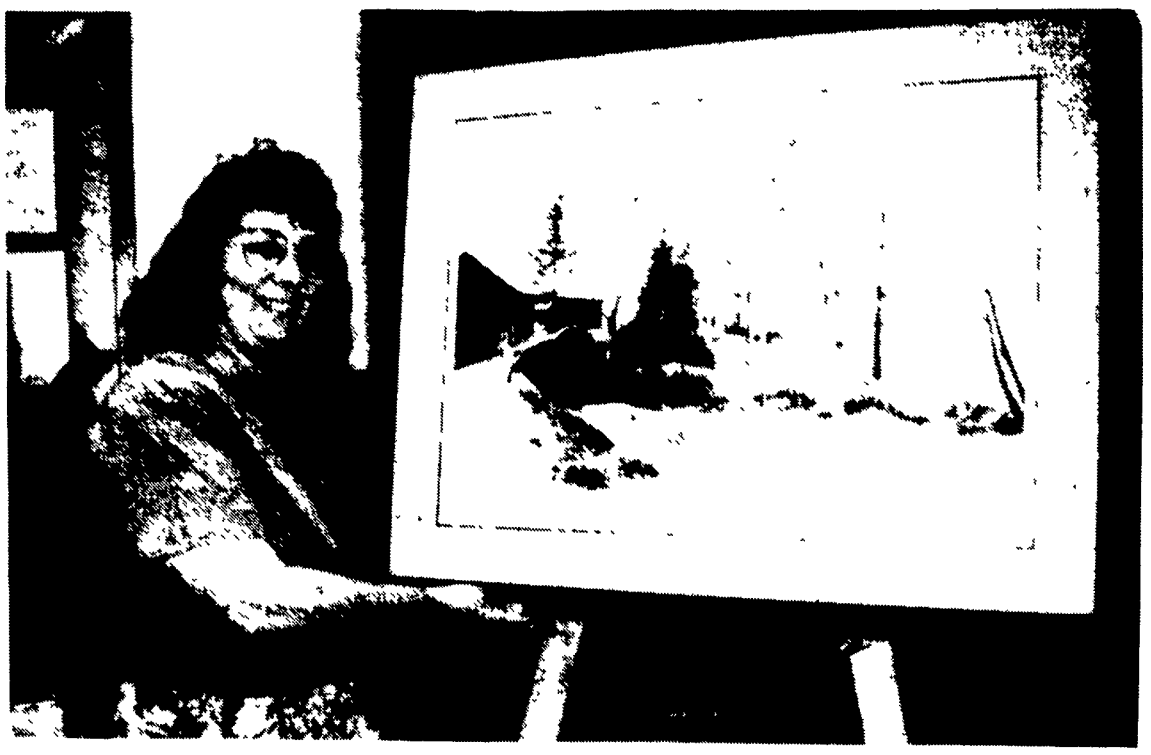
Artist Paints Royer Fa



Artist Rosene Hollinger displays the oil painting of the Royer Farm, which will go to the highest bidder during the Lititz Area Mennonite School Benefit Auction on June 25.

LOU ANN GOOD
Lancaster Farming Staff

LITITZ (Lancaster Co.) — Some use their talents for themselves or family or friends, but Rosene Hollinger donates her talent for a cause she believes in — Christian schooling.

The wife of Ken Hollinger and the mother of two sons, Rosene spent weeks capturing the beauty of one of the county's oldest farms on canvas. The 27x36-inch painting shows the farm with freshly-fallen snow.

"I enjoy painting snow scenes because snow lends itself so nicely to watercolor," Rosene said.

The watercolor will be auctioned during the benefit auction for the Lititz Area Mennonite School held June 24 and 25.

Rosene said that she donated the painting to the school because her two sons attend it.

The Hollingers live near to the Royer Farm, and Rosene often admired its beauty. The farm had been in the Royer family for seven generations. Ada Royer was the last of the descendents to live in the house that was built in the 1800s. In January 1992, the farm was subdivided with 107 acres sold to a neighboring farmers Earl and Grace Martin. The house and other farm buildings with 10 acres was purchased by a New Jersey family and is being restored.

Rosene has always enjoyed art and dabbled in it, but did not do anything seriously until after high school when she did oil paintings of Indian children who she worked with on an Indian Reservation. She took both oil and watercolor classes and has exhibited her work at a local hospital and an art show.

In the past eight years, Rosene has concentrated on raising her family and has painted only a little until this year when she did several paintings.

"It feels good to be doing more, and I hope to continue it," said Rosene, who prefers to paint local scenes and what she calls buildings

You Ask ? ? ? ? ? ? ? ? ? ? ? You Answer

In response to readers' questions, this column is for readers who have questions but don't know who to ask for the answers. In the past, many readers sent non-cooking requests to Cook's Question Corner, a cooking column on page B 8.

"You Ask — You Answer" is for non-cooking questions. The concept is the same: When a reader sends in a question, it will be printed in the paper. Readers who know the answer are asked to respond by mailing the answer, which will then be printed in the paper.

Questions and answers to this column should be addressed to You Ask — You Answer, Lou Ann Good, P.O. Box 609, Ephrata, PA 17522.

QUESTION — A. Nolt of New Holland would like to know the words to the complete poem that was recited in the 1920s when her father-in-law went to school. The poem contains these lines. The carpenter's house is falling down. The preacher's kids are the worse in town.... Since this request appeared, Theresa Litecky, Eastampton, N.J., and several others have written to say they remember parts of this poem and can hardly wait to see the complete poem. Any readers who remember the complete poem, please send it immediately

QUESTION — Marie Lorah, Box 299 R.D. 3, Tamaqua, Pa. 18252, is looking for water glasses with pictures of owls on them

QUESTION — Romaine B. Answell, Sumerdale, would like to know who manufactured the Webalco electric skillet.

QUESTION — A York County reader would like to know how to clean aluminum storm doors or enclosures that are becoming pitted

QUESTION — A reader would like to know where you can send for a catalog featuring vinyl doll heads, arms, and legs. she wants to make her own dolls.

QUESTION — Charles E Wright, Duncannon, purchased a 13-inch parlor stove made of iron with the following marks. On the front spark inside is written Gray Iron Casting Co., Mt. Joy, Pa. On the inside top door 75-11; on the poker 7517 The doors, drafts, etc., would like a full-sized stove. Is this company still in business?

QUESTION — A reader from Thorton writes that families of Canadian geese have taken residence in their pond. How can the geese be encouraged to leave the pond?

(Turn to Page B25)

JOHN DEERE SQUARE BALERS

Packed with consistency, bale after bale

Here's a performance you'll like repeated again and again in your fields: solid, stackable square bales that hold in feed quality.

How do John Deere square balers do it? For starters, the low-profile pickup rides close to the ground to gather in more hay. And narrow-channel strippers help save leaves and short material. Once the hay's in the baler, it gets packed solid as a unique design pre-compresses hay inside a tapered chamber. Feeder forks then fold the compressed hay into the baling chamber – delivering solid bales that stay together.

You can also count on a long, trouble-free life from your John Deere baler. Compared to others, John Deere balers are just plain beefier. Heavy-duty bale cases and a heavy, side-mounted fly wheel – plus simple John Deere design and fewer moving parts – mean season after season of beautiful bales.

To turn your next hay crop into solid, square bales that stack like bricks, pick up a rock-solid John Deere baler.

...arm For Benefit Auction

Come to the Country Benefit Auction to bid on one of these items to be sold at Lititz Area Mennonite School on June 24 and 25. Students kneeling in front are Glen Fisher and Jill Buch. Rosene Hollinger stands at the easel.

with character.

The two-day Lititz Area Mennonite School Benefit Auction begins on Friday with a chicken barbecue from 3 p.m. to 7 p.m. A mini-auction will begin at 6 p.m. with flowers, crafts, and gift certificates auctioned. Clowns, balloons, face painting, and a special performance by Steve Courtney will entertain children. Guests may also preview sale items for the Saturday auction.

A country-style buffet breakfast from 6:30 a.m. to 9:30 a.m. begins Saturday's events. Auction begins at 9 a.m. Featured in the auction will be a Benjamin Brubaker Georgian doll house, numbered paintings by artist Marilyn Dwyer, and finely-crafted wooded car by David Thomas. Art work is sold at 12 noon, quilts at 1 p.m., and Winross trucks at 2 p.m.

Entertainment for the children will be provided throughout the day with supervised movies and puppet shows.

For the hungry, a vast array of food will be available including a salad bar, soft-serve ice cream, hot sandwiches, and home-baked goods.

Come to the Country Auction at the school located at 1050 East Newport Road, Lititz. From Route 501 North through Lititz to Newport Rd., turn right and, approximately 2 miles, school is on right. For more information, call (717) 626-9551.

MAMMA

MIDDLE ATLANTIC MILK MARKETING ASSOCIATION, INC.

You Ask ? ? ? ? ? ? ? ? ? You Answer

(Continued from Page B24)

ANSWER — Dawn Lesher, Pitman, wanted to know how to discourage birds from building nests in hanging basket plants. Thanks to a reader who writes that she places loosely crumpled balls of aluminum foil in the flowers. The shiny, crunchy texture seems to keep nest builders away. Also, thanks to Minnie Stauffer, Ephrata, who writes that she fastens a life-size artifical brid to the top of her plant. Birds think the planter is occupied and it keeps them away most of the time. Thanks to Colleen Schulz, Douglassville, who said that birds are afraid of owls and snakes. She places toy snakes among potted plants, in strawberry patches, and in cherry trees to keep birds away.

ANSWER — Donald Gayman, Chambersburg, wanted to know how to keep food items from sticking to the trays of a dehydrator. Thanks to Kathy M. Van Nort, Columbia, who writes that she should spray the trays with a vegetable spray such as Pam or line the trays with waxed paper.

ANSWER — Barbara Davis, Sewell, N.J., wanted to know where to purchase the old Parker Brothers card game called "Touring." Thanks to numerous readers who wrote that they have a game and will sell it. Here are the names and addresses, for Barbara and perhaps others who are interested: R.B. Zeager, 10 Timber Villa, Elizabethtown, PA 17022. Alice R. Steere, 428 Tourtellot Hill Rd. Chepacket, R.I. 02814. Ferne Miller, 435 Church St., Landisville, PA 17538. Alessandra K. MacGrew, Cairngorm Farm, 3952 Lower Saucon Rd., Hellertown, PA 18055.

ANSWER — Beverly Budnick, Curehville, Md., wanted an explanation of the saying: A needle shall not pierce fabric on Ascension Day. Thanks to Alessandra MacGrew, for writing that she is familiar with the saying: If you sew on Sundays, you will have to rip the stitches out in hell with your nose. She believes these sayings regarding sewing are related to the prohibition for doing no manual labor on holy days of which Ascension Day is one.

ANSWER — A reader wanted to know how to keep bees away when holding outdoor picnics. Thanks to Alessandra MacGrew, Hellertown, who said that she heard, perhaps erroneously, that bees and hornets are attracted to yellow objects so watch your color scheme.

ANSWER — G. Depew, Mifflintown, wanted to know where to buy signs to erect along the highway to alert motorists of farm machinery crossing the road. Thanks to Kathy M. VanNort, Columbia, who said the signs can be purchased at Green Dragon, a farm market opened on Fridays and located in Ephrata. Thanks to a Frenchville reader who writes that she believes the townships are obligated to put up these safety signs especially at dangerous crossings. Signs are also available through Vulcan Signs, call 1-800-633-6845.

ANSWER — For the reader who wanted to know how to keep rabbits, moles, and voles away, Colleen Schulze, Douglassville, suggests planting marigolds as many animals do not like the smell of those flowers and stay away. Another reader writes that she sprinkles mothballs around the garden perimeter to keep rabbits, woodchucks, deer, and raccoons from the garden. But, be careful, as little children must be kept away from the mothballs. Another reader wrote that she sprinkles baby powder or sulfur around the vegetables to keep rabbits away. Several wrote that large cats are most effective for patrolling gardens.

PARTS

Whether you need bearings, chain, baler belts or other crucial haying parts, count on us to keep your hay on schedule with these timely parts values. You'll find quality John Deere parts as well as Match Plus® parts for other brands.

Be sure round bales stay tight and firm. Wrap them up with quality John Deere baler belts. Three plys of nylon-polyester are woven for heavy loads and consistent length.
Only $307.00* (AE40797)
And $309.50* (AE40798)

Keep rolling when weather threatens with this durable cross bearing – 1.25 x 3.208 inches. Fits 510, 430, and 530 Round Balers.
Only $13.46* (AE23516)

Gear up for long days of hay making with this high-strength #50 roller chain, 5/8-inch pitch. A 10-foot roll is
just $26.72*. (AP22459)

** John Deere dealers are independent retailers who determine their own prices, so actual selling prices may vary from the prices shown. Offer good through June 30, 1994*

The Right Match For Any Color
Our Match Plus® parts can MATCH your needs for any brand - PLUS provide a warranty backed by John Deere.

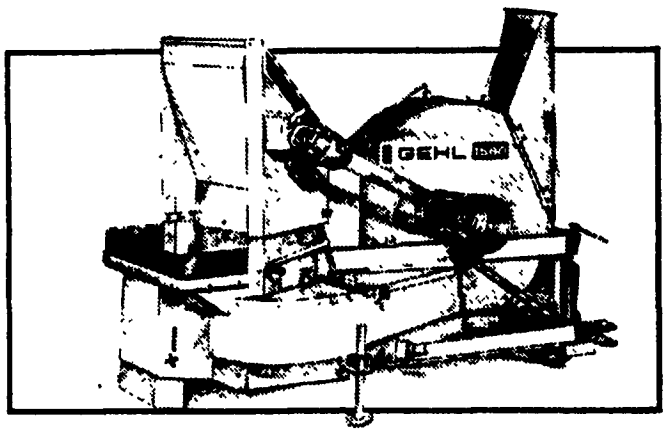
GEHL®

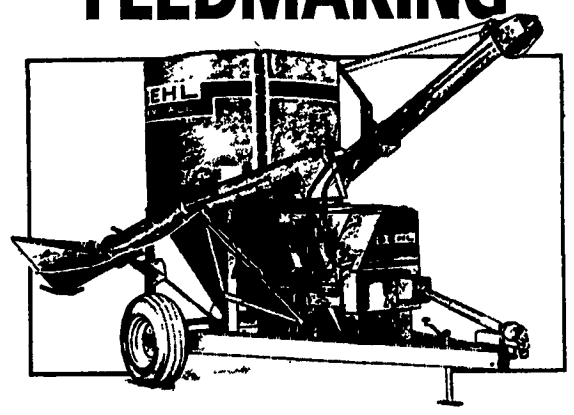
BLOW HARD



Gehl high-capacity blowers will help get your silo-filling done in short order.

- Three models with a choice of 540 or 1,000 rpm.
- Twin spinners rifle material at nearly 35 mph.
- Twin-sided fan disc with paddles on both sides.
- Split rim sheets feature a replaceable inner liner.
- Many convenience features.

THE #1 NAME IN FEEDMAKING



Gehl Mix-All® portable grinder-mixers have been leading the industry for over 30 years. Now the new Gehl Roller Mixer combines proven Mix-All features with a commercial-grade roller mill to produce the best possible feed for your livestock.

- Total hydraulic control – Self-contained hydraulic system allows infinite speeds to power the discharge conveyor, unloading auger and in-feed attachments.
- Remote controls – Operate the unloading conveyor from the tractor seat or from the rear of the machine.
- Electronic scales – For precise ration weighing.
- Customize your machine – With a wide variety of options and attachments.

There will be chicken Bar-B-Q, French Fries, Baked Goods and other food items!

A committee has been appointed in interest of the Ben Shirk Hospital Fund.

Two years ago, Mr. Shirk fell from a roof and received rather serious back injuries. At present he is back at work, but since there was no insurance coverage, a large portion of the hospital bill remains unpaid. With help from churches and individuals, the total has been reduced from approximately $100,000 00 to just under $70,000 00

This committee is arranging for a benefit auction on the grounds of Blue Lake Builders All proceeds of this sale will be going towards the hospital bill

Sale date is June 25, 1994, 10:00 A.M.

If you are interested in helping towards this cause, you may contact either of the following or bring it to auction before sale!

Amos Newswanger - (717) 272-4697
Nelson Martin - (717) 866-5910
Sam Stoltzfus - (717) 248-3559

Any new or good used items will be accepted. Thanks in advance from the committee and the Shirks. May God bless you for your generosity!

NOT responsible for accidents!
ALL announcements sale day take precedence over all advertising.

FARMER BOY AG INC.

Poultry & Swine Building & Equipment Center

Farmer Boy Ag Manufactured Swine Equipment

Model 70 Swing Side Farrowing Grate With Pig-Saver Bar

THIS DESIGN GREATLY REDUCES THE SOW'S ABILITY TO CRUSH PIGLETS!

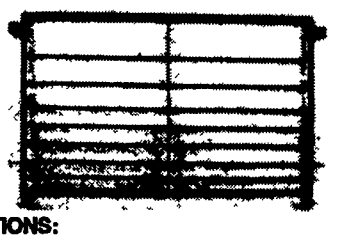
FEATURES:
Standard-3 position adjustment for sow comfort ①
Swing-side easily adjusts to size of sow
Standard - bowed-bar sides
No cylinders!
No sharp edges!
Front & Rear Gates swing both right and left!
Large, efficient, stainless steel feeder has no sharp edges!
Pig-saver bar decreases death rate of piglets ②
Rubber bumper guards reduce noise and injury!
Feeder raised off of floor to increase ventilation for sow comfort ③

SPECIFICATIONS:
1" schedule 40 pipe construction
Bottom 6" on legs are 1" solid rod

OPTIONS:
Pig-saver bar OR finger bars
Black iron, hot-dipped galvanized, or painted
Rump guard on rear door
Creep sets: stainless steel, hot-dipped galvanized or PVC
Crate stands: hot-dipped galvanized, painted, or black iron
Water set-ups: stainless steel or hot-dipped galvanized pipe

HORIZONTAL FENCING

FOR USE IN NURSERY, GROWER, FINISHER, AND BREEDING FACILITIES
All Farmer Boy fencing is available in black iron, hot-dipped galvanized or painted.
Fasteners available from Farmer Boy: thunderstuds, T-bolts, etc.



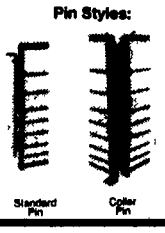
SPECIFICATIONS:

Nursery	3/8" rods in center	1/2" rods on bottom	28" high
	Angle 1/8"x1"x1"		
	3/16" Vertical flats		
Grower	1/2" rods in center	3/4" rods on bottom	32" high
Finisher	1/2" rods in center	3/4" rods on bottom	32" high
Breeding	1/2" rods in center	3/4" rods on bottom	44" high
	Angle 3/16"x1 1/2"x1 1/2"		
	1/4" Vertical flats		

Height is measured installed from floor to top of fencing

OPTIONS:

Pin Styles:



Standard Pin — Collar Pin

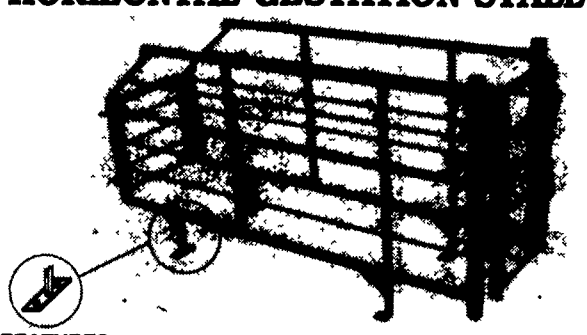
For the gate to open, this style pin needs to be lifted ONLY one-third of the distance resulting in convenience for the operator and a decrease in the amount of pins lost!

Leg Styles:

Standard stainless steel welded on

Bolt-on. This leg adds stability and is easily fastened to floor. Can be sold separately for easy replacement 1/4" or 3/8"

HORIZONTAL GESTATION STALL



FEATURES:
Drop-Back
allows for easier movement by increasing space available for operator to perform pregnancy tests and medication administrations
Straight-Front
allows more room for sow mobiltiy
* Also available in slope-front

SPECIFICATIONS:
Frame Construction: 3/16"x 1½" angle on bottom 1/8"x 1½" angle on top
Feed Tube: 2" schedule 40 pipe
Horizontal Rods: ½"
Vertical Flats: ¼"
* Available Legs: ¼", ⅜", or ¼" stainless steel

* This design allows for easy fastening to concrete slats (see picture)

TRUCKLOAD SALE FANS... 36" & 48"

ACME Breeze Master

BELT DRIVE OR DIRECT DRIVE PANEL FANS FOR AGRICULTURE

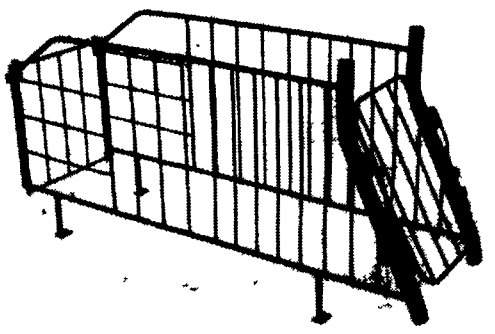
FAN STRUCTURE
- All galvanized frame and orifice – corrosion resistant, long lasting
- Premounted in particle board box – easy handling and fast installation with wire screens on both sides
- Vertical support – maintains proper alignment
- Quiet operation – no disturbance during operation
- Direct Drive – no drive losses, no belts to slip
- Optional Discharge Diffuser Cone – increases performance of fan without additional HP

PROPELLER
All galvanized blades riveted to matching heavy gauge galvanized spider. High performance camber twist propeller, stabilizes air flow through lower speeds.

MOTOR
High efficiency "C" face mounted motor includes thermal overload protection, gasketed wiring and capacitor covers delivers high CFM at normal speed with capability of operating at lower speeds without overheating. Speed may be controlled with PB 100 Series speed controls.

VERTICAL GESTATION STALL

FEATURES:
Drop-Back
designed for easy operator access for pregnancy testing and administering medications - through rear horizontal bars
Slope-Front
allows for easier movement by increasing aisle space available for operator



SPECIFICATIONS:
Frame Construction: 7/8" steel rod
Feed Tube: 2" schedule 40 pipe
Vertical Rods: ½"
Standard Legs: 7/8" round x ¼" flat OR 1" round x 3/8" flat OR stainless steel

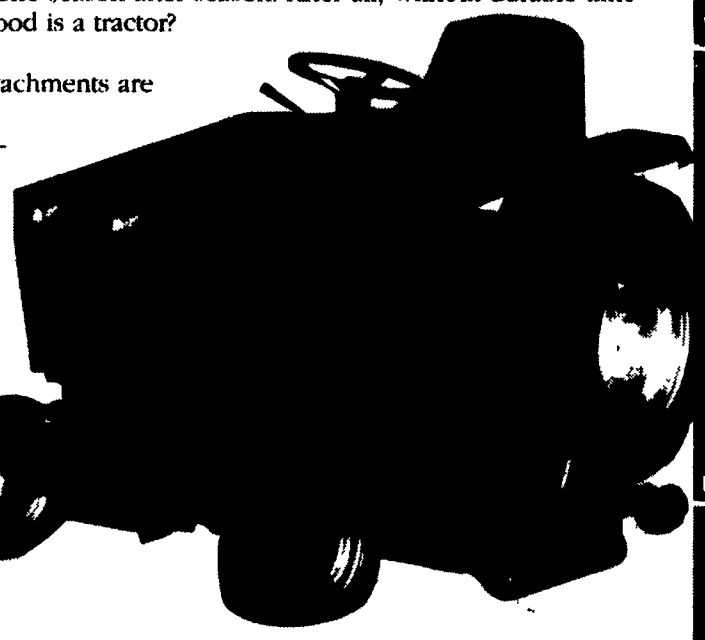
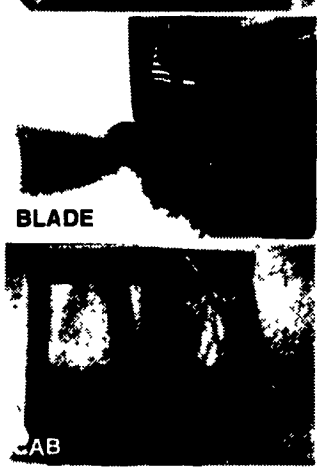
THE TRACTOR THAT'S TRULY FOR ALL SEASONS

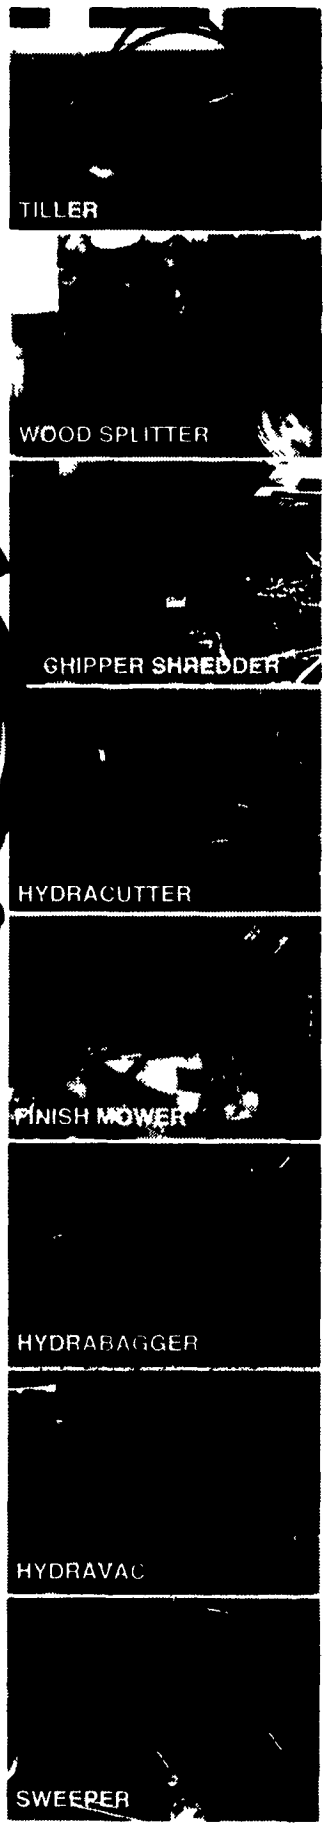
With the most complete line of attachments available we're confident that we can do the job you want done season after season. After all, without durable time saving attachments what good is a tractor?

And since our hydraulic attachments are powered by our patented HYDRIV™ system, no additional motors, drive shafts, or chains are required.

With an Ingersoll, you are able to tackle your farm and ranch needs head on and put them quickly behind you.







HYDRIV™ The cornerstone of Ingersoll's reputation.

All Ingersoll 3000 and 4000 Garden Tractors feature HYDRIV™, a hydraulic drive system patented in 1965 and manufactured by J.I. Case until 1983 when Ingersoll acquired the product line and further enhanced it with state of the art technology.

TOP Almost 30 years of reliable performance gives us the confidence to offer you TOP™ Total Owner Protection Lifetime Warrantee. Consult your local dealer for specific TOP™ details.

Contact your local dealer now and see why with Ingersoll, YOU WIN!

State Envirothon June 24-25

DANVILLE (Montour) — The eleventh Annual Pennsylvania State Envirothon will be hosted by PP&L Montour Preserve in Montour County on Friday and Saturday, June 24-25.

Approximately 265 high school students will compete in the areas of aquatics, forestry, soils, wildlife, and current environmental issues. The environmental issue for this year's competition is acid rain.

County conservation districts from 53 of Pennsylvania'a 67 counties are expected to sponsor teams in this year's event. The county representatives qualified for the statewide competition by winning local envirothons, involving more than 5,200 youth.

The State envirothon is sponsored by the State Conservation Commission and the Pennsylvania Association of Conservation Districts. The corporate sponsor for the 1994 Envirothon program is Hershey Foods Corporation. Assistance is provided by the USDA Soil Conservation Service, Pennsylvania Fish and Boat Commission, Pennsylvania Game Commission and Department of Environmental Resource's Bureaus of Air Quality, Control, Forestry, Land and Water Conservation and State Parks.

Students who arrive on Friday afternoon will be involved in "kickoff" activities led by Jon Beam, naturalist at Montour Preserve and hosted by Don Jacobs of TV's Pennsylvania Outdoor Life. A Birds of Prey program will be presented by Earl Shriver Friday evening.

On Saturday, the Envirothon will run from 9 a.m. to 1:20 p.m. A dignitaries tour will be conducted at noon.

Vo-Ag Goes High Tech

WEST BEND, Wis. — The typical vo-ag class room is not what it used to be.

Teachers once depended on a selection of text books and made use of a shop to teach farming skills. But now they are hooking up satellite dishes and computers to help their students keep in step with today's fast-paced agriculture.

While many schools already use an electronic information service, the Data Transmission Network known as DTN, is offering vo-ag teachers some new reasons to hook up to the electronic information age — a network of their own.

"The AgEd Network is all new on DTN," said Roy Peterson, CEO of the Stewart-Peterson Advisor Group, sponsor of the new service. "It is designed to prepare students for the fast-paced world of commodity markets and modern ag business management.

"DTN is an excellent tool from which students can experience the challenge of marketing," Peterson said. It's a satellite service that provides market prices and marketing information to more than 65,000 farmers across the nation.

Ten DTN pages will be used for daily AgEd Network reports. These pages will bring the real world of agricultural news and markets into the classroom. They will cover a wide range of topics including markets and farm legislation as well as news about ag education and the National FFA.

"These news pages will focus on developments that have an impact on the business of agriculture as well as on the students who are planning for a career in farming or agribusiness," said Peterson.

In addition to daily reports, the new AgEd Network will provide more than 500 ag marketing and management lessons. Each lesson unit includes background information, classroom activities, tests, and a companion teachers' guide.

Unlike the typical textbook, these electronic lessons are linked to current information found on DTN. Students will be keeping up with today's world rather than using dusty texts to complete activities and exams.

Besides the basic curriculum lessons sponsored by the Stewart-Peterson Group, several state departments of education will also be providing curriculums and lesson plans to the new network. This will give each teacher a wide variety of teaching tools from which to select.

The Stewart-Peterson Group, of West Bend, Wis., also founded and sponsors the annual National FFA Commodity Marketing Activity.

For more information about AgEd Network, call (800) 334-9779.

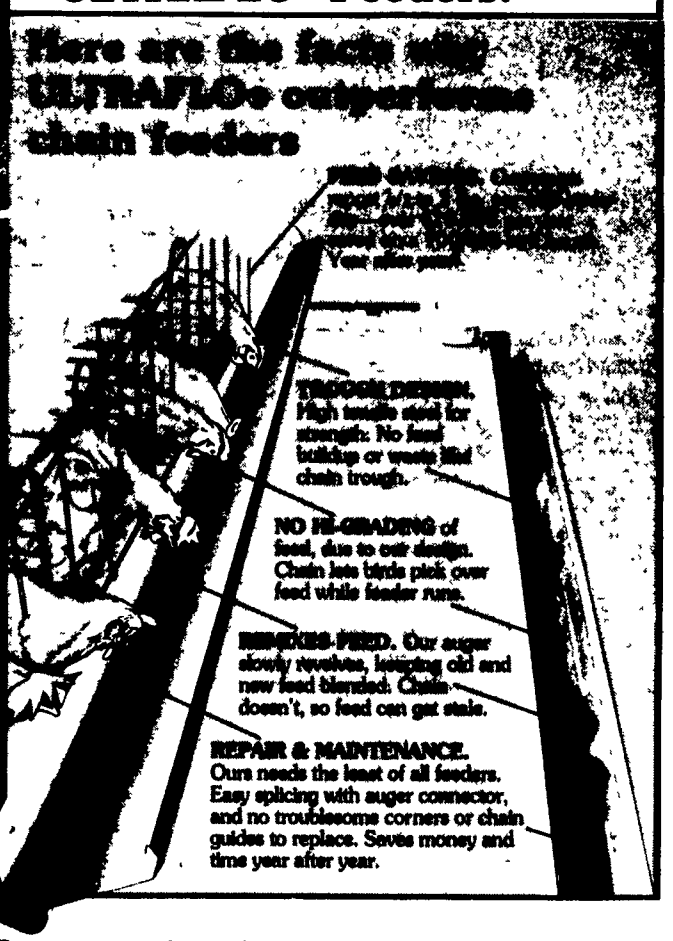
CHORE-TIME Ultraflo® feeders

More Than 260 Ultraflo® Systems Have Been Sold In The Northeast Since 1985 - *That's Over 20 Million Birds!*

Over 80% of the nation's top egg producers have already switched to Chore-Time cages with ULTRAFLO® Feeders!*



Here are the facts why ULTRAFLOs outperform chain feeders
TROUGH DESIGN. High tensile steel for strength. No feed buildup or waste like chain trough.
NO RE-GRADING of feed, due to auger design. Chain lets birds pick over feed while feeder runs.
REMIXES FEED. Our auger slowly revolves, keeping old and new feed blended. Chain doesn't, so feed can get stale.
REPAIR & MAINTENANCE. Ours needs the least of all feeders. Easy splicing with auger connector, and no troublesome corners or chain guides to replace. Saves money and time year after year.

SIMPLE OPERATION. "Push-Pull" Power Units with low HP motor are located along the feeder line as needed. Have hardened steel gears for trouble-free life. Microprocessor control lets you program feeding time to the second.

EASY AUGER CONNECTOR. Allows fast and simple installation, also quick and easy repair of auger if ever necessary. Auger and trough are both warranted 5 full years. Chain feeders *are not.*

Egg producers have been putting up with obsolete chain feeders far too long. Now there's a better way: Chore-Time's proven ULTRAFLO Cage Feeding System. Since introduction, more than 80% of the top 54 egg producers* have gone to ULTRAFLO. A lot of smaller ones have too.

They've all looked at the advantages and chosen ULTRAFLO. That's because it makes them more profitable. Total egg production and egg size—these are the best benefits of our complete feeding system.

Why not check out the facts for yourself? Contact us now—or ask any producer who owns ULTRAFLO.

Because the only negative comments about our feeding system come from our competition—not from our customers.

*The Top 54 U S Egg Producers as listed in Nov./Dec 1991 EGG INDUSTRY

Business News

Farm Credit Promotes 2

LANCASTER (Lancaster Co.) — Russell C. Albright and Dale W. Peifer have been promoted to executive loan officer and senior loan officer, respectively, in the Avondale branch of Keystone Farm Credit. The announcement was made by branch manager Bobby German.

Albright grew up in Christiana (Lancaster County) and attended Octorara High School. He was graduated from Delaware Valley College, where he was active in the Animal Husbandry Club, varsity baseball, and Delta Tau Alpha National Honor Society.

He began his employment with Farm Credit in 1970 and has been servicing accounts in northern Chester County for many years. Prior to joining Farm Credit, he managed several stores for Agway, Inc. He is an honorary member of the Owen J. Roberts FFA and serves on the Chester County 4-H Center, Inc. Board and the Chester-Delaware Council Board of the Pennsylvania Council of Cooperatives.

Peifer grew up in Lancaster County, where he was graduated from Conestoga Valley High School. Prior to joining Farm Credit, he operated a 120-acre, 40-cow dairy farm in southern Lancaster County. He services accounts primarily in the west central portion of Chester County.

Sunshades In Variety Of Colors

NEW HOLLAND (Lancaster Co.) — Ford New Holland has introduced a new line of sunshades in a variety of colors. The sunshades, which come in colors to match John Deere, Case IH, Massey-Ferguson, Kubota and Ford New Holland equipment, feature heavy-duty fiberglass construction reinforced with 5/8" plywood.

Molded gutters channel rain away from the operator and the underside is gel-coated twice to completely block out sunlight and protect from ultraviolet rays. The quality fiberglass construction offers greater flexibility and reduced weight for years of long-lasting service. Sunshades are easy to install with no sharp edges and come with a five-year limited warranty. For more information, contact your local Ford New Holland dealership.

Utility Vehicle Carries Heavy Duty Loads

MENDOTA, Ill. — Haul Master's new utility vehicle delivers the power and maneuverability needed to perform multiple tasks and to handle almost any terrain.

The rugged vehicle hauls 1,000-pound payloads and travels easily in rocky terrain, up hills and through untilled fields.

A heavy-duty transaxle with locking differential and a 4-cycle 16 hp Briggs & Stratton engine provide the vehicle with its power, while wide, low-pressure tires deliver good traction.

The multipurpose vehicle is ideal for use in a factory, on the farm, for grounds maintenance and for recreation.

For more information, contact Haul Master, Inc., 1501 1st Avenue, Mendota, IL 61342, (800) 848-4285.

Haul Master's new utility vehicle delivers the power and maneuverability needed to perform multiple tasks and to handle almost any terrain. The rugged vehicle hauls 1,000-pound payloads and travels easily in rocky terrain, up hills, and through untilled fields.

Reading Bone Fertilizer Wins Environmental Award

READING (Berks Co.) — Reading Bone Fertilizer has won a state Environmental Respect Award, which recognizes outstanding environmental stewardship among U.S. farm supply retailers. The business is one of only 32 from across the country to be honored with the award in 1994.

More than 1,500 retail farm supply businesses were evaluated in the competition.

A committee of industry experts and past winners selected the state winners based on storage and handling procedures in the physical plant, proper fertilizer and agchemical application methods, the facility's design, leadership in environmental activism, and concern for stewardship and safety among employees, customers, and the community.

"Reading Bone Fertilizer is committed to the future of agriculture and part of that commitment is to the environment," said Dave Tylka, safety and compliance manager for Reading Bone Fertilizer.

Clutchless Shuttle For 16X16 Transmissions

NEW HOLLAND (Lancaster Co.) — A new clutchless shuttle feature is available for four and six-cylinder Ford tractors equipped with 16x16 transmissions.

The clutchless shift provides smoother operation with less effort and provides a neutral position between forward and reverse as part of the shuttle control.

With this neutral-center feature, operators can pull out from a dead stop without clutching, according to Ford New Holland product managers John Hundley and Dave Dell. Four push-button powershifts let operators move tractors through gears quickly and easily.

The new shuttle shift greatly adds work productivity for loader-equipped farm tractors in the 6 models of PowerStar™ tractors from 66 to 112 PTO HP.

Ford New Holland offers a new clutchless shuttle shift for four and six-cylinder Ford tractors equipped with 16x16 transmissions in the 66 to 112 HP range. A neutral "center" feature of the shuttle lets operators move out from a stop without clutching.

Stahl Honors Badger's

SANDUSKY, Ohio — Stahl Mfg., Inc. (manufacturer of replacement parts for Harvestore unloaders) announced recently at their annual dealer meeting that Badger's Agri Service of Dillsburg was one of their top 10 dealers again for 1993. The meeting was held at the Radisson Hotel in Sandusky. Badger's Agri Service also received an award for the Century Club.

Fertilizer, Manure Guide Available

ITHACA, N.Y. — For today's farmer, a thorough knowledge of fertilizer and manure application equipment is an essential part of profitable and environmentally friendly farming.

"Fertilizer and Manure Application Equipment," NRAES—57, is a comprehensive resource intended to guide farmers through the process of selecting, operating, and calibrating the right fertilizer and manure application equipment.

This easy-to-use, 22-page guide familiarizes the reader with the different forms of fertilizer and manure and how to apply them. Important criteria such as nutrient value, soil type, crop type, and field size are discussed.

The publication is divided into two sections: chemical fertilization and manure fertilization. Both sections give detailed information on the operation and calibration of different pieces of machinery. Methods for calculating the swath width and application rate are included. The section on chemical fertilizer covers drop-type fertilizer distributors, broadcast spreaders, fertilizer attachments for planters, and fertigation. Covered in the manure section are box-type manure spreaders, flail spreaders, tank spreaders, and bucket loaders. Over thirty illustrations and six tables ensure a clear understanding of each type of equipment. A glossary of terms and a plan for a fertilizer storage shed are also included.

"Fertilizer and Manure Application Equipment" is available for $6 from the Northeast Regional Agricultural Engineering service (NRAES), Cooperative Extension, 152 Riley-Robb Hall, Ithaca, NY 14853-5701. Postage and handling are included for U.S. orders only. Orders from outside the U.S. must be prepaid in U.S funds. Quantity discounts are as follows: 10-49 copies, $4.80 per copy; 50-99 copies, $4.20 per copy; and 100 or more copies, $3.60 per copy. Please make your checks payable to NRAES or call (607) 255-7654 for more information. Call or write for a free publication catalog.

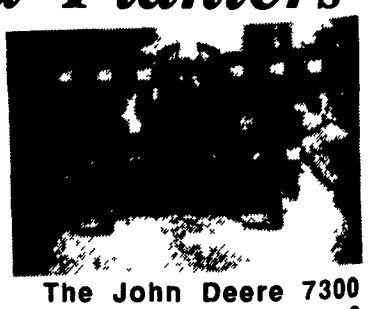
Deere Adds 2 Stack-Fold Planters

MOLINE, Ill. — John Deere has expanded its 7300 Stack-Fold MaxEmerge™ 2 planter line with the addition of an 8-row wide and a 12-row narrow model.

The company says the stack-fold design is popular because it provides fold-and-go convenience and a narrow transport width that complements the maneuverability of an integral planter. Deere also announced improvements for several models in its planter line beginning in June.

Deere's expanded Stack-Fold planter line now consists of 8-, 10-, and 12-row wide models along with the new 12-row narrow configuration. The wide-row models are available with 36-, 38-, or 40-inch row spacings. The narrow-row model is set at 30-inch spacings.

The Stack-Fold design uses two 4 x 24-inch hydraulic cylinders to position the wings over the center of the mainframe for transport. The hoppers remain upright at all times for fold-and-go convenience. This also helps boost productivity because no time is lost emptying wing hoppers for transport as with a vertical-fold planter design.



The John Deere 7300 stack-fold MaxEmerge® 2 planter line has expanded to include an 8-row wide and a 12-row narrow version. These join the 10- and 12-row wide configurations introduced in 1992. The stack-fold design positions the wings over the center of the mainframe for a narrow transport width. The hopers remain upright for fold-and-go convenience and increased productivity.

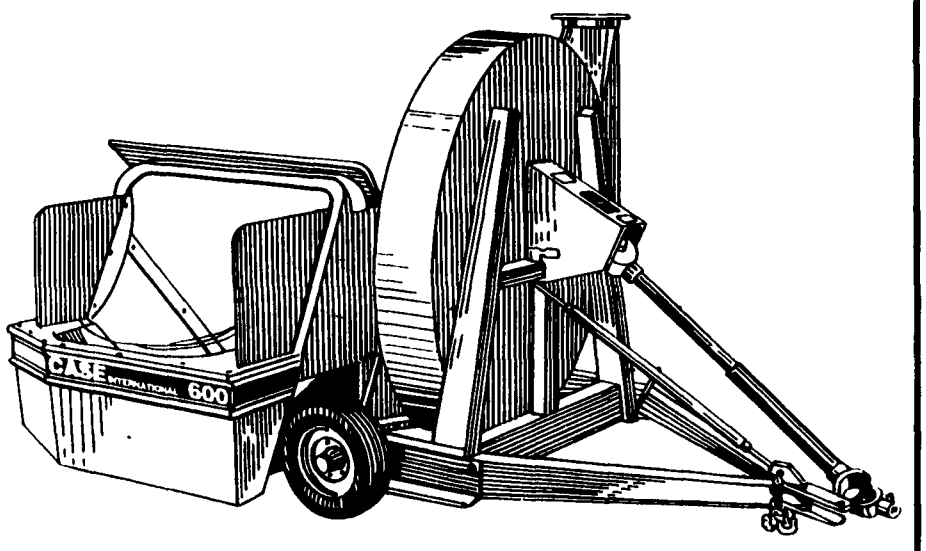
FAST-FILL YOUR TALLEST SILOS!



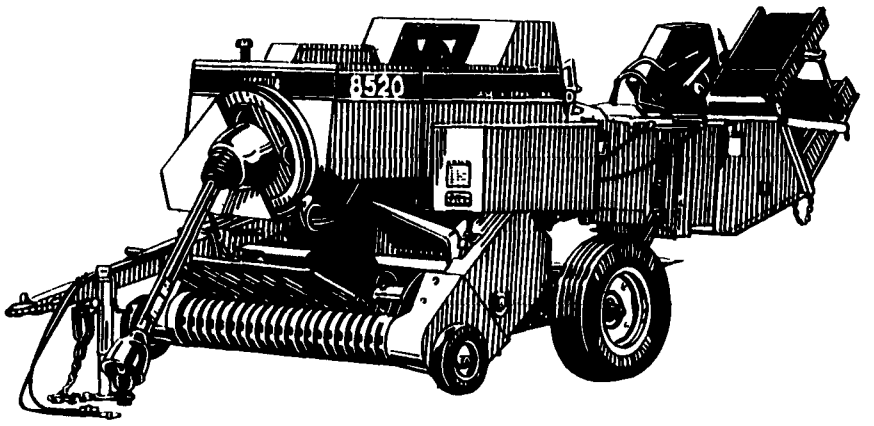
Case International 600 Forage Blowers

For your tall, big-diameter silos, 100 feet or higher, get the 600 Blower. It blows up to 110 tons of haylage or up to 180 tons of corn silage per hour!

- High volume with direct 30° feeding angle
- Drive-in convenience with 30½ -inch extendable hopper
- 37-inch-wide, high-volume hopper.

See these big-capacity blowers now.

OUTSTANDING BALER PERFORMANCE MEANS GREATER NUTRITION AT AN ECONOMICAL PRICE



Case International 8520/8530 Rectangular Balers

These two balers both feature the Case IH center line design. Eliminates turning corners with the crop to get it into the bale chamber, as is common with conventional designs. This saves valuable protein-rich leaves. Also saves time because you don't have to change from field to road position for transport.

Other outstanding features are:

- Low-profile baler design provides excellent visibility to the rear of the baler.
- Low-profile pickup... reduces crop lifting height, saving nutritious leaves
- Hay goes straight into the unique prepacker chamber... regardless of windrow size... for uniform flake and bale density

Come in soon for the rest of the story!

Beef Exports To Reduce Impact Of Increased Domestic Production

MONTEREY, Calif. — Strong growth in U.S. beef sales to foreign markets will reduce the impact of increased beef supplies, according to Jim Mullins, chairman of the U.S. Meat Export Federation and a Corwith, Iowa, beef producer.

Mullins attended the recent USMEF Mid-Year Meeting and Foreign Buyers Conference in Monterey, Calif.

"Exports are a growing part of our beef demand picture. Over the next four years, increased sales of U.S. beef to foreign markets will absorb almost one-third of our expected increase in production," said Mullins. "So although beef supplies are on an upward trend, our beef exports are also rising. We're off to an excellent start with a very strong performance in the first quarter."

According to the most recent USDA data, exports of U.S. beef and beef variety meats in the 1994 January-March period were up 19 percent in volume from the same period last year. USMEF projects total U.S. beef and beef variety meat exports will continue to increase rapidly in the years ahead, reaching a volume of 1.06 million metric tons in 1997 and a wholesale value of $4.08 billion. In 1993, total U.S. beef exports, including beef variety meats, were valued at $2.46 billion.

Mullins explained that the anticipated growth in export sales represents a cumulative increase of 850 million pounds of beef for the 1994-1997 period, or 32 percent of the cumulative increase in production (2,700 million pounds) for the same period. The production estimate is based on the latest data from Cattle Fax.

"This type of growth doesn't just happen on its own, we have to keep fighting for market share," said Mullins. "USMEF has marketing programs in more than 50 different countries around the world. In virtually every one of these markets, producer checkoff dollars are working with USDA market development funds to increase demand for high-quality, grain-fed U.S. beef."

Mullins cited USMEF's $1.4 million spring retail campaign in Japan and an intensive marketing push in Mexico as two checkoff programs that will help boost demand for U.S. beef during a traditionally slow period in these important markets.

"We'll also use our Foreign Buyers Conference in Monterey to stress the competitive pricing and availability of U.S. beef to the major buyers from key export markets," said Mullins. "This year's conference is a real opportunity to reach our foreign customers."

Mullins said 140 foreign buyers are attending the USMEF conference. The countries represented by these buyers account for 80 percent of total U.S. beef exports.

In addition to conference participation, foreign buyers will view the U.S. production system first hand to gain a better appreciation for the quality and safety of U.S. beef. Key stops for the foreign teams will include packing plants, feedlots, ranches, and a variety of retail outlets.

Council Opposes Ag Spending Cuts To Pay For GATT

WASHINGTON, D.C. — The National Council of Farmer Cooperatives' (NCFC) board of directors voted to oppose any General Agreement on Tariffs and Trade (GATT) implementing legislation that would unfairly single out U.S. agriculture to bear a disproportionate share of the cost of GATT.

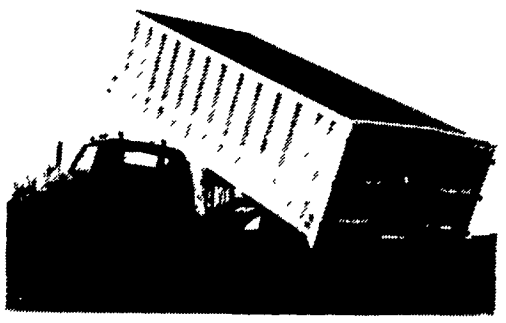
The farmer cooperative leaders expressed concern about reports that the administration may propose significant spending cuts in agriculture-related programs to help offset potential revenue losses resulting from tariff reductions. Such a proposal is not only contrary to previous assurances, but grossly unfair since U.S. agriculture accounts for less than five percent of the estimated $13-$14 billion cost of GATT.

"Such proposals would place U.S. agriculture at a competitive disadvantage since other countries would not be required to make similar reductions, and make it difficult to capitalize on potential market opportunities under the Uruguay Round GATT agreement," said NCFC Board Chairman Terry Fredrickson.

In the resolution, the NCFC board pointed out that the recently completed GATT agreement will allow countries to maintain, at a reduced level, the use of export subsidies and trade barriers, and to maintain and increase support for non-trade distorting or "green box" programs such as market development and promotion, export credit, and food assistance. History has shown that other nations, especially the European Union, will likely continue to aggressively utilize every available weapon to maintain and increase their share of the world market.

"U.S. policies and programs must be equally competitive if U.S. agriculture is to remain viable and competitive under GATT," Fredrickson said.

ALUMINUM GRAIN BODIES & ALUMINUM REPAIRS by Hewey LEBANON, PA.



These ultra-light bodies are designed for strength through engineering, not strength with bulk. For example, a 16' grain body with tailgate and 48" sides weighs only 1490 lbs. complete. We'll build you any length or any side height up to 60".

Also available:
- Double swinging hay hauling tailgate
- Barn door type tailgate
- Slide out cattle chutes
- Diamond flooring
- Pull out panel tailgates
- Any size grain chute

SHOULD BROILER PRODUCERS CONSIDER INSTALLING TUNNEL VENTILATION?

Dr. William D. Weaver, Jr.
Professor and Head
Dept. Of
Poultry Science

Through genetics, nutrition, and improved management practices, broiler producers are able to grow birds to market weight more rapidly each year.

This improvement in performance can be equated to a reduction of approximately one day each year in the time required to produce a broiler. In other words, if it required 57 days to produce a broiler to a specific weight 15 years ago, it would require only 42 days to produce a bird to the same weight using today's broiler.

Unfortunately, this significant improvement in performance has come with a cost attached. That cost can be expressed in a number of ways; however, in most cases it can be stated that birds are much less forgiving of their environment than in years past. Producers must be much more aware of maintaining proper temperature and desirable air quality. Low temperatures and elevated levels of ammonia can trigger ascites today, whereas several years ago that was not the case. Conversely, high temperatures during the summer can cause significant mortality and loss of performance among broilers.

Tunnel ventilation, a concept introduced in the southeastern U.S. several years ago, has significantly helped to reduce mortality during the hot times of the year. By placing a number of fans in one end of the broiler house and allowing the air to enter from the other end, permitting the long axis of the house to act as a tunnel, air is moved down the length of the house at a velocity of between 350 and 400 feet per minute. The wind chill effect of the column of air provides meaningful cooling for the birds. Research has shown that broilers, when exposed to ambient air at 95 degrees Fahrenheit (F) and a velocity of 350 feet per minute (f/m), sense the air as if it was at approximately 70 F.

The calculations required when designing a tunnel ventilation system are not difficult. First one must determine the cross section area of the broiler house; the height x width of the house. For example, let's assume that the house is 44 feet wide and has an average ceiling height of 10 feet, giving a cross section area of 440 square feet. Further, to determine the fan capacity required, one must simply multiply 440 square feet x 400 f/m (air velocity down through the house) to arrive at the cubic feet per minute (cfm) of fan capacity required for the tunnel system. In this case, 176,000 cfm of fan capacity, or approximately nine 48-inch fans, are needed. These fans should be controlled with thermostats and located in one end of the house.

The other end of the house must be equipped with areas to allow air to enter. These areas are normally a section of curtain on both sidewalls. Again, the calculations to determine the amount of this opening are simple. The opening must be equal to or slightly larger than the cross section of the house — 440 square feet. Let's assume that the curtain opening is three feet wide and continuous on both sidewalls. Therefore, to provide an opening of 440 square feet, a length of 74 feet (440 square feet divided by 3 — 147 feet divided by 2 = 74 feet) must remain open on both sides of the house when the ventilation system is operated in the tunnel mode.

An additional feature that is included with most tunnel systems is fogging nozzles. The nozzles normally emit from two to three gallons of water per hour at approximately 200 pound per square inch (psi) and are located in bands across the house. The first band of from six to eight nozzles should be located near the point where air enters the house and the last band should be located approximately 100 feet from the fan end of the house. Intermediate bands are normally located 60 to 75 feet apart. Design criteria for the nozzle system normally allows for approximately nine gallons of water per hour per 1000 square feet of floor space. When atomized properly, this amount of water will cause reductions in temperature of from five to eight degrees.

While additional cooling with tunnel ventilation and foggers was not required to produce broilers just a few years ago, it has become a necessity with today's fast-growing birds. If you have not looked into tunnel ventilation as a way to cool your birds during the hot times of the year, possibly now is the time to do so.

MANAGING THE CALF UNTIL WEANING

There are some important and profitable practices that can be applied to the beef calf prior to weaning.

While most calves born in the spring are turned out and forgotten until fall, there are some opportunities to increase the value of the calves prior to sale.

The first of these is the "CIT" program. This means castration, implanting, and tagging the calves. There is tremendous economic advantage to castrating male calves, particularly at a young age.

Recent sale reports indicate many weaned feeder calves will be worth up to $80 per head more as steers compared to bulls. The process is easy, and is best applied when the calf is less than 2 months of age.

Remember, the only way to know whether the job is done right is by removing the testicle through surgical castration. Rubber bands will have up to a 10-15 percent failure rate, and this will contribute to a lower value for your calves in the future.

Growth-promoting implants are one of the few things in the beef business that will almost always make money. Most research shows that implants will increase the value of a weaned calf through heavier weight by 15-20 percent. For a 500-pound calf, that is a return of about $8 for an implant costing $1-$2.

The implants available for young calves are Ralgro, Calfoid, and Synovex-C. There is a host of other products available for older calves with varying effective life. Two keys to the use of these products are to use proper and approved implanting technique (all implants should be placed in the middle third of the ear between the ear cartilage), and use sanitary conditions to the extent possible to avoid infections at the implanting site.

Bulls that will be used for breeding should never be implanted, but there are some approved implants available for implanting heifers at a very young age. Check the label on all implants to be sure they are the right ones for you to use.

Ear tagging calves for identification, fly control, or both can be done at the same time as castration and implanting. If you have been using insecticidal ear tags in the past, you may want to switch to one of the "new generation" fly tags now available. This change will allow you to keep any resistance from building up after continuous use of a single type of insecticide.

Identification of each calf every year will be most helpful in evaluating cow productivity. This would include calving intervals, calf weaning weights, and in heifer selection. This identification will be essential for any good record-keeping program.

Another practice often considered is creep feeding. For most beef cows, the peak of lactation occurs by 90 days after calving. This implies that about 80 percent of the milk for the lactation will be produced by 3 months after calving, so the calf needs other forms of nutrition.

There are four reasons producers may want to creep-feed calves:

- The price of grain is low relative to the price of cattle
- There is a drought or other condition that results in poor milk production
- To enhance a preconditioning program for feeder calves
- To make more effective use of pastures.

It usually takes about 8-9 pounds of grain to produce a pound of gain in a creep-fed calf. With calves selling for $.80 per pound, this means the creep feed should not cost more than $.10 per pound.

The most popular creep feed is oats, so oats would have to cost less than about $3 per bushel to be cost effective. Other feeds can be used just as easily as oats. One good mix is 60 percent cracked corn, 30 percent whole oats, and 10 percent soybean meal.

If cows are milking well and there is adequate pasture for both cows and calves, prices for feeder calves may be discounted if they are overly fat from grain feeding. However, drought conditions can easily reduce milk production in the cow, so supplemental feeding calves by creep feeding may be an efficient alternative to supplementing cows in dry conditions, particularly after the breeding season.

Preconditioning feeder calves is again gaining popularity as a marketing tool for calf producers. This refers to weaning, vaccinating, and starting calves on feed about 3 weeks prior to marketing them.

Creep feeding is a method for calves to make the transition to grain more easily after weaning. Since they are already accustomed to eating grain, the stress of weaning and changing diets can be reduced.

In rotational pasture systems, calves can be "creep-fed" pasture by allowing them to graze ahead of the cows. This usually allows the calves access to the best possible forage. It is usually done using a "creep gate" in the fence line, or simply by having paddock division wires raised high enough to allow calves to get under them.

The weight gain will not be as great as with grain feeding, but this is a low-cost way of getting some extra pounds on the calf.

Another alternative scheme is early weaning of calves. Again, this practice has real merit during drought conditions. The lowest nutritional requirements for a beef cow during the year occur for about 60 days after she weans a calf. She should already be bred, and there is little fetal growth at this stage.

Basically, the cow can do well on a maintenance ration. If there is a lack of forage, a producer may wish to wean calves as early as 120-150 days of age and allow the calves to have access to the best grass or other feeds that are available. Cows can be maintained on poorer quality hay, crop residues, or by-product feeds. Care should be taken to be sure (1) the cows are bred or can be kept in good flesh if the breeding season is not yet completed before reducing the nutritional plane, and, (2) there is not a severe weight reduction in the cows before winter feeding begins.

Smooth Moves! For June is Dairy Month

Smooth Moves!

SURFACE DRIVE SILO UNLOADERS

Smart farmers look to Van Dale for all the right moves when it comes to surface drive technology. Even frozen and hard packed silage and haylage are no match for Van Dale's Magnum and SD 2000. Now Van Dale offers even greater efficiency with its DURAGLIDE® Impeller available on the SD 2000. The Duraglide lessens gummy buildups, uses less power and provides faster and more reliable delivery.

Make a move in the right direction to Van Dale. Leaders of the pack since 1950!

CHECK OUT THESE FEATURES

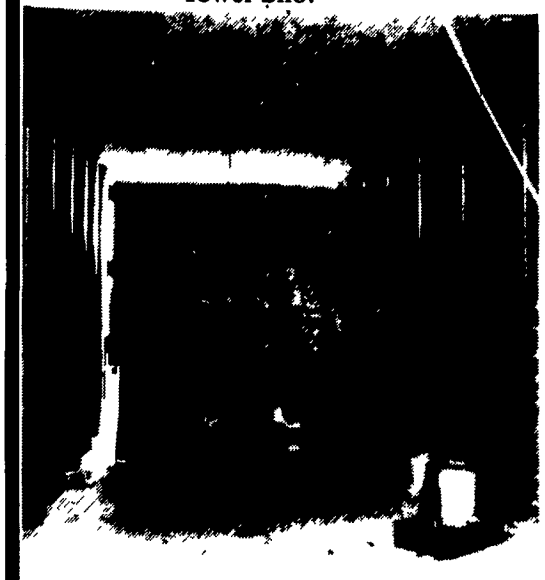
STARLINE

Big-Jim Unloader...The Unloader of the Future...Available Today. For 20' - 24' and 30' Silos, With the Possibility of 40' diameter Silos: Think of Storing 5,000 Tons in One Tower Silo!



Drive your truck or mixer-wagon under the 12' high floor for fast and efficient delivery of your wilted hay or silage. Eliminate conveyors from silos to mixer.

"IT'S A WHOLE NEW WORLD OUT THERE!"

Tower silos that can hold 4,000 tons of forage!!! This is one of the first major changes in the silo industry since the 1950's when farmers went from 12' and 14' diameter silos to 20' and 24' diameter silos. The industry met the challenge. And Now, Sollenberger Silos Corp. is stepping up to meet the challenges of the '90's and beyond. The larger dairies need storage units that will hold 2,000 tons and more, and be able to deliver the feed without spending "Hours Per Day." The poured concrete tower silo is the silo to store the feed, and the Big-Jim Distributor/Unloader is the system to deliver the feed. Today's business-oriented dairymen realize that "Forage Quality is often the single most important factor affecting their profit," and as a result they are searching for ways to store the feed, and deliver it to the cow in the best condition possible. "The tower silo may very well be the best investment that a dairy farmer can make!!"

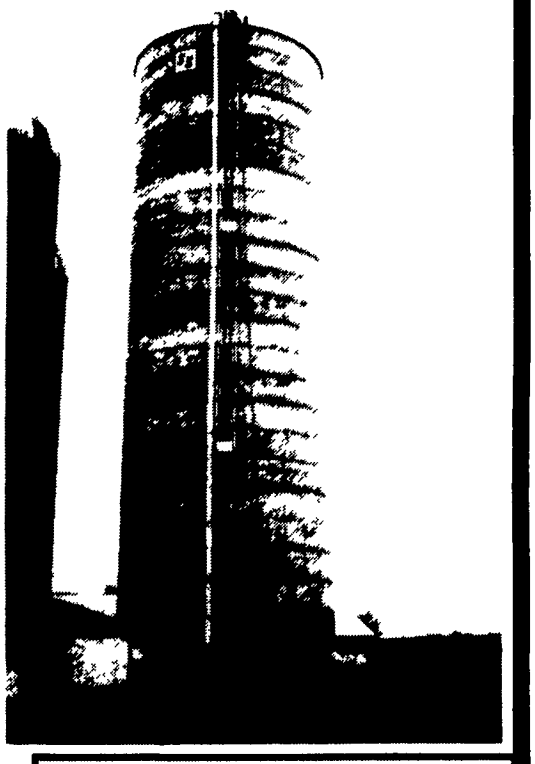
Store your feed in a poured concrete silo, let gravity do the packing, and deliver the feed directly into your truck or mixer. "Save $20,000 or more per year on machinery and labor costs to store and deliver your feed, compared to bunker silos."

The tower silo may cost more, but labor, machinery, and feed quality savings will pay the difference in 3 years or less. "The Blizzard of '93 and the severe winter of '94 greatly increases your appreciation of the concrete tower silo."

It is time once again to get serious about storing your valuable feed.

MEMBER: International Silo Assn. - Am. Society of Agric. Engrs. - PA. Forage & Grassland Council

CALL FOR AN APPOINTMENT TO DISCUSS YOUR STORAGE NEEDS AND ASSISTANCE IN COMPLETING THE "COST ANALYSIS WORKSHEET" DEVELOPED BY THE CROP STORAGE INSTITUTE
Bob Francis (717) 264-9588



JUST COMPLETED...This 30'x100' poured concrete silo with drive-thru for loading directly into your mixer wagon or truck-mounted mixer. The Big-Jim System will deliver over 1000 lbs. per minute of corn silage. Just think...you don't need 6 silos and 6 unloaders to store this much feed...and better yet, you do not have to store your valuable feed on the ground and try to protect it with plastic and used tires!!!

NOTHING WORKS LIKE A SILO

The Best of the Best

The Wheeling 2 oz. Seal of Quality coating represents the best of the best in the Wheeling Corrugating line of premium galvanized roofing and siding. Every panel that carries the 2 ounce coating assures you are getting the toughest, the most durable, the most corrosion resistant galvanized sheet available in today's marketplace.

2oz. Seal of Quality Wheeling

Genuine Old-Time Quality
Every Wheeling 2 oz sheet is manufactured from heavy gauge steel topped with an extra thick zinc coating and formed into profiles that contribute strength and good looks Build with a Wheeling 2 oz sheet and you'll be working with the kind of durability and dependability that s been a standard in the industry for almost 100 years

The Proof is in the Process
The performance behind the Wheeling 2 oz Seal of Quality is possible because of Wheeling's patented Cook Norteman manufacturing process This technology allows a more consistent quality product and a more uniform coating with unsurpassed zinc adhesion The process takes more handling and more time, but the end result is a super premium panel that has its own limited 20-year performance warranty

Dimensions and Specifications
If your building plans call for roofing and siding materials with exceptional corrosion resistance minimum upkeep and old time toughness you ll want to check the specs of Wheeling 2 oz Seal of Quality galvanized

Gauge	28
Lengths	Up to 40
Steel	Full hard 90 000 psi cold rolled Wheeling Pittsburgh carbon steel

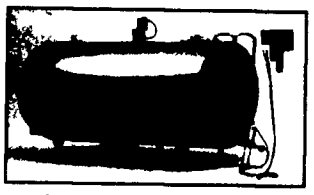
MUELLER DAIRY FARM EQUIPMENT

Offer

Scroll-Compressor Technology

New in 1994



You may pay less for some dairy farm equipment... but it can cost you more!

Equipment costs are not the only cost of cooling milk

In the long run, total operating costs of a Mueller milk-cooling system are generally substantially less than those of "bargain-brand" milk-cooling equipment.

Example	Mueller	Competition
Cost of equipment	$31,000	$28,000
Cost of electricity @ .08 kW for 12,000 lbs milk/day for 10 years	$17,550	$22,850
Total operating cost for ten years	$48,550	$50,850
Savings	$ 2,300	

Contact your *Mueller* distributor for further comparisons.

★ Call Today For All Your New or Used Milk Tank And Refrigeration Equipment Needs!

Your best box buy is Badger.

When it comes to forage boxes, no one builds 'em better than Badger! Badger's been in the box business for more than 40 years, designing unmatched durability and dependability into every Badger box

Badger boxes and running gears are built to stand the heaviest loads, the roughest terrain, and continue trouble free operation year after year. The bolted plywood construction, all steel frame, and high-strength undercarriage assure your box will be worth more long after others have reached the graveyard

Add to that a lifetime warranty on wood sides and floor, high strength pintle chain and choice of easy maneuvering, single and tandem axle running gears, and you've got the best box money can buy
Bar none

It's Badger tough.
It's farm tough.

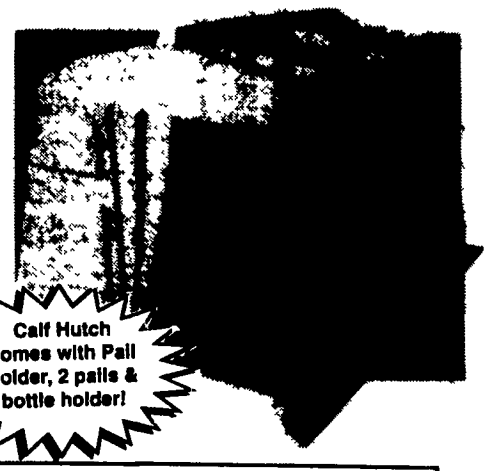
J&D Manufacturing

SUPREME CALF HUTCH

J&D MOLDED HIGH DENSITY-POLYETHYLENE CALF HUTCH



J&D Calf Hutches will keep calves drier in the winter, they will stay warmer and start eating at an earlier age. During the warm summer months you can use the standard, adjustable air vent to control the climate in the Calf Hutch. Your calves will be healthier and will grow faster. You may add an out door fence area to the hut.

Calf Hutch comes with Pail holder, 2 pails & bottle holder!

LIQUID
MOLASSES:

- *makes feed more palatable*
- *tempts their tastebuds*
- *cow gains more energy*
- *reduces dust*
- *improves cows appetite*

(Dry molasses available in 50 lb. bags)

CORN & SOYBEAN OILS - For Animals

BREWEX - For Use In Dairy Feeds

BREWEX is used extensively in complete dairy formulations to contribute utilizable energy. It is a price/performance value when used in dry feeds, liquid feeds and on-farm mixes.

- BREWEX replaced 5% to 10% corn/day
- BREWEX improves butterfat about 0.1%
- BREWEX mixed with forage reduces mortality due to displaced abomasum
- BREWEX helps cattle to stay on feeds

MAR-PRO AG-FISH - Plant Food From the Sea
BENEFICIAL FOR EVERYTHING THAT GROWS IN THE SOIL

PUT MORE MILK IN YOUR BULK TANK WITH BREWERS WET GRAINS FROM MIRACLE

Trucked fresh right to your farm, brewers wet grains from Miracle Feeds can provide an excellent source of rumen by-pass protein. This by-pass protein is more efficiently digested and absorbed in the cow's small intestine. Helps your average cows produce more, makes your top producers even more efficient.

Now you can add McNess vitamin and mineral premixes to your Miracle rations through the accuracy of free computerized ration balancing. For more information, call toll-free 800-888-0230.

31 NOTICE

INVITATION FOR BIDS

The Lancaster Conservation District is requesting bids for the construction of a Manure Storage System, to be funded in part by the Chesapeake Bay Program. Construction is expected to begin in July, 1994. The site is located in East Earl Township, Lancaster County.

Prospective contractors will receive a bid package which contains Instructions to Bidders, a sample contract form, the plans and specifications for the project, and a bid sheet.

Small and minority businesses and women's business enterprises are encouraged to respond to this invitation for bids.

A site showing at the property is scheduled for 11:00 A.M. on June 22, 1994. Sealed bids will be accepted until the public bid opening in the Conference Room of the Farm & Home Center at 9:15 A.M. on June 29, 1994.

To obtain a bid package, contact the Lancaster County Conservation District at:

Room 6
Farm and Home Center
1383 Arcadia Road
Lancaster, PA
17601
(717) 299-5361

INVITATION FOR BIDS

Through the Pennsylvania Chesapeake Bay Program, the Centre County Conservation District announces the construction of a waste storage structure to be located in Union Township, Centre County. Construction of this project is expected to begin during the month of July.

Prospective contractors will receive a bid package which contains Instructions to Bidders, a sample contract form, the plans and specifications for the project and a bid sheet.

Small and minority businesses and women's business enterprises are encouraged to respond to this invitation for bids.

Sealed bids will be accepted until the public bid opening at 3:00 P.M. on June 28, 1994 at the Centre County Conservation District.

To obtain a bid package contact the Centre County Conservation District at:

Centre County Conservation District
414 Holmes Ave., Suite 4
Bellefonte, PA 16823 (814) 355-6817

Invite For Bids

The Sullivan County Conservation District's Chesapeake Bay Program is accepting bids for the construction of a concrete manure storage facility located on SR 5004 northwest of Shunk, Fox Township, Sullivan County.

Prospective contractors will receive, upon request, a bid package which contains instructions to bidders, a sample contract form, and plans and specifications for the project. A shipping and handling fee of $10.00 for a bid package is refundable to contractors who submit a bid for the contract.

Small and minority businesses and women's business enterprises are encouraged to respond to this invitation for bids.

A site showing for this project will be held on June 21, 1994 at 10:00 am. A location map is included in the bid package.

A public bid opening will be held on July 5, 1994 at 1:00 pm in the Conservation District office in Dushore.

Construction is scheduled to begin in mid July of 1994.

For more information contact:

SULLIVAN COUNTY CONSERVATION DISTRICT

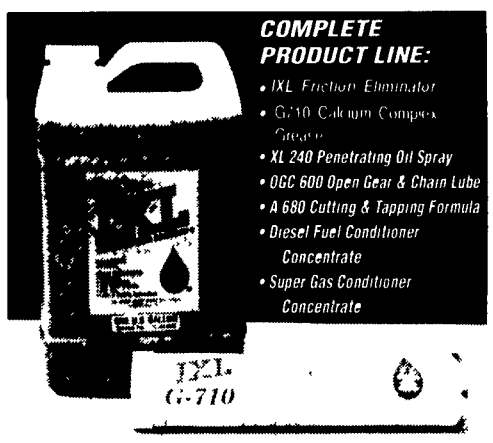
Take Advantage Of The

Friction Eliminator

Preventative Maintenace Motor Care Products!



COMPLETE PRODUCT LINE:
• IXL Friction Eliminator
• G710 Calcium Complex Grease
• XL 240 Penetrating Oil Spray
• OGC 600 Open Gear & Chain Lube
• A 680 Cutting & Tapping Formula
• Diesel Fuel Conditioner Concentrate
• Super Gas Conditioner Concentrate
IXL G-710

Use IXL In:

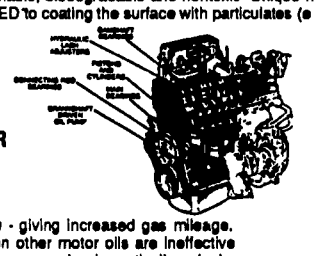
- *Gas & Diesel Engines*
- *Motors*
- *Gear Boxes*
- *Transfer Cases*
- *Steering Units*
- *Universal & CV Joints*
- *Hydraulic Systems*
- *Bearings, All Types*
- *Conveyor Systems*
- *A/C & Refrigeration Systems*
- *Transmissions*
- *Wheel Bearings*
- *Compressors*

Efficiency Is Our Newest Resource

IXL Technology Is New, Different & Better

IXL is the result of years of research and development in Chemistry and Metallurgy
IXL is a non-particulate chemical that goes beyond the typical hydrodynamic principle on which most lubricants are based IXL does NOT contain graphite, moly or TFE It is nonflammable, biodegradable and nontoxic Unique molecular bonding increases the density of the metal surface making it harder and smoother, as OPPOSED to coating the surface with particulates (e g. PTFE) suspended in a high-viscosity oil

CRITICAL LUBRICATION POINTS WHERE METAL-TO-METAL CONTACT CAN OCCUR



ENGINE:
IXL effectively eliminates *Friction* - giving increased gas mileage.
• Protects during cold starts when other motor oils are ineffective
• Increases the drive-train life of your car - by dramatically reducing wear and tear on the moving components.
• Environmentally friendly.
Add 1 oz. Per Quart

AUTOMATIC TRANSMISSION:
IXL protects seals Reduces *Friction* in bearings and gears resulting in extended transmission life.
Add 1 oz. Per Quart

MANUAL TRANSMISSION:
IXL reduces *Friction* between gears and synchronizers resulting in smoother operating, better shifting with overall protection.
Add 1 oz. Per Quart

POWER STEERING:
IXL reduces *Friction* in pump, gearbox and rack. Resulting in smoother operating with less energy expired. Also protects rack and pinion from developing hard spots.
Add 1 oz. Per Quart

REAR END & DIFFERENTIAL:
By introducing IXL to the Rear End and Differential you protect the ring and pinion plus all gears and bearings that normally fail due to wear. One also has the addition of fuel economy because less *Friction* means greater gas mileage.
Add 1 oz. Per Quart

AIR-CONDITIONING:
By adding 1 ounce of IXL to the air-conditioning unit results in smoother operating, less energy expired and eliminates noise and chattering.
Add 1 oz. Per Quart

Satisfaction guaranteed or your money back.

Anything Less Isn't Good Enough

If livestock is your business, Eby Gooseneck Trailers include these features to protect the livestock you transport:

- Durable all-aluminum construction with less weight for more payload
- Axles, wheels, tires and brakes that are designed to carry the weight the trailer will hold
- Gates and doors designed for easy loading/unloading
- Proven post and slat design to control airflow and easily close up for winter conditions
- Aerodynamic design to improve fuel economy

Eby Gooseneck Trailers are available in lengths from 12 to 32 feet with a choice of widths and inside heights. We offer every custom option, including stainless steel front end for great looks.

Whatever kind of livestock you transport, you can rely on EBY products to do the job right.

Eby custom-builds bodies and trailers for all types of livestock, grain and farm commodities.

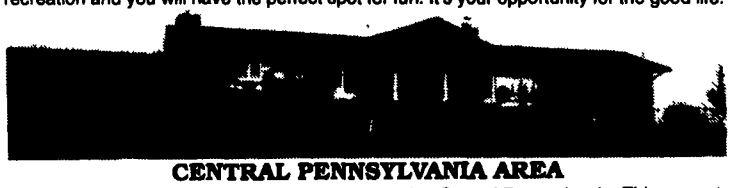
FISHING...

We sent Mr. Haas of our office to check on this new listing last week and he hasn't returned. He did call to say "Bring more bait"! Apparently, the fishing is great right from the front yard at the two bedroom cottage. There is a large porch for the perfect spot to watch the sunset over the water. You'll love the warmth of the mountainstone fireplace. Go for walks in the nearby woods, enjoy canoeing from your front lawn, you name the recreation and you will have the perfect spot for fun. It's your opportunity for the good life.



CENTRAL PENNSYLVANIA AREA

Established boarding and breeding kennel located in Central Pennsylvania. This property includes a custom stone home with four bedrooms and two baths on a large lot. Other features include 2 stone fireplaces, family room, custom oak kitchen, inground pool and an orchard. Excellent business opportunity with approximately 20 kennel runs.

EAST OF THE SUN, WEST OF THE MOON

This wooded 21 acre site is really secluded. Your in-laws will never find you unless you draw them a map, yet it's less than 20 minutes from Lewisburg. This is a great spot for weekends or for the rest of your life

Dreamfield Manor
960 Acre Country Estate
Just 35 Miles From Philadelphia

A rare opportunity to own a beautiful private valley. This one of a kind farm features a traditional English Manor entryway to the main set of buildings passing between the gate house and stone bank barn and over 2 stone bridges to an exquisite stone manor house circa 1703, with 6 bedrooms & 3 huge stone fireplaces, There is also a large Federal brick manor house. In total there are eight farm houses, four of which are stone, and two large stone bank barns. The land consists of gently rolling fields, woodland, and a beautiful stream valley. This farm has excellent potential for equestrian activities such as fox hunting or combined training. Secluded yet close to a PA Turnpike interchange and interstate 78. (the owner may consider dividing) $6.5 Million.

CONGRATULATIONS TO HIDDEN-VIEW HOLSTEINS FOR 15 YEARS OF COMMITMENT TO AGRICULTURE AND THE DAIRY INDUSTRY.

PICTURED - Front Left (L to R): Darvin Boyd and Pat Coomes from the CoreStates Hamilton Bank Agri-Finance Department; (center): The Kissling Family - Andrew, Teresa, and Tim; (center right): The CoreStates Hamilton Bank Agri-Finance Department - Ann Marie Barr, Donna Schreiner, Gene Martin, Roger Rohrer, and (kneeling): Ted Bowers and John Mattilio.

CoreStates Hamilton Bank believes **"THE FAMILY FARM IS THE BACKBONE OF AGRICULTURE."** On behalf of all dairy farmers, we are pleased to salute the success of **HIDDEN-VIEW HOSTEINS** at 1700 Brownsville Road, Robesonia, in Berks County. The Tim Kissling family has been dairying for 15 years and currently includes Tim, Teresa, and son Andrew. The current milking herd of 75 registered holsteins has a herd average of 24,059 milk, 839 fat, 783 protein, and a 107.8% BAA. Domestic and international marketing of genetics through bulls and embryos plays a major role at Hidden-View. Members of some of the cow families at the forefront of the holstein breed have been added over the past 6 years to develop an intense genetic marketing program. **A promotional herd sale has been planned for November 12, 1994 at Hidden-View. Everyone is invited to attend.**

A SALUTE TO DAIRY FARMERS. EVERY MONTH IS DAIRY MONTH WITH US.

June is National Dairy Month and at CoreStates Hamilton Bank, we feel you deserve credit more than one month out of the year. Managing a successful dairy operation requires working capital all year round. We're here to help you meet your financial needs.

Dairy is the major agricultural enterprise in Pennsylvania and accounts for 28.2% of the total agricultural production value. The total annual volume of dairy production for our seven-county area is $486 million. This represents 32.4% of the yearly production for Pennsylvania. That's a record you can be proud of.

Talk to your friends at CoreStates Hamilton Bank, where every month is dairy month.

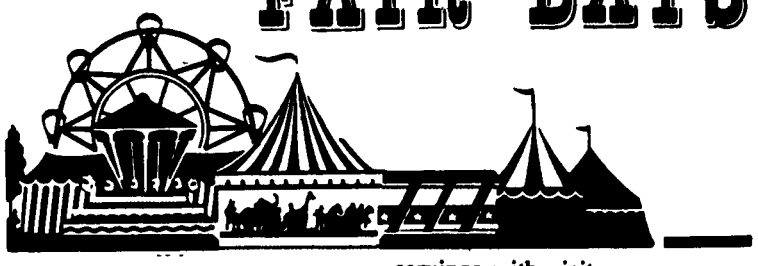
FAIR DAYS



Kutztown Folk Festival

At this summer's nine-day Kutztown Folk Festival, which will be held from Saturday, July 2, through Sunday, July 10, visitors will discover exciting additions to the Folk Festival's distinguished group of craftsmen.

On the Commons, visitors will find Gwen Kossman, a new flag maker. Her colorful banners will catch everyone's eye. Maria and Vera Ivanov will have sheepskin clothing, slippers, and accessories to keep hearts warm during the coming winter. Vicki and Max Carr's sculpture for the garden will enhance one's outdoor surroundings. The fragrance from Melissa Lettick's herb potpourri will entice visitors to her tent. Finally, Lois and Bob Keegan will share their whimsical stone face carvings with visitors.

Of course, the Commons is only one part of the festival — visitors will find many buildings brimming with multi-talented crafts workers. Tile making and fraktur, hair ornaments and button jewelry, children's back packs and stained glass, and pysanky eggs and cinnamon beeswax are just some of the additions to the craft stalls.

Down in the wagon shed, visitors will make their own brass rubbings of ancient European designs and treat themselves to views of Amish life that Mel Horst has collected over a lifetime of working with the Amish.

Spinning, weaving, leather working, hat making, and jewelry making will entice visitors to explore the other Folk Arts and Crafts Buildings. Visitors will still find many traditional craftsmen working hard to please them. Joe Beck will have his forge hot and will fashion beautiful objects from iron. Bob Evans' knobbits will call visitors to his tent to wish them luck. David Marks will entertain visitors with tunes on his dulicmers, and William and Edna Leinbach will dye the wool yarn, using traditional vegetable dyes, they need to weave the spectacular coverlets for which they are justly famous.

The Kutztown Folk Festival offers more that will delight and entertain visitors. Church and civic groups work hard to provide the best in homemade Pennsylvania Dutch food. Pennsylvania Dutch women work all winter to produce the 1,200 handmade quilts for the 30th Annual Quilting Contest, which will award 35 prize-winners more than $5,000 in prize money. Experts in Pennsylvania Dutch life and culture present several stage programs, while the Amish Wedding and hoedowning and jigging demonstrations entertain daily.

Proceeds from the 45th Annual Kutztown Folk Festival will benefit Ursinus College, of Collegeville, Pennsylvania. For more information, call (610) 683-8707 or write Kutztown Folk Festival, 461 Vine Lane, Kutztown, PA 19530.

If we could build a better Robin, we would! AND WE DID!

Try the new Robin! (Formerly Wisc-Robin) Same quality features they always had but now with Overhead Valves and all the latest technology. All this plus a much lower price (Due to more direct marketing) makes it today's best engine buy.

Robin

All Models Feature Low Oil Shutdown & Heavy Duty Air Cleaner

EH 12	4 HP	$269.00	EH 25	8.5 HP	$449.00
EH 17	6 HP	$289.00	EH 30	9.5 HP	$459.00
			EH 34	11 HP	$519.00

Guarantee: If Not Completely Satisfied Return Engine Within 30 Days, And We Will Replace It With A Comparable Kawasaki Or Honda Engine.

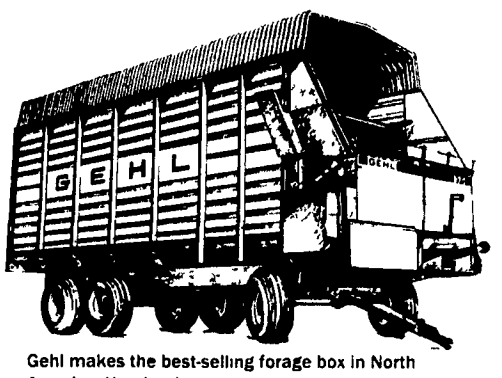
Binkley & Hurst Bros. Inc. Is Your Source For NORTH AMERICA'S #1 FORAGE BOX



Gehl makes the best-selling forage box in North America Here's why:

- **Five sizes** deliver the capacity to match your forage harvesting operation
- **10-Year Warranty** against rust-through on sides, endgate, stakes and roof.
- **Wide 23 1/2-inch** cross conveyor extends nine inches beyond the box side, for easy positioning to the blower
- **Even-Feed third beater** has extended tines to break up clumps for smooth crop delivery to the cross conveyor.
- **Four-speed drive system** features #50 roller chain for added durability.
- **Heavy-duty Gehl running gears** match the capacity of Gehl forage boxes.

Rhino disc mowers feature an easy access cutterbar The innovative design of the cutterbar allows access to the disc spindle shaft and gear module without disassembly of the entire cutterbar, reducing maintenance costs and downtime. The hardened rock guards are designed to help protect the entire leading edge of the cutterbar from damage and, along with the skid shoes, are easily replaceable. A heavy duty CAT I-II & Cat II offset three-point hitch made of 4"x6" thick-wall tubing, is standard to provide dependable service. A safety breakaway system is built in to provide mainframe protection against sudden impacts when mowing. With 5" of blade overlap and blade tip speed of 15,814 FPM Rhino disc mowers provide a clean, smooth cut. Rugged construction and high performance are two reasons Rhino disc mowers are the ideal choice for fast, efficient grass mowing.

JUNE PART DEPT SPECIAL
DICKEY-john® HARVEST-HAND
Portable Grain Moisture Tester

Harvest-Hand measures the moisture content of your grain automatically. It weighs the sample and automatically compensates for grain temperature. Just turn the unit ON, select the desired grain, and slowly pour your grain into the test cell. The measurement cycle begins automatically when the proper weight of grain has entered the cell. Read the direct temperature-compensated moisture content when display stops flashing.

Direct readings for these 12 grains:

1. corn
2. soybeans
3. wheat
4. milo
5. oats
6. barley
7. sunflowers
8. canola
9. rice
10. popcorn
11. millet
12. rye

Sale Price $197.50

Conversion charts available for other grains.

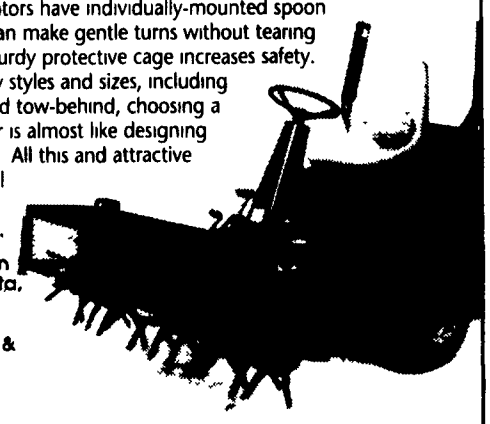
Put a Front-Mount Millcreek Aerator on Your Commercial Mower.

Get more production and profitability from your John Deere, Ford, Kubota or Excel Hustler up-front mowers by attaching a front mount Millcreek core plug aerator.

Millcreek aerators have individually-mounted spoon wheels so you can make gentle turns without tearing turf. And our sturdy protective cage increases safety.

With so many styles and sizes, including 3-point hitch and tow-behind, choosing a Millcreek aerator is almost like designing one for yourself. All this and attractive pricing too. Call today for your free information.



- Fits Ford, John Deere, Kubota, Excel Hustler
- 42", 63", 84"
- 3-point hitch & tow-behind models
- Economy Models Also
- Individual spoon wheels
- Safety cage included

We Stand Behind Every Axial Flow Combine Reconditioned by Hoober Combine Specialists!

Don Carper Says,

"When a salesman trades an Axial Flow Combine, he has my men prepare a detailed report of everything needed to repair the machine so it is ready to work with no or minimal downtime during the year's grain and corn/bean season. My men and I want the combine fixed right! We're the one's who stand behind it when a farmer buys it"

ROTO BALE CUTTER

The Simplest Way to Get Round Bale Hay into Your TMR Mixer

A fast, easy and economical way to cut round bales into shorter lengths and smaller pieces for **easier feeding.** This allows weighing of the **correct amount** of hay into your mixer for a controlled **Total Mixed Ration.** Reduces wind loss whcich occurs from grinding or shredding.

*** Works Great For Mushroom Hay ***

GARRETT IS BIG ON AG TURBOS

PLOW BIG SAVINGS ON GENUINE GARRETT TURBOS

Don't miss this opportunity to plow some big savings on Genuine Garrett Factory Remanufactured turbochargers. Your Authorized Garrett Distributor Penn Diesel Service should have a turbocharger or cartridge that fits your tractor, combine, or other farm equipment. If it's a turbocharged Ag engine, there's most likely a Garrett turbo on it. Look at the following list of OE's. There's a reason why they specify Garrett turbochargers for their engines:

- Allis Chalmers
- Deutz Allis
- Fiat Allis
- Ford
- International Harvester
- J I Case
- John Deere
- Massey Ferguson
- Navistar
- Perkins

For those same reasons, when it's time for a replacement trubo, it's time for Genuine Garrett. All Genuine Garrett turbochargers are remanufactured to original equipment specifications at the Garrett factory. It's your assurance of original equipment quality and performance with a warranty that matches the new turbo. Genuine Garrett turbochargers are remanufactured with this same high quality parts as new and reengineered for the most recent upgrades and refinements to maintain the exact performance characteristics into the original turbo. For more information on Genuine Garrett Factory Reman Turbos, see your local Garrett Distributor or call or write:

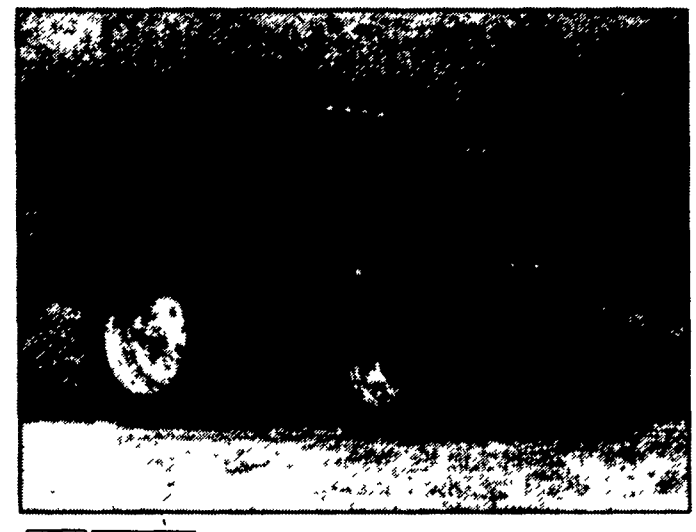
For The Way You Farm Today

Fingertip Powershift Control, Improved Field Visibility and The Most Comfortable Cab Ever



AGCO ALLIS
For the way you farm today

Model 9650
147 PTO HP (109.7 kW)

With their new 18x9 speed full powershift transmissions that electronically control the engagement of massive gears with just the tap of a hand... their cab-forward design that permits a clear, unobstructed view of the field in all directions... and their roomy, comfortable cabs, that feature a unique swivel, air-ride seat and an exclusive seat-mounted control console, the new 9600 Series tractors are clearly ahead of the time.

Every component — from the sleek, sloping hood, to the rugged, cast-iron mainframe to the world-proven air-cooled diesel engines, that require less maintenance — has been designed to match the way you farm today. The result is greater comfort, better performance and improved productivity.

Compare the features and specifications for yourself. Better yet, stop by your AGCO Allis dealer soon and try out one of the 9600 models for yourself. You have to drive it to believe it.

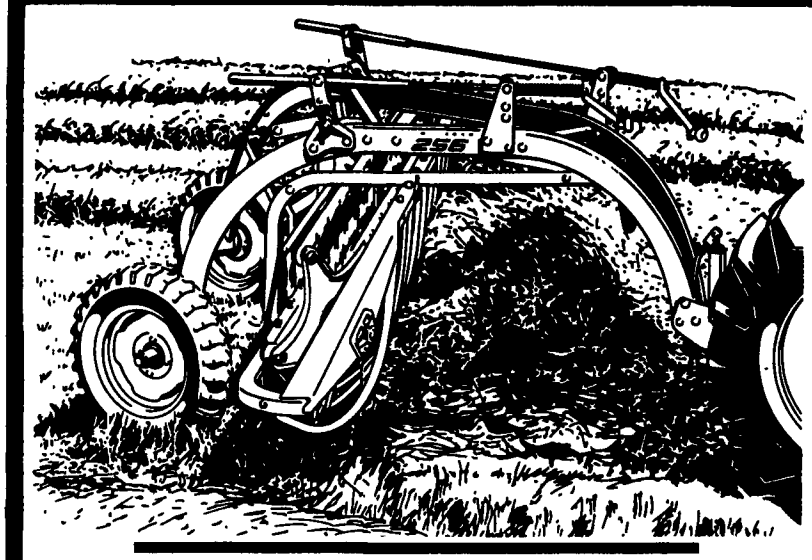
JOHN DEERE

DON'T SETTLE FOR SECOND BEST



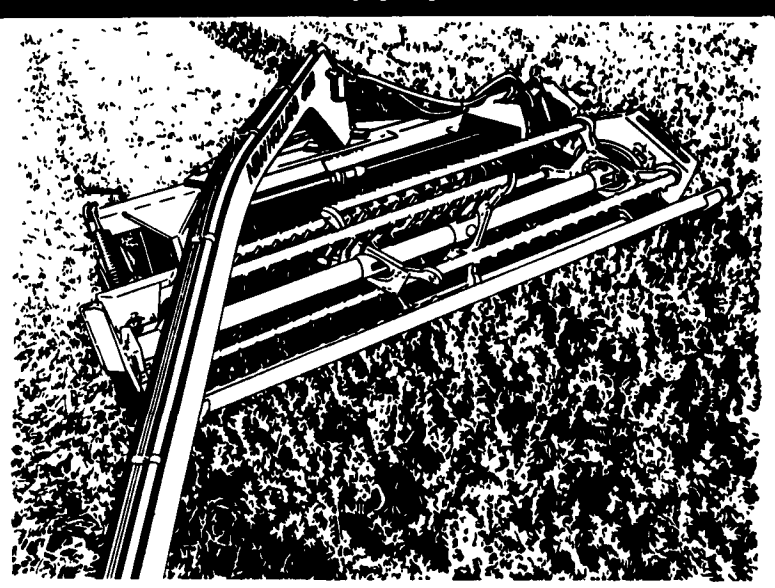
THE ORIGINAL ROLABAR® RAKE

A New Holland Rolabar® rake withstands the test of time. Its rugged construction makes it one hardworking, hay-grabbing machine. That's why more farmers buy New Holland rakes over all other brands combined.

Don't settle for second best. Stop in today and let us show you why New Holland Rolabar rakes are second to none. Available only from Ford New Holland.

Ford
FORD
NEW HOLLAND

499



CAPACITY AND CONVENIENCE

The Model 499 Haybine® mower-conditioner gives you 12-foot capacity with pivot-tongue convenience, plus:

- Patented Rolareel header—no auger needed.
- Fast, clean cutting from dual sickles.
- Thorough, plug-free conditioning from chevron-design rolls.

Put a "499" to work for you.

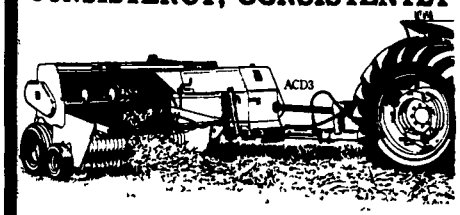
Roundup of Savings

We're passing special savings from John Deere on to you

JOHN DEERE

JOHN DEERE BALERS DELIVER CONSISTENCY, CONSISTENTLY

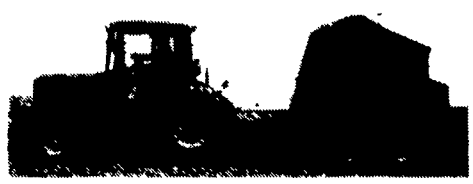


Building "square-er," stackable, solid bales is what our proven hay control system is all about.

Once hay is inside the baler, a continuous-flow, floating auger moves the crop into a tapered chamber... precompressing the hay before it reaches the bale chamber. This makes John Deere bales denser, and more consistent. A difference you'll notice when stacking and feeding bale after John Deere bale

Model 338 Mid Size Baler
With ¼ Turn Chute
Sale Price $10,850.00 (1 Only)

JOHN DEERE...THE FASTEST MOVING BALERS AROUND

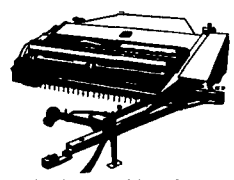


Why do more people choose John Deere balers? Because John Deere balers are easy to use and they deliver the best bales. Bales that hold their shape, and quality.

And they deliver quality bales in tough crops and conditions, too. Just customize your John Deere baler with one or more of these productivity options.

IN STOCK
Model 435 Round Baler
Sale Price $16,500.00

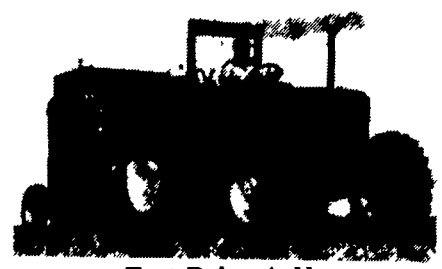
NOBODY DOES HAY BETTER



- Speed up drydown with a John Deere 9-foot 1219 Mower/Conditioner.
- Exclusive urethane conditioning rolls apply more pressure per square inch over more crimping points.
- Easy adjustments for pressure, roll spacing, platform float, shoe height.

IN STOCK NOW
1219 9 Ft. With Options
$9,490.00 (1 Only)

READY FOR YOUR INSPECTION



Test Drive A New John Deere 85 HP, 6400 Tractor Today!

- Experience smooth-shifting performance.
- Ride in complete comfort.
- See the visible difference.
- Join us and discover new power, performance, and productivity

IN STOCK NOW!

AGGRESSIVE ROTARY ACTION LETS YOU EMPTY WAGONS FAST

Keep your forage and your operation moving with a 100 (540 rpm) Forage Blower.

Aggressive Feeding lets you unload wagons fast, for a quick turnaround time. The 100 series blower features a rotary feed table that shoots forage into the blowing chamber. And since the material is already moving when it reaches the fan, you'll need less horsepower to blow silage into the silo.

IN STOCK
Model 100 Blower
Sale Price $3,950.00

450 SERIES END-WHEEL DRILLS

ENHANCED PERFORMANCE AND DURABILITY MAKE THESE DRILLS THE BENCHMARK IN END-WHEEL DRILL DESIGN

The 450 Drill accurately and easily seeds in a variety of conditions, thanks to up to 124 pounds of opener down-pressure and a hefty 1¼ -inch-square pressure shaft.

IN STOCK
Model 450 8 Ft. With Grass Seed Attachment

CLAAS® Rollant round balers give you what you want

—one quality round bale after another.

Discover Quality...Discover Value...

Discover CLAAS
THE HARVESTING SPECIALIST

The **Rollant 66** makes fast work of 4'x5' bales. Its unique two-stage pick-up and close tines produce a clean, efficient harvest in less time. Rollatex netting wraps a bale in 10 seconds or less, and double-twine wraps it up in just 20.

The **Rollant 46** introduced CLAAS's innovative fixed bale chamber to the marketplace. This versatile baler handles all farm operations from dry hay to silage. Nobody produces a better 4'x4' bale.

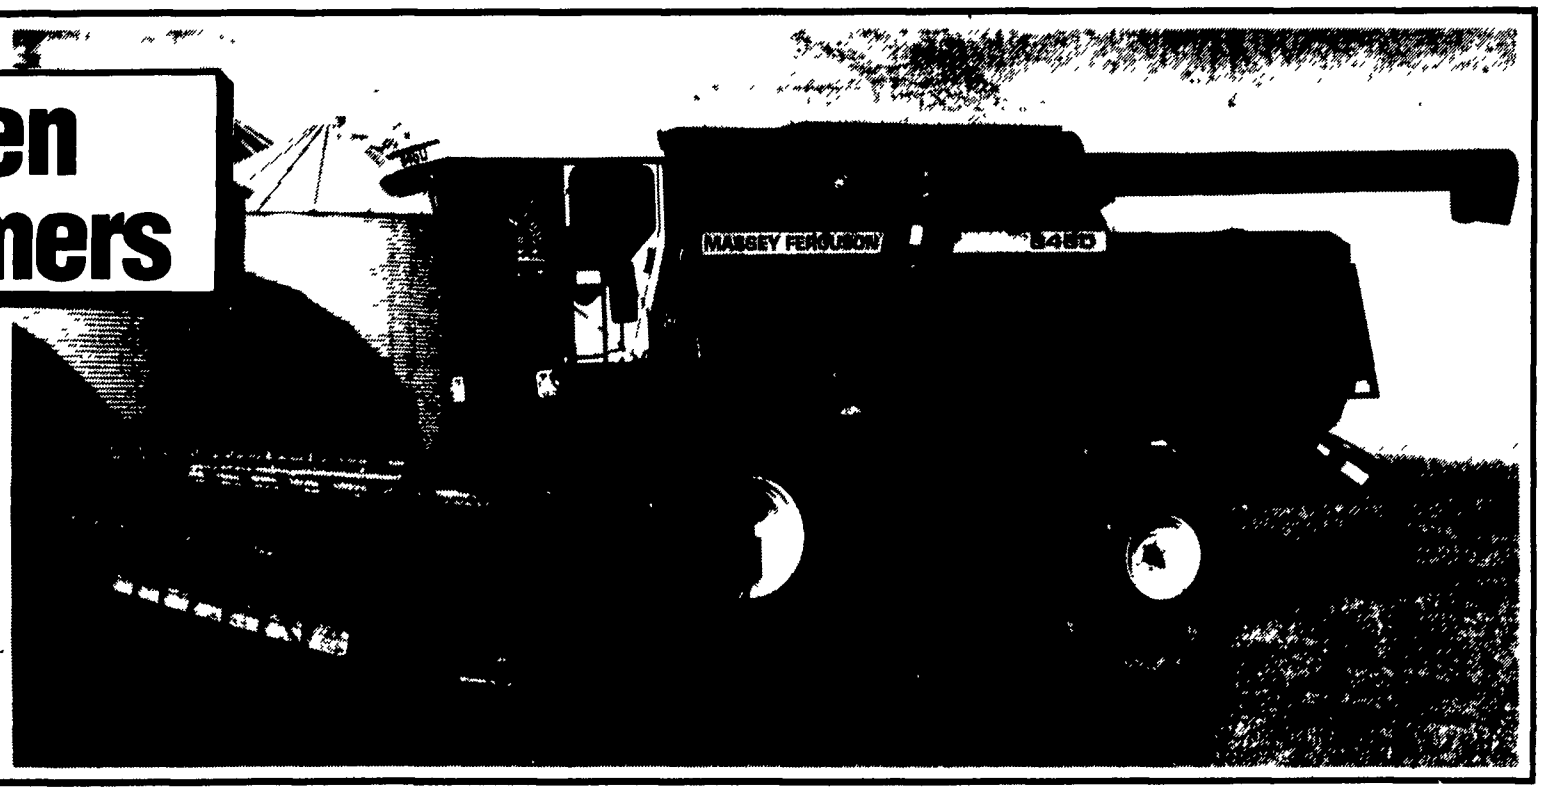
The **Rollant 42** was designed for family livestock operations. This economical investment produces weather-tight 4'x4' bales for the highest nutrient content possible.

CLAAS bales mean nutrient-filled edible hay, low spoilage, and high crude protein retention.

Each **Rollant** offers the innovative chamber, low-profile pick-up, and world class dependability. And they all share CLAAS's international reputation for low maintenance, durability and long-life.

Call now to see how you can improve the round figures on your bottom line.

Proven Performers



The company that introduced the first self-propelled combine is still first with the features, performance and value you want. Intensive Separation System. Dynamic Hillside Compensation System. Turret unloading auger. Perkins Quadram engine. And much more.
